PUBLIC SERVICE
COMMISSION

Dear Sirs:

I am writing to convey my opposition to the construction of a cell tower adjacent to my property. My opposition to this plan concerns RF radiation. According to what I have read, current "safe" standards of RF exposure were developed prior to the deployment of cell phones and do not adequately account for constant & unremittig RF exposure that cell towers would emit. Some experts are on record stating that the current safety standards should be ~~not~~ reduced by 200%. The effects of radiation exposure are well known and include cancer and immune dysregulation. My concern is that by mounting a cell tower near my residence that I would be exposed to unsafe levels of radiation. Also, I am a farmer and bee keeper, and worry about the effects of RF on bee colonies and livestock.

Please consider my request to locate the cell tower at another hilltop away from the cluster of residences (including my own farm) at Reynoldsville.

Sincerely,

Susan Hedgecock (owner of Ganny Sue's Farm)
