Subject: Public Comment on South KY RECC for the commission

[REDACTED]

Here is my public comment regarding South KY RECC and Heather Napier an attorney of the state.

South KY RECC signed off on an unsafe smart meter called an AMI meter in 2018. Later, they changed it without permission from a clear plate to a blue stripe meter.

The electromagnetic radiation field readings are way above survivable human limits.

The meter is placed in "attack mode." This was done on purpose as gang targeting in the area has been profound.

Meters cannot be placed in attack mode or they will kill the occupants of the building. This is the reason why apartment meters are always forward facing. If they weren't the meter would genocide the occupants of the building.

South KY RECC signed off on this meter as safe when it is clearly not safe. ANYONE can see that especially a jury of electrical professionals which would not be gathered from South KY RECC being that they claim to have no electricians to install meters properly despite being called an "electric company."

This begs the question, - than what is South KY RECC exactly? The way I see it is

they are installers of deadly nuclear weapons devices that are not UL certified. If you don't believe me, have Heather Napier point out where the UL certification is on the weapons devices.

I have taken South KY RECC to court more than once and they always get off on a technicality much like a mafia organization or a racket.

I have demonstrable physical scarring and disfigurement of the body and spine, I am losing function of my left leg, I cannot move without having to go to the bathroom, a serious medical condition with sacral symptoms (equina).

I am in no way responsible for this mess. I did what any normal reasonable person would do and hired professionals and yet your smart meter continues to kill me and injured me. I have multiple phleboliths all over the inside of my body from radiation exposure. My spine hurts so bad it is impossible to cope with and all because South KY RECC refuses to pay for and correct their mistake because if they do that means they are admitting fault and would be liable for a new spinal cord, new breasts, new skin, a new brain and new internal organs. Around 999 Trillion dollars with triple penalties and fees and damages accruing.

Not to mention lost wages of a medical professional on advanced level with upper level management experience with over 900 thousand dollars of lost wages so far not including future wages of a 45 years old Pediatric Nurse Practitioners with 22+ years of experience who is disabled now.

I am certain the survivors of San Bruno could understand my concerns being that you have smart meters placed in oil drilling areas that can flame out and is illegal.

I was told that my options are to post a public comment and reminded that South KY RECC does not have an opt out procedures"" and that the meter box is the customers problem. Oh really. Are you saying that if a professional baker installed a meter box that South KY would still hook it up to power and blast the victim with radiation. Or, are you saying a professional electrician must install the meter box and then South KY signs off on it as safe? I am sure any reasonable person would do the latter and yet, South KY still finds a way to weasel out of responsibility despite their seal of approval.

It is clear that South KY RECC has paid off the state based on Heather Napier's responses that are both alarmingly indifferent to human life and alarmingly telling of the state pandering to power.

If the commission does not intervene in this matter and do the right thing I will have no other choice to sue for trillions of dollars.

It is also a matter of discrimination. I am a disabled person and my meter is placed differently than everyone else's.

In case you didn't know, emf radiation causes deafness, paralysis, respiratory

depression, brain cancer and global skin damage down to the internal organs and much more like hair falling out. This is no matter of a simple chest cold. This is full blown immune suppression.

I expect action in my favor if this public comments vs is actually supposed to be worth anything.

Are your meter installers drug tested prior to installing deadly weapons devices to kill people? This is nuclear genocide and no different than gassing people.

South KY RECC is at fault and someone from the state other than Heather Napier better do something.

Very Respectfully,

Patricia Kight APRN, C-Pediatric NP

Board Certified in Pediatrics 22+ years of experience, a medical expert on radiation

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Bernie Moore

Another raise will make a choice for many that have limited incomes to choose between having a warm home, or having a way to cook a meal, or even being able to keep a roof over their heads or paying more and more and more. There will be more homeless, more sitting in cold homes, more not having a way to cook a meal if this raise is given. We don't need higher bills.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Our house already stays colder than we like in the winter and we have a smaller house, gas logs, and a higher bill than my sister who has Jackson energy. With general inflation and the last rate hike by Kentucky power, we can't afford another rate increase.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

My family is already on the equal payment plan. We currently average paying from two hundred fifty four dollars to three hundred and fifty dollars a month on our power bill. I am a retired teacher and my husband is disabled yet is still a school bus driver. Our disabled adult son and disabled granddaughter live with us. Neither are able to care for themselves. We are not financially stable for another increase in our power bill. We live on property that my ancestors settled in 1845. We love living here yet we feel as if we are slowly being forced to leave here and search for a place to live where the cost of living is more reasonable.

We are asking for Kentucky Power to not be granted the raise in residential rates.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Mrs. Garlene Layne-Abshire

Subject: 18% rate increase

[REDACTED]

I have writing this to say that a 18% increase on my electric bill will cause people like me on a fixed income to have a harder time to live with all the increases of inflation going on. We did not have anything to do with the population going down in eastern ky so why should we have to make up the power companies lost profits? To me that is a poor excuse to ask for a 18% rate increase. Also the disasters that had happened were out of the control of the people and they knew that things like that could happen and now I am suppose to pay for the damage of natural disasters? The power company knew that trees needed cut in their right of ways for years and haven't done much to clear them out. Why should I have to pay such a large rate increase when the power company knew these things could happen and didn't prepare for them. It is ridiculous that we pay such higher rates already than anyone in this state now they want a larger rate increase. People here in eastern ky are still struggling from last year's flood so many are still needing housing. People here are struggling to stay here and a new rate increase will not help them. Please take into consideration that people here are having enough of a hard rime already paying so much for electricity that a increase will only cause a bigger hardship on the poor & elderly on a fixed income and for many that are working and having a hard time already.

Thank You,
Chris Hensley

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Deloris Scherer
