**Subject:** Public comment on PSC case #2023-00159  
**Date:** Tuesday, November 14, 2023 12:23:05 AM

---

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. We barely get good service as it is! Where I live the power blinks at least a couple times per week. During bad weather it will go out sometimes for days at a time. I have lost several hundred dollars worth of meats and other groceries down through the years with no reimbursement because of outages. Everyone around here tries to keep a generator for such emergencies but some of us have nowhere to keep one from getting stolen. Inflation is killing this country at present, especially the cost of food. We are struggling as it is. Do not let them squeeze us any more.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Mr. Doug Davis  
29 Coots Holw Yeaddiss, KY 41777-8600

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. It's sad when you live on a fixed income and over 1/2 of it already goes for electric in the winter months. We do without some food to pay for electric and that is a very sad thing. I pray for the older people because I know some who does without food and medicine to pay for electric and that should never be.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

[REDACTED]

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Ms. Natalie Hamren  
255 Bellefonte Cir Ashland, KY 41101-2195

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

We can't afford yet another price hick here in Kentucky. Prices are high enough, Is people on a fix income have a hard time now paying bills,, if you raise it again we won't be able to pay it. With higher rent, higher gas, higher electric we have it hard now. DON'T RAISE THE ELECTRIC AND MORE, if your so we all will be homeless.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Home phone:

Comments: Kentucky Power has been overcharging our area for power for years. I've been doing case management services for 3 years. In my 3 years of providing service, I helped clients pay electric bills using wrap around funds through mountain comprehensive care center. Wrap around funds could be used for bills, furniture, clothing, and appliances. Over 50% of my clients used their wrap around funds to pay their overpriced bills for Kentucky Power. Many of my clients were close to disconnection. I make decent money myself, but even I find it difficult to pay the full amount of the bill each month. Please do not allow the rate increase. Thank you.

[REDACTED]

[REDACTED]

Dear Kentucky Public Service Commission,

For years, Kentucky Power has taken advantage of an area who has no other choice for electricity, by implementing rate hike after rate hike, with no real justifiable reasons aside from greed. My husband and I never set our thermostat on what we would actually like to because we know our bill is already going to be hundreds of dollars per month, despite our methods of being conservative with our usage. During a time when the economy is struggling and many people have trouble making ends meet, it's despicable for a company that pays its CEO millions of dollars to continuously hit their customers with increases.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Holly Lindsey

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. The people in this community are the poorest people in the state and we already suffer living at or below poverty guidelines. Kentucky Power already utilizes a rate hike during the winter months when power is in greatest use. Instead of seeking to profit more from a community that is still recovering from a massive flood they should be looking for ways to help that community. Kentucky Power has already increased the overall rate 3 times in the last 10 years. Kentucky Power has a monopoly on the electricity provided in Eastern Ky and we demand that they be forced to offer rates at a fair price instead of the plan that they currently have that would increase their revenue by an estimated 100 million dollars.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Rebecca Lewis

[REDACTED]

[REDACTED]

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Miss Lorene coots

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. We absolutely can not afford higher energy prices. Eastern Kentucky folks are doing good just to put food on the table, and buy our medicine. A hike in utility bills, we have people trying to decide between food, heat or medicine. In this economy now is not the time to take more money from struggling households. Please take these comments into consideration when making your decision.

Thank you  
Carolyn Quillen

**Subject:** Ky power rate increase hearing

[REDACTED]

[REDACTED]

To whom it concerns,  
I am writing this in the regards to the proposed rate increase brought forth by Kentucky power. My household, and most in my community of Martin County, Kentucky, are

struggling to maintain utilities and have enough income remaining to purchase groceries and other living essentials as is. We cannot afford another rate increase at this time. My electricity bill has already increased around \$100 a month from the previous rate hike. On average I was paying 220-250 a month and am now paying around 350, sometimes more. I cannot manage another increase and I know many more in my community cannot as well. I ask that the increase be denied.

Thank you,  
Stephanie evans

**Subject:** Power Company Rate Increase

I am opposed to the rate increase requested by Kentucky Power. Most eastern Kentuckians, including myself, are still recovering from the July 2022 flood and are still trying to repair our homes and get back to some normalcy. We cannot handle a rate increase and I personally think it's disgusting for them to ask. People are still living in tents and not back in their homes and they're worried about a rate increase. Our power bills are already higher than anyone else's in this state. It's absolutely ridiculous!!  
Thank you!

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

It has been stated the increase is partially due to the reduced number of customers in Eastern Kentucky. Have you considered the fact that most families that have moved is die to the increased costs for electricity in this area? A large part of the individuals in this area live on a fixed income or have jobs paying minimum wage. In most instances, their power bills exceed total of all their other monthly bills together. Why should you continue to allow these outrageous increases in the already excessive rates?

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

-----  
Name: Matthew Short  
Address: 30 Pinebluff Cv  
City: Harold  
State: KY  
Zip Code: 41635

Phone number where you can be reached: [REDACTED]

Home phone:

Comments: I do not understand how East Kentucky is paying the highest rate in the state and we're now being subjected to another rate increase. This company is constantly donating our money to the community which I also disagree with if they're requesting an increase. The hardships this will create will be felt across an already struggling region. How many of you have received an 18 % cost of living adjustment recently? Consider fixed income home's and others that will have to make decisions that the more fortunate haven't faced. I strongly oppose this rate increase and urge the leadership at Kentucky Power to search for other ways that they might cut costs instead of increasing them. I've written this on my phone, please excuse any grammatical errors and my brevity.

Dear Kentucky Public Service Commission,

I feel big business is getting greedy and taking advantage of the elderly living on fixed income who will be forced to choose between eating or heating. We live in a community where some major employers have went out of business, leaving working residents to live at poverty level or just above. While these companies enrich themselves, we are barely surviving. Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. Sincerely, Mary Reed

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Mrs. Mary Reed

To whom it may concern

We are an older couple living in eastern Kentucky and have only one option for utility service. That service provider is American Electric Power. Since there are no other competitors in the area the company seems to make monetary decisions without considering the income of its customers. The economy is still trying to recover from the beginning of the results of the Coronavirus pandemic. But before that we were still struggling to make ends meet. An increase to our power bill would cause undue stress and financial burden.

Dear Kentucky Public Service Commission,

In our little county the prices of food have skyrocketed, well actually everything has skyrocketed. People on fixed income struggle so bad. Some are left to either pay their power bill now or get the medicine to keep them going or they can't afford food. Our electric bills have gotten higher and higher just in the past years. As a person on fixed income we get a hike on our check but it's never enough to catch up with the cost of living. When there is a raise then Medicare goes up. So the raise is nowhere near to help with the cost of living. I am begging you to stop this increase. Our people are struggling to stay afloat. Please don't let this increase pass. Thank you

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

This not only disproportionately affects working class families who are already struggling beyond their limits as is, but it also affects people on a fixed income in subsidized housing, too. With hiked up utility rates, people in retirement communities, Section 8 housing, etc., most of whom are restricted systemically from increasing their income or having any other means of survival (at the risk of losing what shred of benefits they receive and desperately need to live, like their Medicaid/Medicare, food stamp benefits, disability, etc.), will potentially be pushed out of their homes if the cost of utilities increases. This especially includes but isn't limited to disabled people, single parents, and elderly Kentuckians who would be even more likely to be pushed out of their homes or to go without basic necessities as a direct result.

It's inhumane to require people who can only receive a few hundred dollars per month to survive on to pay even more for something that puts millions of dollars of profits into the hands of a few. Especially when we know, per modern monetary theory, that these privatized utilities (as well as public services like Medicare for all, etc.) could very well be provided by the government and instead are turned into commodities that further extract what little monetary means the majority of us can possibly obtain.

All the while, this will literally cost people their lives in the long-term.

Kentucky Power customers are already paying the highest power bills in the state. We need

warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS.  
Please reject Kentucky Power's proposal to raise residential rates by over 18%, and  
encourage Kentucky Power to address already high customer rates with energy efficiency  
programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory  
process.

Home phone:

Comments: Please deny the proposed rate increase  
Sirs, I am writing in regards to the proposed 18% rate increase, requested by Kentucky Power. I am concerned that the rate increase would place a great burden on a community where many people live below the federal poverty level, surviving on benefits such as SSI, Retirement, Food stamps, welfare and Medicaid! The huge increase in food cost, coupled with high unemployment rates and lack of jobs has taking a huge toll on the community already. With many local businesses closing down already due to less disposable income, Due to so many people being on a fixed income. The rate increases on our Family owned companies and businesses would force many businesses, restaurants and grocery stores to close! These businesses is already suffering greatly from the economic turn down and from the flood of 2022! Please, do not allow Kentucky Power to make a larger profit and more money for its share holders (The request for: higher overall "return of equity" rate that is currently allowed) while forcing even more people into poverty! According to internet postings Kentucky Power customers already paid the highest electric bills in the State of Kentucky! This community should not have to pay for the possible Mis-Management or possible lack of foresight by the management of this utility! In closing, I

asked you to deny the request of the proposed rate increase!

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Johnathan Jordan  
409 Country Club Dr Ashland, KY 41101-2141

[REDACTED]

Dear Kentucky Public Service Commission,

We are a single income family due to my own health conditions. With rising costs of food, health care, and everything else the last thing we need to worry about it how much it's going to cost us to heat our home this winter. My grandparents are on a fixed income and another rate hike could impact them severely. Please reject this rate increase.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Pam DeArmon

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

We retiree customers who are on fixed incomes cannot afford another rate hike on our Kentucky Power bills. We appreciate the dependable service Kentucky Power provides us and we have been faithful customers all our married lives, of 52 years.

That being said, a lot of us have medical issues that require a large portion of our income to be designated for medicine and insurance co-pays, along with the increased food and gasoline prices. We personally worked until we were into our late sixty's, until we retired, in order to be able to afford a comfortable living the last years of our lives. Any increase would be detrimental to us, especially the proposed 18% rate hike! We try to be as conservative as possible with all our utility usages and our expenses in general. We have purchased energy efficient appliances, utilize LED bulbs and set our thermostat to reduce the usage as much as possible. Thank you for your consideration of our request.

Sincerely,  
Vaughn and Virginia Roberts

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Our electric bill ranges between 300 and 800 dollars per month. It is ridiculous electric bills are as much or higher than a house mortgage. We will definitely be looking for alternatives to AEP. It's to the point that we have to decide to buy food or buy power from AEP!

And these ridiculous rates after we provided the country with coal for generations and most of the coal was practically stolen from local landowners!

Larry Deaton

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. My husband and I are on a fixed income and we have a LOT of medical bills. Plus all the the other rising bills we have to pay. We just can't take anymore rate hikes in anything. The PSC already approved a rate hike for our water company. So as you can imagine, we are all struggling to survive. It's hard to buy the food we need plus our meds we need to live. If Kentucky Power would get rid all those money sucking power positions, we wouldn't have to pay their salaries.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Betty Ratliff  
PO Box 101 Regina, KY 41559-0101

[REDACTED]

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Mrs. Kimberly Coleman

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. I'm a 56 year old woman and I work a full time and part time job to help with a disabled husband, it currently takes my paydays and his social security to keep up, we can't handle another rate hike. Please reconsider what this means to families that are struggling harder then he and I are. With the price of groceries, insurance, medication and the other necessities of life it's becoming almost impossible to stay afloat here in Kentucky.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Mrs. Regina Tackett

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. We should have to be the ones to keep paying for their screw ups. They want to keep handing out money to the big wigs and not help the customer out and keep taking money from them. Well we cant afford anymore money coming out of our pocket. The reason AEP is loosing customers is because of the high prices people move out of their area into another electric companies area just to get away from your high prices. It's absolutely ridiculous of your prices and it's all because you cant manage the business right. You keep this up and you will be loosing alot more customers.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

-----  
Name: Jerry Brewer  
Address: 576 West Sookeys Creek  
City: Pikeville  
State: Ky  
Zip Code: 41501  
Phone number where you can be reached:  
Home phone: [REDACTED]  
Utility Name: Ky Power

State the nature of your concern: I am filing this complaint with you guys on behalf of me and all the other little men and we on on a fixed income. It is a shame and disgrace the we have to make a decision to keep warm or cool or pay for the prescription of meds that we need or eat. We have to make this decision every month you Ky Power has a a monopoly on the power in eastern ky you use us because we are an older generation and we don't know to fight these big company's please ky commission don't let ky power have a raise put yourself in the shoes of the ones this will effect the elderly and the disabled Thanjs for taking the time to read  
Have you contacted the utility about the problem: No

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

We humbly ask you to reconsider your allowance of the KY Power rate increase in case #2023-00159. My wife and I are senior citizens ages 79 & 77 living on fixed incomes. I have serious cardiac problems including open heart surgery and a-fib and she is dealing with lymphoma. The high cost of medication, groceries and other expenses leave us very little for extras. Should those rates increase this will put a tremendous burden on us that we simply cannot afford.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. Being on a fixed income it sure makes it tough to pay such high rates. I went on the budget program. Comparing what my bill would have been which is much lower, I would be saving money. But...As soon as I change back to the regular billing all three of my bills sky rocket? I don't understand this logic? So far this year I would have saved around \$1,600.00 if i had been on regular billing. When do I see a savings? My bills on the budget plain are creeping up from month to month? I have a garage that the only thing using power is a small freezer. It runs around \$130.00 monthly. I know that small appliance is not using that kind of power per month? People in Eastern Kentucky, many are on a fixed income, absolutely cant afford this sort of increase. They will be having to decided between paying their power bill or buying groceries to feed their families. A line has to be drawn somewhere, It shouldn't be this way .....this is the United States for crying out loud!!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Don Hughes  
300 Hughes Br East Point, KY 41216-8711

Dear Kentucky Public Service Commission,

We are already paying the highest power bills in the state. We need warm homes, affordable energy. I keep getting better jobs just to pay more for my power bill. We need the power company to stop being greedy- NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, this is killing our families!! I will loose my car if I keep paying higher and higher bills... which means I will loose my job, which will effect my CHILDREN!! .

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

**Subject:** Kentucky Power rate increase 2023-00159

To Whom it May Concern,

My name is Wayne Osborne and I live in the Virgie area of Pike County. To put it simply, this proposed rate increase is criminal. At a time when every family I know, from all socioeconomic levels, is struggling to make ends, a proposed rate increase from a company that is already making incredible profits is an incredible example of greed. This is an insult to every person trying to live on a fixed income, as my parents now do. Many people in Eastern Ky already have to choose between food and rent or other monthly expenses. Now, I suppose they will have to add their power bill to that list. I would like to be able to say that I truly can't believe Kentucky Power is asking for yet another rate increase after getting one in 2021 but nothing about the greed of this company surprises me anymore. This is disgusting.

Wayne Osborne

Comments: I believe that Kentucky Powers desired rate increase or any increase at all is completely exorbitant. Kentucky power cannot even provide reasonable service to downtown Pikeville. I have numerous power surges and outages at my residence downtown. If they cannot provide adequate service at the already high rates, I believe it is unreasonable of them to ask for another increase. People in our area are having to choose between eating and paying a power bill due to the extremely high rates we pay for power already. Other parts of the state have much more reasonable rates. They've taken advantage of this area long enough.

I have lived up north with much colder Temps and never had a bill over \$100, I have lived on other parts of Kentucky with a different provider and never had a bill over \$100-150 and that's in the coldest months, it's ridiculous that with aep n Kentucky Power even in the summer months the bill is never lower then \$250 and extreme \$400-500 in winter, we can't afford this garbage...they need to decrease the rates and give refunds instead.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

If Kentucky Power is successful in increasing its rates many people, myself included, will find themselves having to choose between electricity and food or medication.

Several years ago I was severely injured at work. I've had two surgeries, another surgery is likely in the future, two and a half years of physical therapy, I'm still on total temporary disability, and will never be able to go back to the type of work that I've done for the last 30 years. People like me simply can't afford any more rate increases.

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Crystal Varney

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. Seniors who are already on a tight budget can't afford the high cost of electric. We own a camp in Greenup and stay there on the average of 12 nights a month. We have Grayson Rural Electric and our bill is about 80 dollars a month in the warm months. Our home Electric is on the average of \$133 a month. We have to pay on the average of \$450 a month for our medicines. That doesn't include insurance and other utilities and Dr bills. Please help! We have had enough! Thanks in advance MaryAnn York.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Mrs Mary York

Dear Kentucky Public Service Commission,

I have two babies—an one year old and a three year old. At the end of the month, we still cannot afford all our bills and struggle to make ends meet. My husband works weekends and even extra shifts to help us get caught up on bills. And we aren't the only ones, Leslie County has the poorest people in the state. I worked the educational system for years and would bring children clothes, shoes, and food. Lots of children are being raised by grandparents or parents addicted to substances. If you have a heart at all, why would you make people struggle more than they already are? I've tried to be smarter and had a solar energy specialist come and evaluate our house to get solar panels but I cannot afford that either. & when the specialist came here, I looked at rates other counties were paying for electricity and it was so much less. But people around these areas make way less but have higher bills. It doesn't make sense. Most people around here cannot even afford their babies food and shoes, so why raise rates? I hope when you sleep at night you dream of the babies going without because of this. Be a better person. DO NOT do this. Kentucky Power customers are paying the highest power bills in the state. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,

Mrs. Tiffany Lewis

Being a Grandmother raising 3 fee and daughters and injured in a car accident with no income having to depend on governmental assistance to help with paying my electric bill; This makes it impossible to stay with my head above waters. I'm already struggling with keeping the basic needs these children need! Why make our lives more difficult by making us pay for someone else's mistakes? Why?

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Commissioners

Case #2023-00159 KY Power Rate Case

I'm a former educator and live in Leslie County w/ my family, including my two babies—a one year old and a three year old. We struggle to pay our bills even with my husband working weekends and extra shifts. I consider us middle class, and we cannot afford this bill increase. Our winter bill has been up to four hundred dollars in the past and with this increase, it will be unbelievable. I repeat, the lower class AND middle class cannot afford this 18% increase. Leslie County has some of the poorest people in the state but are paying higher utility rates than anyone else in the state. It's not fair. Children will go without food and other needs if this bill is passed.

Sincerely,  
Tiffany Lewis

[REDACTED]

[REDACTED]

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. We have 6 children and higher bills will only take away from our children. We will not be able to afford to do things with them because all of our money will go to paying higher bills.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Mrs. Sandra Barber  
2340 3rd St W Ashland, KY 41102-3216

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. I am a customer on Kentucky Power and have to depend on financial assistance programs like LIHEAP to help us especially in the winter months when heat is a huge necessity. We are on a fixed income thus just barely managing to pay our bills and feed our family. Please be compassionate toward our contiguous area which has low income families like myself struggling to make it.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

I am already struggling paying my mortgage and my monthly bill. I am on a fixed income from Social Security only and it may come down to eating or paying my mortgage or power bill .

I get no extra help with my power bill or any other bills . It puts one in panic mode to do what is necessary to live . What are we going to do as a community in living? I know this doesn't effect everyone but it puts me in a panicky situation .

Please decline AEP in their quest to raise our electricity bills .

Sincerely  
Thomas Meade  
Minnie , KY 41651

Please do not raise the rates it is hard enough to pay the Power Bill and buy groceries every month. Along with all the other bills. I'm am currently employed but I don't know how the elderly can afford a higher bill on a fixed income. People will have to chose what they will have to do without medicine, food , or pay bills.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

How could you look at our poverty stricken area and possibly consider an 18% rate increase? Have you ever had to choose between buying groceries for your family and paying your power bill? Have you ever had to choose between paying your rent to keep a roof over your head or your power bill to keep your family warm?

Our area suffered the worst natural flooding disaster in history a year ago and people are still trying to rebuild from that. Have you considered what a rate increase such as this will do to those people?

Of course you haven't, why? Because YOU weren't directly affected, YOU get paid millions of dollars to misuse the money that WE pay for power, YOUR family isn't struggling to keep their lights because I assure you that if they were YOU would NOT choose to increase the rates such as this!!!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory

process.

[REDACTED]

[REDACTED]

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
Mrs. linda harrison

As a disabled senior citizen on a fixed income it is a struggle to pay the current rate for electric. If the rates increase there will be many of us freezing this winter.

Dear Kentucky Public Service Commission,

I am disabled and live alone, I've received shit off notices two month in a row already. If there is an increase I'm not going to be able to afford to keep my electricity on even with the help I already get from Community Action. I cannot afford to switch my house to another heating source. How do you sleep at night knowing people are freezing?

[REDACTED]

[REDACTED]

Dear Kentucky Public Service Commission,

In the past couple of years, my electric bill has raised from \$150 budget to \$280 per month. It has almost doubled in just a few years! My family is losing financial ground every month due to inflation. When your CEO is making 18 million dollars, my family on a teacher's pension and a few low wage jobs can not make ends meet. Enough is enough. Our electric use cost averages twice as much as any other bill we have. That's disgusting, especially when we have no other options.

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Sincerely,

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. There is no way we can continue to pay these astronomical prices for electricity. How fair is it for the people of the commonwealth to pay for pay raises or whatever else KY power is using it for. We already know our opinions do not matter, but what good does it do to hike prices again knowing we the people cannot afford it. I have a family of 4 and with inflation spend roughly 1 grand a month on groceries and household supplies and then still have to pay an electricity bill that is roughly the same amount of our mortgage payment. This needs to stop.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

[REDACTED]

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. We can't afford it

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,  
James Fluty  
3416 Central Ave Ashland, KY 41101-2035

[REDACTED]

Dear Kentucky Public Service Commission,

I am a Purple Heart Recipient a combat wounded Disabled Veteran. Every thing is going up in price except our paychecks. Things are so bad that my son and his daughter and my daughter and her son lives with me because they can't afford to live on their own. That is how bad it is here. This is ridiculous. Why do you have to raise your rates for ? And why do you have to raise it that much. Life is hard already please don't make it even more harder. Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Eastern KY can absolutely not afford another raise on their rates. Many of us are still trying to recover from the flood that happened. Last winter my electric bill was so high we had to choose between freezing to death or buying groceries. This is not right! What are people supposed to do that are low income like most of us are? I ask you to please have a heart and realize what this is going to mean for thousands of us.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. People already struggle to have food housing clothing just the bare essentials. If the electric company thru the years had invested money to upkeep grids etc they would need a lot less now. We shouldn't have to suffer because they didn't do this. Poor business practices they have. We can't get a big raise cause everything is priced so high. Fixed income, family's with children, single parents it awful trying to get by day to day.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.
