Subject: NO to new gas powered plants by KU -Case #2025-00045

Case #2025-00045 - vote NO

Dear Public Service Commission:

Please do not approve the addition of two new, large gas-powered plants by Kentucky Utilities. This is going in the wrong direction when we know how much fossil fuels are contributing to global emissions. KY Utilities should be using solar energy for increased power needs, and they need to more effectively promote energy efficiency among their customers. And I question the need for more energy - who knows if data centers will really locate in KY in the future, and these data centers may want renewable energy.

Please vote NO.

Thank you.

Subject: PSC case #2025-00045

My understanding is that LGE and KU are requesting permission to build 2 very expensive gas powered plants for the purpose of powering data centers which may or may not be built in our state. Two years ago LGE and KU were granted approval to build 2 solar farms which have not been built. Kentuckians want affordable energy prices and less dependence on fossil fuels. We need to diversify and build more solar plants. I am hoping that the Public Service Commission refuses to grant permission for 2 additional gas plants.
