Comments:

Our community has been dealing with extremely low water pressure, which impacts everything from daily household needs to safety and sanitation. On top of that, the water quality is so hard that it causes constant buildup and damage to pipes, appliances, and fixtures—costs that homeowners are forced to shoulder out of their own pockets. I cannot flush the toilet and take a shower at the same time anymore and my washing machine throws an error code for lower pressure everytime I try to run it. Meade County plans a 27% increase and I submit a public comment under Case Number: 2025-00293, along with many other residents, as well. We need resolution to this issue.
