Re: Letter of Intent – Application for Authorization to Construct a New Cellular Antenna Tower near Edmonton Road, Greensburg, KY 42743 with the tower located at Latitude/Longitude: 37.156392, -85.540427

Dear Members of the Kentucky Public Service Commission:

Please accept this Letter of Intent, along with the enclosed supporting documents, as the uniform application from VB BTS II, LLC (Vertical Bridge) to construct a new 300' self-support tower with a 75' x 75' fenced compound located at 37.156392, -85.540427.

Vertical Bridge is seeking authorization to construct a new cellular tower as required by the Kentucky Revised Statutes (KRS) 100.985 and 100.987, from the Kentucky Public Service Commission. The parcel on which the proposed new cellular antenna tower would be placed is currently being used for agricultural purposes. The proposed site is approximately 0.1-mile northeast along Edmonton Road from the Matney Road and Edmonton Road intersection, and approximately 160 feet southeast off Edmonton Road. This Letter of Intent will address the requirements set forth in the KRS regarding placement and construction of new cell towers within Green County.

Vertical Bridge is trying to expand its infrastructure so wireless communication carriers can enhance their networks to bring more reliable, higher speed data and voice services to the residents, farmers, and travelers in the area, specifically along Edmonton Road and in the rural areas of Green County. T-Mobile will be the anchor tenant on the proposed new tower, with space available for at least two additional carriers to collocate. In an effort to meet T-Mobile's, and future carriers' goals of enhancing their networks, we are requesting that the Kentucky Public Services Commission approve the placement and installation of the proposed new 300' self-support tower.

The communication facility will not affect current traffic as this is an unmanned facility and may only be visited once a month, or as needed, for servicing. Access to the facility will come from Edmonton Road via a proposed access driveway. The communication facility will operate in a clean and quiet manner and does not create air, water, or noise pollution, unsanitary conditions, surface drainage problems, environmental nuisances, traffic congestion, threats to morality or public safety, or other objectionable characteristics that may be offensive to the community. To the contrary, the facility will contribute to the improved safety, convenience, comfort, and general welfare of the community by providing enhanced
