

To Public Service Commission,

I am writing this request for intervention to the PSC. As a concerned business and residential consumer, I formally object to your letter on the wastewater system. I strongly oppose to the infrastructure upgrades to the wastewater program proposal and I am opposed to any price increase residentially or commercially. I own numerous residential and commercial real estate properties and a 46% increase will put a financial burden upon my tenants and my business. Affordability is not reasonable and it is becoming harder for families and businesses to afford essential services. This hike places an undue burden on those already facing financial issues.

Please consider the impact on families and small business owners when reviewing this proposal. I urge you to reject these excessive increases and explore equitable solutions that don't penalize consumers for essential needs.

Thank you for your time and consideration.

A handwritten signature in black ink that reads "William Gatti". The signature is fluid and cursive, with the first name "William" and last name "Gatti" clearly distinguishable.
