I am objecting to the increase to our district. For multiple years our water pressure keeps getting worse and worse, no fix. The calcium in our water caused us to have to replace our water heater, shower head, water faucets and more. The water company has to send notices out multiple times a year telling the county to limit our water usage. The fees we have to pay just to pay our monthly bill on top of the additional taxes is already absurd due to the fact that none of these issues have been corrected. I believe this increase will not benefit our district only hurt it. It will also not help correct our issues we have had in this county for years. The other increases we have had in the past have not helped these issues. They keep getting worse. Until the county decides to make an adjustment and make the water better for our county, we the people should not be responsible for this change, much less have to pay for it.
