Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Tina Hensley

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Why are Kentucky Power customers paying the highest rates in the state? Does it cost KY Power more to produce their power? Unlikely, KY power hold the power because it's customers have no choice but buy from them. I remember getting charged more than was allowed a few years ago. No one holds KY Power accountable. It seems like now is a good time to install solar panels and disconnect KY Power from my property.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Kevin Harper

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

The people of Eastern Kentucky are a hard working and proud people. We have survived many hardships, including the wipe out of the coal industry that fed our families for generations. We were given no choice but to pay for the decommissioning of coal fired plants so that Kentucky Power could remain the overpriced monopoly that they are in our region. Now they want to raise our costs even more. We beg you, please be our voice and stand up against this rate increase. The majority of our citizens are now older, fixed income citizens as the younger generations are leaving to find work. We should not have to choose between electricity or food and medicine. Help us!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

We have personally followed all of AEP's suggestions. All LED lighting, raised our thermostat to uncomfortable levels in summer to reduce energy costs, pretty much go around in the dark and only use large appliances when needed, and still our bill is never under \$600 monthly. We have a newer home, with a monitoring system on our disconnect that shows every power drain on our circuits. I contacted AEP about the huge discrepancy in what we see, and what they bill, and it resulted in a reduction in our bill for 3-4 months to around \$250 monthly. That has since went back to the customary \$600-\$700 monthly. We cannot go on any longer giving in to the AEP rate hikes. It's time they started "living within their means".

Furthermore, we need more competition in power distribution in eastern KY. Many states, such as Texas, have multiple power companies serving a single area. This has led to very competitive rates, free, unmetered nights and weekends, and an overall reduction in energy costs to the consumer. Why can't we have that here in the Commonwealth?

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
James Ball

Comments: Right now, people are trying to figure out whether to buy their medicine or pay their electric bills. What do they want : for the citizens of the state of Kentucky to leave, because that's what will happen. It's hard enough now to live, but if they get this increase: we'll have more robberies and home break ins.

[REDACTED]

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Gordon Belcher  
90 Spa Ct Elkhorn City, KY 41522-7222

**Subject:** Public Comment in Case #2023-00159

[REDACTED]

Dear Commissioners

Case #2023-00159 KY Power Rate Case- As a customer of LG&E, I implore that the Kentucky Public Service Commission reject Kentucky Power's call for an 18% increase. Most customers working people, homeowners and renters and struggling businesspeople- cannot afford any more unfounded increases to their electric bills. My landlord has already added increases to my rent to pay for additional costs of utilities. Most of us are not making more money- but Kentucky Power is.

Instead of raising rates, the utilities should invest in more more modern energy efficiency developments- the Sun is free, flowing water is free, the wind is free, so why not use them and all Kentuckians can save money in the long run?

Consider my comments and reject rate increases to finance reckless and wasteful expansion by Kentucky Power.

Sincerely,  
Larry Hovekamp

Dear Kentucky Public Service Commission,

Our rates are already high in comparison to other parts of the state. They need to tighten their belts in the same way customers do. They give away a lot of money in grants and to sponsor events/organizations. Perhaps some businesses need to do that, but KP is a monopoly--they don't need to entice customers.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. We are on a fixed income and cannot afford to pay any more!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Mildred Gayheart

**Subject:** Kentucky power rate increase

As a kentucky power customer and a citizen of kentucky, I must say that I find the proposed increase of 18% for electricity during record high inflation, reprehensible. In Appalachia, we are a proud energy producing people that are constantly and consistently being taken advantage of. We are paid less than our urban peers and have had to learn to live on less as a result. To propose yet another increase to an already meager paycheck can only be perceived as another tactic to take from the already heavily burdened and disproportionately paid appalachian. I strongly disagree with a rate hike of any kind at this time.

**Subject:** Public Comment in Case #2023-00159

Dear Commissioners

Regarding Case #2023-00159 KY Power Rate Case – As a customer and resident of Letcher County I am very, very concerned about KY Power's request for an 18% raise in rates. This would be their 4th rate increase in 7 years!

As someone nearing retirement I am very concerned about how retirement income will be able to cover these ever increasing rates, and I am probably better off financially than most of my neighbors and certainly the majority of hardworking, but low income Letcher Countains. KY Power says they need to raise rates because we have population loss in the region. Well do they ever consider whether their ever increasing rates are one of the reasons? As they make it more and more expensive to live in eastern Kentucky they will be a major factor driving more of 2us out. KY Power should not be forcing us, its customers who it holds hostage, to pay for its bad business decisions. KY Power should not be asking us to pay and pay and pay when its parent company AEP is making billions of dollars.

KY Power should be working on ways to decrease customers energy rates. They can do this by investing in weatherization and energy efficiency programs that reduce our energy usage, and their need to build more power plants, while making our homes and businesses safer, more comfortable and affordable.

Sincerely,  
Amelia Pickering

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

We have so many families in Eastern KY who are on fixed incomes and already struggling. Many families in our region lost everything during last year's devastating floods. Raising electric rates in eastern KY is only going to put many families in a situation where they must choose between power and medications/food.

Families living in older, poorly insulated homes or mobile homes need help with energy efficiency programs to decrease their bills, not higher rates!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Shannon Gabbard

Dear Commissioners

Case #2023-00159 KY Power Rate Case

I'm 37 years old and have lived in KY my entire life. I love this state and it's natural beauty is unparalleled. People here are hard working and poverty is a real issue. Kentuckians cannot afford this large of a rate increase. We are already struggling to pay our other bills, and many like me are struggling simply to find affordable, safe housing. A gigantic rate hike for no particular reason is the last thing we need. The utility will say they need this rate hike, so they can "invest" in various projects, but often, they lie. The money doesn't go back into the grid, it goes into the utilities pockets, and us regular working people are stuck holding the bag. The utility companies don't care that we're struggling, and increasing rates would be an undue hardship. They only care about profits. They don't care if the grid needs upgrading, they'll let the lines "age in place" until they literally fall apart and start forest fires, destroying property and possibly killing people. The utility only wants to increase rates because it will increase dividends for their shareholders. The utility needs to decide who is more important: the shareholders, or the stakeholders. The people that live in the community and pay the rates are the stakeholders, and we are struggling. Rate increases would cause us to struggle even more. I would encourage the utility to cut the pay of their executives if they need to

free up funds.

Sincerely,  
Mary Early

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. I'm on a fixed income and retired.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Wilma Bentley

Dear Kentucky Public Service Commission,

I am a 2 person income home with decent paying jobs. We have 2 children in our home. My home is paid for. One of the two cars needed in our home are paid for. Our money goes to bills and food for our family. We don't take trips, we can't afford a vacation. We struggle and always have at least 1 bill behind each month.

There is no way that if we are struggling, that other families aren't, even worse. Many people pay rent, many people only have 1 income. Single parents, disabled, and low income are struggling to keep up with everything required by society these days.. Another increase might look good in many pockets, but it could tip someone over the edge, it could be the breaking point of many families and their management of their bills. Please consider not only the lower class income, but also the younger generation who don't stay around here because things are so unaffordable they are better off leaving this area. There are not enough resources or funds to help people around here.

Save Kentucky instead of putting another hole in the ship. That's how you make a difference around here

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Misty Chaney

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. Hello, my wife and I are on a fixed income and both disabled. We just draw social security. As you know we are just getting a 3.2 percent cost of living increase in 2024. It will average 40.00 per month. Medicare is coming up 10. Per month and your increase will eat the rest of it up. I think you should not allow the increase and make them cut the rates back by at least 25%. They do absolutely nothing for anyone. They are just money grabbers and are using us and setting back and laughing and racking in millions every month on the back of poor people. We can't take the increase even if you lessen it it is too much. You will let everything else go up too so stop all of it now!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

[REDACTED]

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. We heat with a pellet burner and still have \$500 bills in winter. Please reject Kentucky Power's proposal to raise residential rates by over 18%. I have lived here since 2009 and the number of raises the company has implemented is ridiculous. We are forced to pay additional charges on every bill. We are now a single income household d/t my health. Please! Someone needs to stand up for the customers. We can't take anymore.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
JOYCE Hinkle  
802 Muddy Ridge Rd Adams, KY 41201-9117

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Have you ever had to choose between buying groceries this month or paying for electricity? Probably not. As someone with an immunocompromised child, her health is the most important thing to me, but I'm already having to make choices like these and to be clear, she needs both food and a properly heated and cooked home. Her father and I both work. We're too rich for any type of food stamps (because if you require assistance of any kind, it's all BEFORE taxes are deducted) but too poor to actually afford basic living needs AND groceries. My little family are not the only ones in this same situation. Do you realize how many people may actually starve to death if you allow AEP/KY Power to continue to extort these obscene amounts of money from us? Let's be honest, we all know they have a monopoly here and they like to remind us of that fact regularly with tactics and attitudes like these because they can do whatever they want to us, you've allowed them to do so thus far, and what are we going to do? Not have power?

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

[REDACTED]

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Bobbie Colwell

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

With inflation and the rising costs of living, this area can not handle another rate increase. People are having to choose whether they are going to pay their electric bill or feed their families or pay for their medications. Most families in this area can not do both, sadly.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

I am a widowed, retired teacher and have already had to dip into my savings due to inflation and rising interest rates. I appreciate the work of the power linemen and the dangers they face to keep people warm and safe. But most of people in Eastern Ky can't handle much more. Please listen to our pleas

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

My friends in other parts of Kentucky are always shocked to hear how expensive the electric bills are here. One friend in Louisville even tried to insist I had to be wrong about my monthly bill last winter. He said it had to be for more than a month. It wasn't.

People in Eastern Kentucky are struggling to get by and afford basic necessities as it is. An 18% rate increase is the last thing we need.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. We already barely survive as it is in single parent homes which is what me and my babies are. When bills hit high we have to choose to stay warm or eat most days and it's not right. We go without a lot of things to pay a power bill that should not be that high. Nowhere else with any other company is the same usage this high. It's fraud if you ask me on so many levels. And we live in a housing project so if our power gets shut off for inability to pay we also get evicted. So in turn for me not making enough to pay these high bills AND feed my babies we lose our home because the power company and its greed. The CEO made 16 million dollars, why? When its company it harvesting the livelihood of its customers and these families. Inabilities to provide for families is the number one cause of suicide in this time and companies like this makes it even harder on people. We literally make minimum wage in Hazard KY where we live and a power bill eats up two weeks of wages. If you have a car payment then your left paying those two bills and going hungry the month and praying they don't call school off so your kid can eat that day. It's insane the way we're getting done.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Crystal Gayheart

**Subject:** Public comment on PSC case #2023-00159

Dear Kentucky Public Service Commission,

The rise in grocery bills along with the rise in power bills has made it impossible for us to meet the financial needs of our family. I'm usually late on our power bill because I simply don't have enough to pay it as is. They tack on additional fees including deposits which makes me never able to catch up. My dad uses a propane single heater (mr. Heater) in his house because he cannot afford to heat his house. He is an 83 year old veteran. We can't do this anymore. Enough is enough. They ask, you give. Someone has to stop it. Please stand up this time. We have been bled dry.

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Lana Banks  
3679 Craft Colly Rd # 21 Ermine, KY 41815-9036

Dear Kentucky Public Service Commission,

So many families are struggling to make ends meet with the economy the way it is already and Kentucky power company has some of the highest rates there is as it is!! East Kentucky can't afford another rate increase!! It is hard enough now without raising it. How many families are going to have to worry about cold home with no heat when they can't pay the bill with another increase?? The bills are outrageous now!! Help us be able to keep the power on!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Samantha Clevinger

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. My power already feels like it has increased to an absurd high with no significant change of power uses and no reason to spike. The power company simple doesn't need this increase when people are struggling with inflation (and the increases KP has gotten over time) Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%.. This would be devastating to the people in Ky. Inflation is taking our pay checks.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Mr Vernon Gibbs

**Sent:** Sunday, November 12, 2023 7:18 PM  
**To:** PSC Public Comment <PSC.Comment@ky.gov>  
**Subject:** Kentucky Power Rate Increase

To whom it may concern,

I am writing to ask that you please DO NOT increase the power bills at the rate you are wanting. I live in Hazard and this area, like most of southeastern KY, is an impoverished area. Many people (myself included) depend on LIHEAP to help offset high electric bills in the winter and summer. If there is an 18.3% increase, LIHEAP assistance would still leave many unable to pay the remainder of their bill.

With that much of an increase, people won't be able to buy groceries, and those on Medicare won't be able to afford their medicines.

A price increase to an electric bill that is already difficult to pay during the winter and summer, would be very bad for Southeastern KY, which could lead to weather related injuries or deaths.

PLEASE DON'T!

Thank you!  
Maggie Couch

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

If the customers are going to be held responsible for bad decisions by power co mgt then the customers should have a say in the projects they undertake.

Customers with fixed incomes can't take a rate increase in power as they just got a large rate increase in water/sewer bills.

Elizabeth Branham

Dear Kentucky Public Service Commission,

We live on a limited income and cannot afford this increase with all time high groceries prices along with rising prices on everything. Our increase in Social Security is only 3% and this increase will negate this little raise and further the poverty level of our communities. Please reconsider this raise and keep our communities warmer this Winter.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Reda Caudill

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. Please don't raise our rates, it's hard enough to pay them as it is.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

In Letcher Co., specifically, the electric bills can become ridiculously high during winter. Last year, many customers saw electric bills as high as \$1,000. WHY?!!! In an area that is impoverished and still recovering from a devastating epic flood, as well as high grocery and gas prices, with many people already living check-to-check, WHY are electric rates being permitted to increase? People struggle to make ends meet as it is. And there is no compassion from the electric companies. PLEASE stop the rate hikes and give people some relief!

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Seniors like me on a fixed income cannot take any more rate hikes!!!! Barely can pay it now, sometimes in payments!!! We don't need to be paying for your employees retirement, vacation and what ever else you throw at us!!! It's not fair!! Get rid of some of the employees behind a desk doing nothing would help everybody!!!

We went through very high Fuel Adjustment charges for months, which made it very hard as I am on a fixed income. Giving a CEO a 16 million dollar bonus when part of your company is in financial trouble is dumb as a rock! No increase, get this power co. On the right track!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Ky Power Customers, are getting ripped off! They are constantly giving money away to charities and scholarships and donating a utility truck to our local college for their lineman program. All that is great, but at the unfortunate rate hikes for their customers to put that on our backs is unfair! Make them adjust their budgets the way the middle class man or woman has to in order to run their household and stop giving so much away and maybe you won't keep asking for rate increases!

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

We are already paying good money for your service and our power goes off and on several times a month. We are barely keeping our head above water now. We can not afford a higher bill.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Paula McCracken  
1504 Walnut St Flatwoods, KY 41139-1148

Dear Kentucky Public Service Commission,

Thanks to Kentucky Power turning away from coal and switching to "alternative" sources, We, the customers, are paying the highest power bills in the state. We work hard to afford warm homes. That can only be possible with affordable energy. With coal, clean air, and a safe climate are still possible - WITHOUT HIGHER BILLS. With inflation weakening the Dollar and utility providers being allowed so many rate increases, families' budgets are now strained to the max. Factor in the ever increasing prices of groceries, prescriptions, and all forms of goods, it's a recipe for poverty on the level of Venezuela and other third-world countries. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. Thank You.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Calvin Lemaster

There no way we can pay a higher power bill, nor can my neighbors. We were born and raised in Eastern Kentucky, I have lived here for 66 years, if our power bill goes higher, we will have to move to another state or another part of Kentucky where the power bills are less. Our families that live in Tennessee, Pennsylvania and Indiana pay less than \$100 a month for their electric bill.

Sincerely  
Robin Hamilton

Comments: Please reject Kentucky Power's proposal to raise rates by over 18% and encourage Kentucky Power to address already high customer rates with energy efficient programs. My husband and I live on Social Security and are an 18% raise would mean paying out an additional \$500 a year for us on a fixed income. With the high cost of food and meds, we just cannot afford any increase in our expenses. I'm sure there are many elderly folks in the same situation. Kentucky Power customers are already paying the highest power bills in the state. We need warm homes but we need food and medicines also, Not Higher Bills!!

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

We as customers of Kentucky Power have no choice but to get our electricity from this poorly managed company. We should not be financially responsible for their poor management. I as a customer am responsible for paying for my decisions. Kentucky power should be responsible for their own.

They don't maintain their lines thus must constantly repair them.

They hired people to cut tree for MONTHS on end that didn't do much of anything but I'm sure still got paid.

My electricity is interrupted constantly. The joke around my area is that the wind must have blown if the power is off. It is ridiculous. In the winter if the electricity goes off it can stay off for days and has in the past been off for weeks.

They are always asking for raises. Well the customers of Kentucky power DESERVE

refunds. Honestly the commission should fine them instead of rewarding them.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,

Amelia Hunt

**Subject:** Public comment on PSC case #2023-00159

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

My electric bill is already almost half of my monthly fixed income. It's also more than double all the rest of my monthly bills COMBINED. That is ridiculous!! Not only is the electric higher here than anywhere else in the state; it's also the highest of any state I have ever lived in. I do not complain about paying fair rates for fair services, but Kentucky Power is outright robbing its customers, and unless we go off grid, we have no options to choose from.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Mrs. Carla Knowlton  
838 Pinsonfork Rd Mc Andrews, KY 41543-8003

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

If Kentucky Power is struggling financially, as they state, they should look into internal cost savings, such as a termination of bonuses and look into restructuring their management organization. My employers, in the past, have done this if the company had a bad year. They did not pass their bad choices and mismanagement problems onto the customers. From what I saw online, the parent company of Kentucky Power, AEP, it's CEO was paid 16 million dollars last year. If they can afford to pay this, they can operate their company. The people of Southeast Kentucky do not need another rate hike.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Jerry Mullins

Please reject this rate increase. As a senior on limited incomes we can't afford a higher electric bill. I am sitting here in my house with the thermostat set at 60 degrees. Yes, I'm freezing but I know this winter I'll need the heat more so I'm trying to keep my bill down as long as I can. We, the people of Eastern Kentucky, have paid enough and should not be required to pay more. Thank you for your help.

Sincerely,  
Yvonne Johnson
