Re: Case No. 2011-409

From its annual reports Delta Gas has spent \$36.7 Million on plant facilities since 2005 and has lost 3,172 customers. It has filed two general rate cases, continuing to increase rates to customers not able to flee their system.

Residential sales were 2,018 Mmcf in 2005 (with heating degree days of only 92%) and were only 1,737 Mmcf in 2011 (with heating degree days of 103%).

Why are plant investments being permitted that do not increase sales and only result in higher rates to captive customers?

Why is Glenn Jennings being paid the following amounts over this period of time that the customers and sales have declined and rates have increased \$5Million plus?

Year	Total Compensation	Bonus & Awards Included
2005	\$473,002	\$113,680
2006	\$480,960	\$100,000
2007	\$714,620	\$120,000
2008	\$626,047	\$130,000
2009	\$601,511	\$110,000
2010	\$725,659	\$110,000
2011	\$1,100,899	\$481,960
Total	\$4,722,698	\$1,165,640

Increase over this period = 132% or 22% per year!!
