RE: Christian County Water District
Phase VIII System Upgrade Project
Case No. 2017-00207

Dear Ms. Pinson:

Per the PSC Order dated June 14, 2017, please note the following updates regarding the Christian County Water District's Phase VIII System Upgrade Project:

- Contract 1 (KY Highway 109 vicinity) was substantially complete as of August 1, 2018. The Contractor (Horsley Construction) was notified on January 4, 2019 (letter attached). The Contractor continues to work on punch list items and final cleanup, all with payment of retainage pending.
- Contract 2 (US Highway 41 & KY Highway 1349) was substantially complete as of December 18, 2018. The Contractor (Horsley) was notified on January 4, 2019 (letter attached). The contract presently sits at 94% complete, as the Contractor continues to work on punch list items and final cleanup.
- The District expects a significant sum of leftover funds from the project. In accordance with the Order, please note that CCWD is working with USDA Rural Development to allocate these funds to fund the possible replacement of their pump stations on both KY Highway 109 and US Highway 41, as funds allow.
- McGhee Engineering is preparing the 'as-built' drawings for the referenced contracts. A copy of these is expected to be forwarded to the PSC later this Spring.

If you have any questions or need additional information, please feel free to call our office or email chris.wilcutt@mcgheeengineering.com.

Sincerely,

McGhee Engineering, Inc.

Chris Wilcutt P.E.
Project Engineer

RE: Christian County Water District
Phase VIII B System Upgrade Project – Contract 2
PWSID #0240521-17-003

Dear Mr. Humphries:

As of December 18, 2018, Horsley Construction, Inc. substantially completed work on the second contract of the referenced project. This milestone is all in conjunction with the successful pressure testing, disinfection, placement of the waterline into service, and reconnection of all meters/mains (side roads). Final cleanup of the contract is pending, and it is expected to be completed in the near future as weather allows.

Based upon our firm's knowledge and witness of the work, we believe that the work was performed in accordance with project's plans and specifications approved by the Water Infrastructure Branch of the Division of Water on February 3, 2017. Therefore, the warranty period for Contract 2 of the project will run for a 12-month period ending on **December 18, 2019.**

Hence, we recommend acceptance of this portion of the water project by the Christian County Water District. If you have any questions, please feel free to give our office a call.

Sincerely,
MCGHEE ENGINEERING, INC.

RE: Christian County Water District
Phase VIIIA System Upgrade Project – Contract 1
PWSID #0240521-16-006

Dear Mr. Humphries:

As of August 1, 2018, Horsley Construction, Inc. substantially completed work on the first contract of the referenced project. This milestone is all in conjunction with the successful pressure testing, disinfection, placement of the waterline into service, and reconnection of all meters/mains (side roads). Completion of the contract's punch list is in progress, and it is expected to be completed in the near future.

Based upon our firm's knowledge and witness of the work, we believe that the work was performed in accordance with project's plans and specifications approved by the Water Infrastructure Branch of the Division of Water on September 7, 2016. Therefore, the warranty period for Contract 1 of the project will run for a 12-month period ending on **August 1, 2019**.

Hence, we recommend acceptance of this portion of the water project by the Christian County Water District. If you have any questions, please feel free to give our office a call.

Sincerely,
MCGHEE ENGINEERING, INC.
