PUBLIC SERVICE  
COMMISSION

# Sustainable Management of Rural and Small Systems Workshop

KRADD Conference Center  
Hazard, KY – September 14, 2017

# Welcome and Introductions

Moderator: Lindell Ormsbee

- Welcome
- WVU – University of Kentucky vision for assisting small communities
- Introduction of Team Members
- Participant Introductions – Name, Community, Role
- Workshop Materials
- Meeting Logistics

# Management Process

- Phase I
  - Regional workshops
    - Explain 10 basic management areas
    - Perform general utility assessments
    - Identify possible goals and strategies
- Phase II
  - Individual utility workshops
    - Involve operators, managers, and decision makers
    - Develop feasible goals and strategies
  - Provide technical resources to help support implementation

# Workshop Participants

- This workshop will focus on management issues but will likely involve a range of participants:
  - Operators
  - Managers
  - Decision makers
    - City Officials
      - Mayors
      - City council members
      - Utility board members
    - County Officials
      - Judges
      - Members of the fiscal court

# USDA Workshop-in-a-Box Objectives

- Learn about key utility management areas
- Complete a self-assessment to understand your respective community systems, needs, wants, requirements, and options
- Discuss tools, tips, and measures for performance improvement
- Exchange information and experiences with participants from other local utilities
- Initiate developing an action plan for your respective communities
- Identify possible resources for technical support

# Schedule of Activities

Key Management Areas

Self Assessment Exercise

Lunch, Invited Presentations, Networking

Improving Outcomes

Practices, Tools, and Measures

Creating an Action Plan Exercise

Next Steps

Feedback Session

# Overview of the Ten Key Management Areas

Outcomes that well-managed utilities strive for

# Common Challenges for Utility Managers

- Aging infrastructure
- Rate issues
  - Prioritize demands for utility expenditures
  - Long-term rate adequacy strategy
- Customer satisfaction and confidence with services and rates

# Common Challenges for Utility Managers

- Operational issues
  - Labor and material costs
  - Regulatory compliance and new requirements
- Workforce complexities
  - Attracting and keeping reliable and competent staff
  - Succession planning
- Knowledgeable and engaged board members

# The Well-Managed Utility

- Ten Management Areas framed as outcomes
- Building blocks for utility performance improvement: where to focus and what to strive for
- Most water and wastewater utilities pay attention to these areas and likely perform well in at least some of them
- Fit into, draw on, and support asset management, long-term business planning, continual improvement management systems

# The Ten Key Management Areas

- Product Quality
- Customer Satisfaction
- Infrastructure Stability
- Community Sustainability & Economic Development
- Stakeholder Understanding and Support
- Employee and Leadership Development
- Operational Optimization – Energy and Water Efficiency
- Operational Resiliency
- Water Resource Adequacy
- Financial Viability

# Product Quality

- Clean and safe water
- Produce potable water, treated effluent, and process residuals/recovered resources:
  - Full compliance with regulatory and reliability requirements
  - Consistent with customer, public health, and ecological needs
  - Consistent with local economic development and business needs and opportunities

# Customer Satisfaction

- Know what your customers expect in service, water quality, and rates
- Set goals to meet these expectations
- Help your customers understand the value of water
- Develop a way to gather feedback from your customers, review the feedback, and then act on it

# Employee & Leadership Development

- Enable a workforce that is competent, motivated, adaptive, and safe working
- Ensure employee institutional knowledge is retained and improved on over time
- Create opportunities for professional and leadership development

# Operational Optimization

- Ensure ongoing, timely, cost-effective, and reliable performance improvements in all facets of operations (i.e., continual improvement culture)
- Minimize resource use, loss, and impacts from day-to-day operations (e.g., energy and chemical use, water loss)
- Maintain awareness of information and operational technology developments to anticipate and support timely adoption of improvements

# Financial Viability

- Ensure revenues adequate to recover costs, fund timely maintenance, repair, and replacement of assets, and provide for reserves
- Establish predictable rates, consistent with community expectations and acceptability – discuss rate requirements with customers, board members, and other key stakeholders

# Infrastructure Stability

- Understand **costs** and **condition** for each system component
- Understand operational performance factors (e.g., pressure)
- Plan for system component repair and replacement over the long-term at the lowest possible cost
- Coordinate asset repair, rehabilitation, and replacement within the community to minimize disruptions and other negative consequences

# Operational Resiliency

- Identify threats to the system (legal, financial, non-compliance, environmental, safety, security, and natural disaster) – conduct all hazards vulnerability assessment
- Establish acceptable **risk levels that support** system reliability goals
- Identify how you will manage risks and plan response actions – prepare all-hazards emergency response plan

# Community Sustainability & Economic Development

- Be active in your community
  - Be aware of, or participate in, discussions of community and economic development
  - Get to know local business needs and be aware of opportunities for new residential or business customers
- Align Utility Goals: to be attentive to the impacts utility decisions will have on current and future community and watershed health
- Align Utility Goals: to promote community economic vitality and overall improvement

# Water Resource Adequacy

- Ensure water availability consistent with current and future customer needs:
  - Long-term resource supply and demand analysis
  - Conservation
  - Public education
- Understand the system role in water availability
- Manage operations to provide for long-term aquifer and surface water sustainability and replenishment

# Stakeholder Understanding & Support

- Create understanding and support from oversight bodies, community and watershed interests, and regulatory bodies:
  - Service levels
  - Rate structures
  - Operating budgets
  - Capital improvement programs
  - Risk management decisions
- Actively engage with the community and customers:
  - Understand needs and interests
  - Promote the value of clean and safe water

# The Self-Assessment Exercise

Time to go to work!

# Getting Started (Tab 4)

- **Step 1:** RATE your system's level of achievement (practice and performance) for each management area
- **Step 2:** RANK the importance of each area
- **Step 3:** PLOT the results
- **Step 4:** Improve by exploring

Steps 3&4: Tab 4 – Page 5

Rating (Achievement)	High			
	Medium			
	Low			
		Low	Medium	High
		Ranking (Priority)		

Steps 1&2: Tab 4 – Page 3

Key Management Area	Management Area Description	Step 1: Rate Achievement (Low – High)	Step 2: Rank Priority (Low – High)
1. Water Resource Adequacy (e.g., water quantity)	<ul style="list-style-type: none"> <li>My system is able to meet the water or sanitation needs of its customers now and for the reasonable future.</li> <li>My utility or community has performed a long-term water supply and demand analysis. (Applies to drinking water systems only.)</li> <li>My system understands its relationship to local water availability. (Drinking water utilities should focus on utilization rates relative to any local water stress conditions, wastewater utilities should focus on return flows.)</li> </ul>		
2. Product Quality (e.g., clean & safe water)	<ul style="list-style-type: none"> <li>My system is in compliance with permit requirements and other regulatory or reliability requirements.</li> <li>My utility meets local community expectations for the potable water and/or treated effluent and process residual that it produces.</li> </ul>		
3. Customer Satisfaction	<ul style="list-style-type: none"> <li>Customers are satisfied with the services my system provides.</li> <li>My system has procedures in place to receive and respond to customer feedback in a timely fashion.</li> </ul>		
4. Community Sustainability & Economic Development	<ul style="list-style-type: none"> <li>My utility is aware of and participating in local and regional community and economic development planning activities.</li> <li>My utility's goals also help to support overall watershed and source water protection, and community economic goals.</li> </ul>		
5. Employee & Leadership Development	<ul style="list-style-type: none"> <li>Training programs are in place to retain and improve institutional knowledge.</li> <li>Opportunities exist for employee skills development and career enhancement.</li> <li>Job descriptions, performance expectations, and codes of conduct are established.</li> </ul>		
6. Financial Viability	<ul style="list-style-type: none"> <li>There rates that my utility charges are adequate to pay our bills, put some funds away for the future, and maintain, repair, and replace our equipment and infrastructure as needed. (O&amp;M, debt servicing, and other costs are covered)</li> <li>My utility discusses rate requirements with our customers, board members, and other key stakeholders.</li> </ul>		
7. Operational Optimization (energy/water efficiency)	<ul style="list-style-type: none"> <li>My utility has assessed its current energy usage and performed an energy audit.</li> <li>My utility has maximized resource use and resource loss (e.g., water loss, treatment chemical use).</li> <li>My utility understands, has documented, and monitors key operational aspects of the system (e.g., pressure, flow, quality).</li> </ul>		
8. Infrastructure Stability (e.g., asset management)	<ul style="list-style-type: none"> <li>My utility has inventoried its current system components, condition, and cost.</li> <li>My system has a plan in place for repair and replacement of system components.</li> </ul>		
9. Operational Resiliency	<ul style="list-style-type: none"> <li>My utility has conducted an all hazards vulnerability assessment (safety, natural disasters, environmental risks, etc.).</li> <li>My utility has prepared an all hazards emergency response plan.</li> </ul>		
10. Stakeholder Understanding & Support	<ul style="list-style-type: none"> <li>My system actively engages with local decision makers, community watershed (where relevant), and regulatory representatives to build support for its goals, resources, and the value of the services it provides.</li> <li>My utility performs active customer and stakeholder outreach and education to understand concerns and promote the value of clean and safe water.</li> </ul>		

# STEPS 1 & 2: Rating Achievement and Ranking Priority

## *Self-Assessment Demonstration*

- Use the table on Page 3 of Tab 4 to rate your utility's **achievement (first blank column)** rate in the 10 key management areas: L –low, M – medium, H-high.
- Use the table on Page 3 of Tab 4 to rate the **priority (second blank column)** of each the 10 key management areas for your utility: L –low, M – medium, H-high.

Key Management Area	Management Area Description	Step 1: Rate Achievement (Low – High)	Step 2: Rank Priority (Low – High)
1. Water Resource Adequacy (e.g., water quantity)	<ul style="list-style-type: none"> <li>• My system is able to meet the water or sanitation needs of its customers now and for the reasonable future.</li> <li>• My utility or community has performed a long-term water supply and demand analysis. (Applies to drinking water systems only.)</li> <li>• My system understands its relationship to local water availability. (Drinking water utilities should focus on utilization rates relative to any local water stress conditions, wastewater utilities should focus on return flows.)</li> </ul>		
2. Product Quality (e.g., clean & safe water)	<ul style="list-style-type: none"> <li>• My system is in compliance with permit requirements and other regulatory or reliability requirements.</li> <li>• My utility meets local community expectations for the potable water and/or treated effluent and process residual that it produces.</li> </ul>		
3. Customer Satisfaction	<ul style="list-style-type: none"> <li>• Customers are satisfied with the services my system provides.</li> <li>• My system has procedures in place to receive and respond to customer feedback in a timely fashion.</li> </ul>		
4. Community Sustainability & Economic Development	<ul style="list-style-type: none"> <li>• My utility is aware of and participating in local and regional community and economic development planning activities.</li> <li>• My utility's goals also help to support overall watershed and source water protection, and community economic goals.</li> </ul>		
5. Employee & Leadership Development	<ul style="list-style-type: none"> <li>• Training programs are in place to retain and improve institutional knowledge.</li> <li>• Opportunities exist for employee skills development and career enhancement.</li> <li>• Job descriptions, performance expectations, and codes of conduct are established.</li> </ul>		
6. Financial Viability	<ul style="list-style-type: none"> <li>• The rates that my utility charges are adequate to pay our bills, put some funds away for the future, and maintain, repair, and replace our equipment and infrastructure as needed. (O&amp;M, debt servicing, and other costs are covered)</li> <li>• My utility discusses rate requirements with our customers, board members, and other key stakeholders.</li> </ul>		
7. Operational Optimization (energy/water efficiency)	<ul style="list-style-type: none"> <li>• My utility has assessed its current energy usage and performed an energy audit.</li> <li>• My utility has maximized resource use and resource loss (e.g., water loss, treatment chemical use).</li> <li>• My utility understands, has documented, and monitors key operational aspects of the system (e.g., pressure, flow, quality).</li> </ul>		
8. Infrastructure Stability (e.g., asset management)	<ul style="list-style-type: none"> <li>• My utility has inventoried its current system components, condition, and cost.</li> <li>• My system has a plan in place for repair and replacement of system components.</li> </ul>		
9. Operational Resiliency	<ul style="list-style-type: none"> <li>• My utility has conducted an all hazards vulnerability assessment (safety, natural disasters, environmental risks, etc.).</li> <li>• My utility has prepared an all hazards emergency response plan.</li> </ul>		
10. Stakeholder Understanding & Support	<ul style="list-style-type: none"> <li>• My system actively engages with local decision makers, community, watershed (where relevant), and regulatory representatives to build support for its goals, resources, and the value of the services it provides.</li> <li>• My utility performs active customer and stakeholder outreach and education to understand concerns and promote the value of clean and safe water.</li> </ul>		

# STEPS 1 & 2: Rating Achievement and Ranking Priority

## *Self-Assessment Demonstration*

Take each management

area one at time:

- 1) Review the definition of the management area.
- 2) Rate the achievement level of the area.
- 3) Rate the priority level of the area.

Key Management Area	Management Area Description	Step 1: Rate Achievement (Low–High)	Step 2: Rank Priority (Low–High)
1. Water Resource Adequacy (e.g., water quantity)	<ul style="list-style-type: none"> <li>My system is able to meet the water or sanitation needs of its customers now and for the reasonable future.</li> <li>My utility or community has performed a long-term water supply and demand analysis. (Applies to drinking water systems only.)</li> <li>My system understands its relationship to local water availability. (Drinking water utilities should focus on utilization rates relative to any local water stress conditions, wastewater utilities should focus on return flows.)</li> </ul>	Low	High
2. Product Quality (e.g., clean & safe water)	<ul style="list-style-type: none"> <li>My system is in compliance with permit requirements and other regulatory or reliability requirements.</li> <li>My utility meets local community expectations for the potable water and/or treated effluent and process residual that it produces.</li> </ul>	Medium	High
3. Customer Satisfaction	<ul style="list-style-type: none"> <li>Customers are satisfied with the services my system provides.</li> <li>My system has procedures in place to receive and respond to customer feedback in a timely fashion.</li> </ul>	High	Medium
4. Community Sustainability & Economic Development	<ul style="list-style-type: none"> <li>My utility is aware of and participating in local and regional community and economic development planning activities.</li> <li>My utility's goals also help to support overall watershed and source water protection, and community economic goals.</li> </ul>	Low	Low
5. Employee & Leadership Development	<ul style="list-style-type: none"> <li>Training programs are in place to retain and improve institutional knowledge.</li> <li>Opportunities exist for employee skills development and career enhancement</li> <li>Job descriptions, performance expectations, and codes of conduct are established.</li> </ul>	High	Medium
6. Financial Viability	<ul style="list-style-type: none"> <li>The rates that my utility charges are adequate to pay our bills, put some funds away for the future, and maintain, repair, and replace our equipment and infrastructure as needed. (O&amp;M, debt servicing, and other costs are covered)</li> <li>My utility discusses rate requirements with our customers, board members, and other key stakeholders.</li> </ul>	Low	High

# STEP 1: Rating Achievement

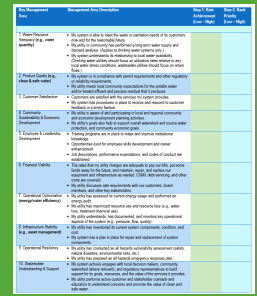

## Scale from LOW to HIGH achievement

- Select **Low** if your system has no workable practices in place for addressing this area – very low capacity and performance.
- Select **Medium** if your system has some workable practices in place with moderate achievement, but could improve – some capacity in place.
- Select **High** if your system has effective, standardized, and accepted practices in place. It either usually or consistently achieves goals – capacity is high and in need of very little or no further development.

1. Water Resource Adequacy (e.g., water quantity)	<ul style="list-style-type: none"> <li>• My system is able to meet the water or sanitation needs of its customers now and for the reasonable future.</li> <li>• My utility or community has performed a long-term water supply and demand analysis. (Applies to drinking water systems only.)</li> <li>• My system understands its relationship to local water availability. (Drinking water utilities should focus on utilization rates relative to any local water stress conditions, wastewater utilities should focus on return flows.)</li> </ul>
2. Product Quality (e.g., clean & safe water)	<ul style="list-style-type: none"> <li>• My system is in compliance with permit requirements and other regulatory or reliability requirements.</li> <li>• My utility meets local community expectations for the potable water and/or treated effluent and process residual that it produces.</li> </ul>
3. Customer Satisfaction	<ul style="list-style-type: none"> <li>• Customers are satisfied with the services my system provides.</li> <li>• My system has procedures in place to receive and respond to customer feedback in a timely fashion.</li> </ul>
4. Community Sustainability & Economic Development	<ul style="list-style-type: none"> <li>• My utility is aware of and participating in local and regional community and economic development planning activities.</li> <li>• My utility's goals also help to support overall watershed and source water protection, and community economic goals.</li> </ul>
5. Employee & Leadership Development	<ul style="list-style-type: none"> <li>• Training programs are in place to retain and improve institutional knowledge.</li> <li>• Opportunities exist for employee skills development and career enhancement.</li> <li>• Job descriptions, performance expectations, and codes of conduct are established.</li> </ul>
6. Financial Viability	<ul style="list-style-type: none"> <li>• The rates that my utility charges are adequate to pay our bills, put some funds away for the future, and maintain, repair, and replace our equipment and infrastructure as needed. (O&amp;M, debt servicing, and other costs are covered)</li> <li>• My utility discusses rate requirements with our customers, board members, and other key stakeholders.</li> </ul>
7. Operational Optimization (energy/water efficiency)	<ul style="list-style-type: none"> <li>• My utility has assessed its current energy usage and performed an energy audit.</li> <li>• My utility has maximized resource use and resource loss (e.g., water loss, treatment chemical use).</li> <li>• My utility understands, has documented, and monitors key operational aspects of the system (e.g., pressure, flow, quality).</li> </ul>

# STEP 2: Ranking Priority

## Scale from LOW to HIGH priority

- Review each of the five prioritization elements:
  1. Crisis situations / urgency (near term or long term)
  2. Current or expected challenges
  3. Consequence severity (non-compliance, costs, health, safety)
  4. Customer impacts (water quality, reliability of service)
  5. Community priorities (economic development, quality of life)
- Select **High** if concerns for most elements (4-5) or a strong concern in several
- Select **Medium** if concerns for some elements (2-3) or a strong concern for one
- Select **Low** if concerns for few or none of the elements (0-1) and no strong concerns

# STEPS 1 & 2: Rating Achievement and Ranking Priority

## *Self-Assessment Demonstration*

Take each management

area one at time:

- 1) Review the definition of the management area.
- 2) Rate the achievement level of the area.
- 3) Rate the priority level of the area.

Key Management Area	Management Area Description	Step 1: Rate Achievement (Low-High)	Step 2: Rank Priority (Low-High)
1. Water Resource Adequacy (e.g., water quantity)	<ul style="list-style-type: none"> <li>My system is able to meet the water or sanitation needs of its customers now and for the reasonable future.</li> <li>My utility or community has performed a long-term water supply and demand analysis. (Applies to drinking water systems only.)</li> <li>My system understands its relationship to local water availability. (Drinking water utilities should focus on utilization rates relative to any local water stress conditions, wastewater utilities should focus on return flows.)</li> </ul>	Low	High
2. Product Quality (e.g., clean & safe water)	<ul style="list-style-type: none"> <li>My system is in compliance with permit requirements and other regulatory or reliability requirements.</li> <li>My utility meets local community expectations for the potable water and/or treated effluent and process residual that it produces.</li> </ul>	Medium	High
3. Customer Satisfaction	<ul style="list-style-type: none"> <li>Customers are satisfied with the services my system provides.</li> <li>My system has procedures in place to receive and respond to customer feedback in a timely fashion.</li> </ul>	High	Medium
4. Community Sustainability & Economic Development	<ul style="list-style-type: none"> <li>My utility is aware of and participating in local and regional community and economic development planning activities.</li> <li>My utility's goals also help to support overall watershed and source water protection, and community economic goals.</li> </ul>	Low	Low
5. Employee & Leadership Development	<ul style="list-style-type: none"> <li>Training programs are in place to retain and improve institutional knowledge.</li> <li>Opportunities exist for employee skills development and career enhancement.</li> <li>Job descriptions, performance expectations, and codes of conduct are established.</li> </ul>	High	Medium
6. Financial Viability	<ul style="list-style-type: none"> <li>The rates that my utility charges are adequate to pay our bills, put some funds away for the future, and maintain, repair, and replace our equipment and infrastructure as needed. (O&amp;M, debt servicing, and other costs are covered)</li> <li>My utility discusses rate requirements with our customers, board members, and other key stakeholders.</li> </ul>	Low	High

Complete by 10:10

# STEP 3: Plotting Results

## *Self-Assessment Demonstration*

WA Water Resource Adequacy  
 PQ Product Quality  
 CS Customer Satisfaction  
 CE Community Sustainability & Economic Development  
 ED Employee & Leadership Development

FV Financial Viability  
 OO Operational Optimization  
 IS Infrastructure Stability  
 OR Operational Resiliency  
 SS Stakeholder Understanding & Support

Key Management Area	Management Area Description	Step 1: Rate Achievement (Low – High)	Step 2: Rank Priority (Low – High)
1. Water Resource Adequacy (e.g., water quantity)	<ul style="list-style-type: none"> <li>My system is able to meet the water or sanitation needs of its customers now and for the reasonable future.</li> <li>My utility or community has performed a long-term water supply and demand analysis. (Applies to drinking water systems only)</li> <li>My system understands its relationship to local water availability. (Drinking water utilities should focus on utilization rates relative to any local water stress conditions, wastewater utilities should focus on return flows)</li> </ul>	Low	High
2. Product Quality (e.g., clean & safe water)	<ul style="list-style-type: none"> <li>My system is in compliance with permit requirements and other regulatory or reliability requirements.</li> <li>My utility meets local community expectations for the potable water and/or treated effluent and process residual that it produces.</li> </ul>	Medium	High
3. Customer Satisfaction	<ul style="list-style-type: none"> <li>Customers are satisfied with the services my system provides.</li> <li>My system has procedures in place to receive and respond to customer feedback in a timely fashion.</li> </ul>	High	Medium

Rating (Achievement)	High		CS	
	Medium			PQ
	Low			WA
		Low	Medium	High
Ranking (Priority)				

# STEPS 3 & 4: Plotting Results and Focusing Attention

## *Self-Assessment Demonstration*

- Use the table on Page 5 of Tab 4 to write the two letters corresponding to each management area in the appropriate box that corresponds to intersection of the two ratings (i.e. the achievement rating and the priority rating).
- Example: Consumer Satisfaction (CS):
  - High – H – Achievement
  - Medium – M - Priority

Key Management Area	Management Area Description	Step 1: Rate Achievement (Low-High)	Step 2: Rank Priority (Low-High)
1. Water Resource Adequacy (e.g., water quantity)	<ul style="list-style-type: none"> <li>My system is able to meet the water or sanitation needs of its customers now and for the reasonable future.</li> <li>My utility or community has performed a long-term water supply and demand analysis. (Applies to drinking water systems only.)</li> <li>My system understands its relationship to local water availability. (Drinking water utilities should focus on utilization rates relative to any local water stress conditions, wastewater utilities should focus on return flows.)</li> </ul>	Low	High
2. Product Quality (e.g., clean & safe water)	<ul style="list-style-type: none"> <li>My system is in compliance with permit requirements and other regulatory or reliability requirements.</li> <li>My utility meets local community expectations for the potable water and/or treated effluent and process residual that it produces.</li> </ul>	Medium	High
3. Customer Satisfaction	<ul style="list-style-type: none"> <li>Customers are satisfied with the services my system provides.</li> <li>My system has procedures in place to receive and respond to customer feedback in a timely fashion.</li> </ul>	High	Medium
4. Community Sustainability & Economic Development	<ul style="list-style-type: none"> <li>My utility is aware of and participating in local and regional community and economic development planning activities.</li> <li>My utility's goals also help to support overall watershed and source water protection, and community economic goals.</li> </ul>	Low	Low
5. Employee & Leadership Development	<ul style="list-style-type: none"> <li>Training programs are in place to retain and improve institutional knowledge.</li> <li>Opportunities exist for employee skills development and career enhancement.</li> <li>Job descriptions, performance expectations, and codes of conduct are established.</li> </ul>	High	Medium
6. Financial Viability	<ul style="list-style-type: none"> <li>The rates that my utility charges are adequate to pay our bills, put some funds away for the future, and maintain, repair, and replace our equipment and infrastructure as needed. (O&amp;M, debt servicing, and other costs are covered.)</li> <li>My utility discusses rate requirements with our customers, board members, and other key stakeholders.</li> </ul>	Low	High

Rating (Achievement)	High		CS	
	Medium			
	Low			
		Low	Medium	High
		Ranking (Priority)		

# STEPS 3: Plotting Results

## *Self-Assessment Demonstration*

WA	Water Resource Adequacy	FV	Financial Viability
PQ	Product Quality	OO	Operational Optimization
CS	Customer Satisfaction	IS	Infrastructure Stability
CE	Community Sustainability & Economic Development	OR	Operational Resiliency
ED	Employee & Leadership Development	SS	Stakeholder Understanding & Support

Rating (Achievement)	High		CS, ED	
	Medium	OO		PQ
	Low	CE		WA, FV
		Low	Medium	High
		Ranking (Priority)		

# Step 4: Self-Assessment Discussion Questions

- What are your areas of focus (the orange and red areas)?
- Why are they an area of focus?
- Are your areas of focus different or similar to the other utilities at your table?
- What lessons can you learn from the other utilities at your table that you could use to improve your performance?
- How might your perspective on these priorities change if you are an:
  - Operator
  - Board Member
  - Judge Executive

# Plotting Results On the Wall

- Using the provided stickers for your utility, place a sticker on each of the 10 Key Management Boards located around the room in each of the same boxes that you recorded on your own plot.

## Your Utility Plot

Rating (Achievement)	High		CS, ED	
	Medium	OD		PQ
	Low	CE		WA, EV
	Low	Medium	High	
Ranking (Priority)				

One of 10 boards located around the room  
(e.g. **Consumer Service**)

Rating (Achievement)	High		Utility Name	
	Medium			
	Low			
	Low	Medium	High	
Ranking (Priority)				

# Lunch

*Guest Speakers*

# Improving Outcomes

Creating a Plan, Taking Action, Measuring Results

# Tips from Previous Improving Outcomes Exercises

- Key management areas selected and discussed at previous workshops:
  - Stakeholder Understanding and Support
  - Infrastructure Stability
  - Financial Viability
  - Employee and Leadership Development
  - Operational Resiliency

# Stakeholder Understanding and Support

- Examples of High Achievement:
  - Capital improvement plan or other document that summarizes utility priorities and can be shared with utility board
  - Establish standard operating procedures for utility staff that address communication
- Possible Changes Needed:
  - Educate stakeholders about utility needs
  - Create ongoing opportunities for stakeholders and utility to interact (e.g., tours of facility)

# Infrastructure Stability

- Examples of High Achievement:
  - Capital improvement plan
  - Inventory of system components, location, installation date, and condition
  - Understanding of system operating parameters (e.g., pressure)
- Possible Changes Needed:
  - Making time to support an incremental approach (e.g., maintenance and repair driven)
  - Ability to do smaller projects and upgrades annually

# Financial Viability

- Examples of High Achievement:
  - Funds set aside for reserves
  - Asset management plans, short and long term plans, and quarterly budget reviews
  - Utility board is knowledgeable about financial issues and system maintenance and repairs
- Possible Changes Needed:
  - Good practices in place for rates and shut-offs
  - Better communication between elected officials, utility staff and consumer
  - Independent rate study
  - Document priorities for system improvements

# Employee and Leadership Development

- Examples of High Achievement:
  - Written job descriptions
  - Clear performance expectations
  - Staff are cross-trained
- Possible Changes Needed:
  - Develop neighboring system relationships for staff to learn from each other
  - Create merit-based initiatives to reward high performance (e.g., additional leave days, recognition, monetary awards)

# Operational Resiliency

- Examples of High Achievement:
  - Emergency response plans, operations plans, shut-off checklists for equipment
  - Drill emergency response plan
  - Certify staff and board members
- Possible Changes Needed:
  - Ensure staff and board know where all emergency documentation is kept
  - Have contractor support lined up in case of emergency

# Table Activity

- Using the **Improving Outcomes Worksheet** provided at your table (also a copy in Tab 6) each **table** should complete an improvement worksheet for **one** of the low achievement/high priority management areas identified by one of your table members. The worksheet has **four** questions to answer.
- After picking a management area, share perspectives on:
  - What will constitute **'high achievement'** in this management area and what are the causes of your achievement gaps?
  - What changes will the utility need to make to **improve performance** and who will need to be involved for these changes to take place?
  - How could you **track your performance progress?**
  - What will be the **biggest challenges** to performance improvement?

# Table Activity

## Using *IMPROVING OUTCOMES WORKSHEET*

### IMPROVING OUTCOMES WORKSHEET

Key Management Area: \_\_\_\_\_ Table Number: \_\_\_\_\_

<b>What will constitute 'high achievement' in this management area and what are the causes of your achievement gaps?</b>	
<b>What changes will the utility need to make to improve performance and who will need to be involved for these changes to take place?</b>	
<b>How could you track your performance progress?</b>	
<b>What will be the biggest challenges to performance improvement</b>

### EPA: Check Up Program for Small System (CUPSS)

- Free Asset Management Tool for Small Drinking Water and Wastewater Utilities
- Tips on How to Develop a Record of Your Assets, an Understanding of Your Financial Situation, and a Tailored Asset Management Plan

The screenshot shows the EPA website for the Check Up Program for Small Systems (CUPSS). The header includes the EPA logo and navigation links: LEARN THE ISSUES, SCIENCE & TECHNOLOGY, LAWS & REGULATIONS, and ABOUT EPA. A search bar is located in the top right corner. The main content area is titled "Water: Check Up Program for Small Systems (CUPSS)" and includes a breadcrumb trail: "You are here: Water » Water Infrastructure » Ground Water & Drinking Water » Public Water Systems » Check Up Program for Small Systems (CUPSS)". Below the title, there are tabs for CUPSS Home, Basic Information, Case Studies, CUPSS Software, Resources, and Training Events. The main text describes CUPSS as a free, easy-to-use asset management tool for small drinking water and wastewater utilities, based on EPA's Simple Tools for Effective Performance (STEP) Guide series. It lists three key benefits: a record of assets, a schedule of required tasks, and an understanding of financial situation. A "Quick Links" sidebar on the right lists items such as "CUPSS Spring Training Dates", "CUPSS v1.3.7 Released", and "CUPSS Self-Paced Training".

## *Water/Energy Efficiency*

### EPA: Energy Use Tool for Water and Wastewater Systems

- Interactive, Excel-based tool
- Detailed Analysis of All Energy Types
- Provides Summary Report: Statement of Energy Performance

The screenshot shows the EPA website's 'Water: Sustainable Infrastructure' page. The main heading is 'Determining Energy Usage'. The page includes a navigation menu on the left with categories like 'Water Home', 'Drinking Water', 'Education & Training', 'Grants & Funding', 'Laws & Regulations', 'Our Waters', 'Pollution Prevention & Control', 'Resources & Performance', 'Science & Technology', 'Water Infrastructure', 'Drinking Water', 'Green Infrastructure', 'Septic Systems', 'Sustainable Infrastructure', 'Water Security', 'Wastewater', 'WaterSense', and 'What You Can Do'. The main content area features a breadcrumb trail: 'You are here: Water » Water Infrastructure » Sustainable Infrastructure » Determining Energy Usage'. Below this, there's a sub-heading 'Determining Energy Usage' and a paragraph explaining that by determining baseline energy use, water and wastewater utility managers and operators can better understand their electricity provider's rate structure and how their current operations impact energy costs. A small image of a water tap with a green energy plug is shown. To the right, there's a 'Sustainable Infrastructure Quick Links' sidebar with items like 'Needs & Funding Gap', 'Water & Energy Efficiency', 'Water Efficiency for Suppliers', 'Water Efficiency Strategies', 'Water Availability', 'Water Maps', 'Energy Efficiency for Utilities', 'Determining Energy Usage', 'Cutting Energy Usage & Costs', 'Renewable Energy Options', 'Financing & Pricing', 'Asset Management', 'Alternative Tech & Assessment', and 'Resources'. At the bottom, there's a 'Just For You' section with 'Local Officials', 'Consumers', and 'Utilities'. The EPA logo and 'United States Environmental Protection Agency' are at the top left, and 'Advanced Search' and 'A-Z Index' are at the top right.

## NRWA: Revolving Loan Fund

- Established Under Grant from USDA/RUS
- Financing for Pre-Development Costs
- Also Available for Equipment Replacement and Service Extension

*Meeting the needs of small rural water and wastewater systems for the future.*

**REVOLVING**  
*Loan*  
**FUND**

The NRWA Revolving Loan Fund was established under a grant from USDA/RUS to provide financing to eligible utilities for pre-development costs associated with proposed water and wastewater projects. RLF funds can also be used with existing water-wastewater systems and the short term costs incurred for replacement equipment, small scale extensions of services or other small capital projects that are not a part of your regular operations and maintenance.

Systems applying must be public entities. This includes municipalities, counties, special purpose districts, Native American Tribes and corporations not operated for profit, including cooperatives, with up to 10,000 population and rural areas with no population limits.

*"We were in a desperate situation and if it had not been for the loan from Revolving Loan Fund the project would have failed. We could not have accomplished our project without the help of the loan."*

*President of the Board,  
Small Mutual Water System*

# Smart Management for Small Water Systems Project

Website: <http://efcnetwork.org/small-systems-project>

The Smart Management for Small Water Systems Project seeks to address major issues facing the nation's smallest drinking water systems (those serving 10,000 or fewer people). Our team of experts works with water systems across the country, US territories, and the Navajo Nation to address these issues, which range from asset management and rate setting to water loss detection and conservation, through training and technical assistance.

Small water systems can take advantage of training and resources through a variety of offerings including:

- In-Person Workshops
- One-on-one technical assistance
- Small Group sessions
- Funder forums
- Webinars
- eLearning Modules
- Water Rates Dashboards
- Blog Posts

The Smart Management for Small Water Systems project is a collaborative effort between the members of the Environmental Finance Center Network and its partner, the American Water Works Association. This project is made possible through a cooperative agreement with the U.S.

Environmental Protection Agency.

# Stakeholder Understanding and Support

## NRWA: Quality on Tap!

- Nationwide, Grassroots Campaign for Public Awareness
- Hands On Guide to Engagement and Communication for Better Community Support

### Quality On Tap!

"Quality On Tap - Our Commitment, Our Profession" is a nationwide, grassroots public relations and awareness campaign designed especially for the drinking water industry. QOT is intended to promote a positive image to the public, focusing on the safety of drinking water and the expertise of the technical professional who ensure water quality.

Americans often take for granted that they have the highest quality, most affordable, water piped directly to their homes and businesses. This level of quality is accomplished because of dedicated professionals that take pride in their hard work, their education, and their service to the community.

Quality On Tap! was created in 1996 as the first practical, hands-on guide to better public relations for water utilities. It contains the tools small water systems need to do the most important job of all - spreading the truth to the public of the quality of work they do and the quality water they produce. As communities nationwide use the QOT logo and materials to promote their own quality water, they are also promoting the quality water of each system that participates in this nationwide campaign.

## EPA: Talking to Your Decision Makers – A Best Practices Guide

- Role of Community Decision Makers in Small Systems
- Tips on How to Communicate Needs to Decision Makers

United States Environmental Protection Agency

### Talking To Your Decision Makers: A Best Practices Guide

Introduction	
Purpose	This Guide will help you better understand: <ul style="list-style-type: none"><li>• The role of the local individual(s) or group(s) that oversee and make decisions affecting your water system.</li><li>• The benefits of having a good relationship with decision makers.</li><li>• How to effectively communicate your needs to these decision makers.</li></ul>
Target Audience	This Guide is intended for operators and owners of community water systems serving fewer than 10,000 persons.

General Responsibilities of Decision Makers	
Decision makers can play a significant role in ensuring that your system is operating efficiently, that your needs are addressed, and that your customers understand the challenges you face and recognize the hard work that you do.	
Financial Responsibilities	<ul style="list-style-type: none"><li>• Review and approve annual budgets and monitor annual spending.</li><li>• Make financial decisions to ensure your system has sufficient funds to meet current and future needs.</li><li>• Acquire and approve financing for infrastructure repairs or upgrades.</li><li>• Acquire and approve financing to enhance system security.</li><li>• Acquire and set aside funding for operator training and certification.</li></ul>
Managerial Responsibilities	<ul style="list-style-type: none"><li>• Hire and supervise system staff.</li><li>• Set staff policy and job descriptions.</li><li>• Set and provide guidance on system policies.</li><li>• Determine the strategic vision and goals for the system.</li><li>• Resolve staff conflicts and address staff needs or complaints.</li></ul>
Communication	<ul style="list-style-type: none"><li>• Keep customers informed of the current status of the system, upcoming projects, rate setting, staffing changes, and any other key decisions.</li><li>• Serve as a liaison between system staff and the community.</li><li>• Ensure that the community is aware of the system's emergency response procedures.</li></ul>

For additional information:  
Call the Safe Drinking Water Hotline at 1-800-426-4791, visit the EPA Web site at [www.epa.gov/safewater/](http://www.epa.gov/safewater/), or contact your state drinking water representative.

**Challenges to Address:**

**Review Process:**

- ✓ Performance indicators or measures
- ✓ Status reports and updates frequency/cycle

**Other Notes:**

Rural and Small Systems Sustainable Management Action Plan Worksheet

Step 1: Have each **person** fill out their top three priority management areas from the Self Assessment exercise and then pick **one** to work on.

For Example...

## Priority Management Areas:

1. *Water Resource Adequacy*

2. *Product Quality*

3. *Financial Viability*  **Select One**

# Action Plan Worksheet

## **SUSTAINABLE MANAGEMENT ACTION PLAN WORKSHEET**

### Instructions:

- ✓ List your top three priority management areas – these should be drawn from the self-assessment activity.
- ✓ List the improvement actions that you will undertake to address the priority management areas – you should have at least one action for each priority management area (actions may address multiple management areas).
- ✓ Fill out the details in the table below for each improvement action separately (i.e., one table per action).

### Priority Management Areas:

- 1.
- 2.
- 3.

### Improvement Action:

#### Description:

- ✓ Action
- ✓ Management Area(s) addressed
- ✓ Objective(s)

#### Timeline:

- ✓ Start date
- ✓ Milestones
- ✓ Target completion date

#### Responsible Party (or Parties):

#### Relevant Resources (on-hand or needed):

#### Challenges to Address:

#### Review Process:

- ✓ Performance indicators or measures
- ✓ Status reports and updates frequency/cycle

#### Other Notes:

Step 2: Choose an action that you could take to make improvements in your selected Priority Management Area.

# For Example...

## Priority Management Areas:

1. *Water Resource Adequacy*
2. *Product Quality*
3. *Financial Viability*

**Improvement Action:** *Improve practices for reducing the number of outstanding bills*

# Action Plan Worksheet

## **SUSTAINABLE MANAGEMENT ACTION PLAN WORKSHEET**

### Instructions:

- ✓ List your top three priority management areas – these should be drawn from the self-assessment activity.
- ✓ List the improvement actions that you will undertake to address the priority management areas – you should have at least one action for each priority management area (actions may address multiple management areas).
- ✓ Fill out the details in the table below for each improvement action separately (i.e., one table per action).

### Priority Management Areas:

- 1.
- 2.
- 3.

#### Improvement Action:

##### Description:

- ✓ Action
- ✓ Management Area(s) addressed
- ✓ Objective(s)

##### Timeline:

- ✓ Start date
- ✓ Milestones
- ✓ Target completion date

##### Responsible Party (or Parties):

##### Relevant Resources (on-hand or needed):

##### Challenges to Address:

##### Review Process:

- ✓ Performance indicators or measures
- ✓ Status reports and updates frequency/cycle

##### Other Notes:

Step 3: Complete the fields below to describe what is needed to complete your “Improvement Action”

# For Example...

<b>Description:</b>	✓ Limit the carry-forward balance to a fixed amount and increase service deposits to discourage customers who move frequently or avoid paying their bills.
✓ Action	
✓ Management Area(s) addressed	✓ Financial Viability
✓ Objective(s)	✓ Reduce the amount of money lost to unpaid bills
<b>Timeline:</b>	✓ June 2013: Start -Draft new carry-forward balance allowance and new service deposit requirements for new customers
✓ Start date	
✓ Milestones	✓ July 2013: Propose and approve new balance and deposit requirements at board meeting
✓ Target completion date	August 2013: Notify customers of new requirements
	✓ September 2013: Completion - Implement new balance and deposit requirements

# For Example...

<b>Responsible Party (or Parties):</b>	✓ Bill Smith ✓ Jane Anderson
<b>Relevant Resources (on-hand or needed):</b>	✓ Example ordinance text created by other utilities to support the desired policy change
<b>Challenges to Address:</b>	✓ Public pressure on board members to reject rate increases
<b>Review Process:</b>	✓ Milestone dates met
✓ Performance indicators or measures	✓ Weekly progress checks with utility director relative to identified milestones
✓ Status reports and updates frequency/cycle	
<b>Other Notes:</b>	✓ Conduct calls with each board member to explain the need for the policy change and answer their questions

# Next Steps

Where do we go from here?

# Next Steps for Your Utility

- Next Steps for Judge Executive/Mayor/Board Member.
- Next Steps For Utility Manager/Superintendent.
- Next Steps For Operator.

# Next Steps for Utility Leadership

- Next Steps for Judge Executive/Mayor/Board Member
  - Share what you have learned with other board members or utility manager/operators
  - Consider hosting an free onsite training workshop for your on local board/utility.
    - Utility leadership
    - Board members
    - Utility managers
    - Utility operators

# Next Steps for Utility Manager

- Host free onsite utility workshop.
- Begin to implement your own workplan.

**WHAT'S NEXT?**

## NEXT STEPS FOR YOUR UTILITY

Now that you have completed the Sustainable Management of Rural and Small Systems Workshop, there are a number of important follow-up steps that your system should consider in moving forward. This should help you implement the kinds of changes in your operations based on the Self-Assessment you did at the workshop.

Approximate Timeframe	Recommended Activities
1-4 weeks after the workshop	<p>Hold a follow-up meeting within your system – include any utility managers or leaders from all departments at your utility, and/or other staff members who can help with sustainability-related activities. You can:</p> <ul style="list-style-type: none"><li>✓ Discuss results of Self-Assessment activity</li><li>✓ As necessary, run the Self-Assessment activity with them to supplement the work you accomplished during the workshop – you can make use of the team exercise Workshop in A Box materials available from USDA and EPA.</li><li>✓ Complete the preliminary Utility Improvement Plan Worksheet</li></ul> <p>Your workshop facilitator or technical assistance provider will contact you to see if you have questions or technical assistance needs as you move through the workshop materials, including help in completing the preliminary Improvement Plan Worksheet</p>
4-8 weeks after the workshop	<p><i>If they have not already been involved in the process up to this point – consider reaching out to utility board members and/or community leaders (e.g., city manager or mayor) whose roles relate to or influence utility operations.</i></p> <ul style="list-style-type: none"><li>✓ Explain the Workshop content and the results of the Self-Assessment</li><li>✓ If appropriate, run the Self-Assessment activity with them to supplement the work you accomplished during the workshop – you can make use of the team exercise Workshop in A Box materials available from USDA and EPA.</li><li>✓ Share your preliminary Utility Improvement Plan and modify the plan based on their feedback, as needed</li><li>✓ Gain any necessary approval needed to move forward with implementing the Utility Improvement Plan</li></ul> <p>Your workshop facilitator or technical assistance provider will follow up with you 3-4 weeks after your first check-in to see if you have any additional questions about the Improvement Plan or other workshop materials. If needed, a site visit or other meeting will be scheduled.</p>
8-12 weeks after the workshop	<p>Begin to implement the Utility Improvement Plan, based on timelines identified in Utility Improvement Plan worksheet.</p>

Tab 7 in your notebook

# Next Steps for Utility Operator

- Next Steps for Operator
  - Share what you have learned with your utility's other operators/manager.
  - Approach leadership about hosting a free onsite training workshop for your on local board/utility.
  - Apply the assessment process you just went through to address your own operational issues.
    - Identify your operational issues
    - Assess the issues (priority and performance)
    - Identify key area(s) to focus on
    - Develop and implement an action plan

# Feedback Session

*Please complete your evaluation forms.*

Thank you!

# Closing Comments

Thanks for coming!

# RESOURCES GUIDE FOR RURAL AND SMALL SYSTEMS

As a companion resource to the *Rural and Small Systems Guidebook to Sustainable Utility Management*, this list of resources offers additional information and guidance specific to small systems on the ten key management areas. Resources are identified in the table by the key management areas that they address (abbreviations in the table are identified in the key below). The majority of the resources listed are available free of charge.

WA	Water Resource Adequacy	FV	Financial Viability
PQ	Product Quality	OO	Operational Optimization

<b>Water &amp; Wastewater Pricing</b> <a href="http://water.epa.gov/infrastructure/sustain/Water-and-Wastewater-Pricing-Introduction.cfm">http://water.epa.gov/infrastructure/sustain/Water-and-Wastewater-Pricing-Introduction.cfm</a> <i>EPA Website on water and wastewater pricing, explaining the concept of pricing and water conservation, as well as supplying tools, guides, and reports on pricing.</i>						✓				
<b>Work for Water Website</b> <a href="http://www.workforwater.org/">http://www.workforwater.org/</a> <i>Materials to encourage careers in the water sector, where opportunities to protect and preserve water resources are virtually unlimited and the chance to make a difference is unmatched.</i>					✓					

# Elected County Officials Training Incentive Program Training Approval Request Form

Training Approval Requested By: Lindel Ormsbee

Title: Director Agency: KWRR

Phone: (859) 257-1299 E-mail: Lindell.Ormsbee@uky.edu

**Requester:** Please complete both pages of this form, attach a copy of the detailed agenda that lists the start and end times of all training sessions while also indicating any breaks that may be given and submit to: Department for Local Government, 1024 Capital Center Drive, Suite 340, Frankfort, KY 40601  
Phone: 800-346-5606 Fax: 502-573-3712 E-mail: scott.sharp@ky.gov

## Training Event Information

Training Title: Sustainable Management of Rural and Small Systems Workshop

Training Provider: Kentucky Water Resources Research Institute and National Environmental Services Center WVU

Contact Name: Lindell Ormsbee Title: Director

Phone: (859) 257-1299 E-mail: Lindell.Ormsbee@uky.edu

Fax: (859) 323-1049 Website: www.uky.edu/waterresources/

Training Intended For:  *Fiscal Court*  *County Clerk*  *Sheriff*  *Jailer*  *All*

Registration Fees:  *Yes: Dollar Amount:* \$ \_\_\_\_\_  *No*

Enrollment Limitations:  *Yes: Maximum Enrollment:* # \_\_\_\_\_ 40  *No*

Proof of Attendance:  *Individual POA Form*  *Sign-In/Out Sheets*  *Individual Certificate*

**Training Dates with Locations:**

September 14, 2017 KRADD Conference Center, Hazard, KY  
Timed agenda in attachment

**FOR DLG USE ONLY**

Approved By: \_\_\_\_\_ Date: \_\_\_\_\_ Hours: \_\_\_\_\_

Denied By: \_\_\_\_\_ Date: \_\_\_\_\_

**Elected County Officials Training Incentive Program Training Approval Request Form**  
**Page Two**

**Training Title:** Sustainable Management of Rural and Small Systems **Provider:** KWRRRI and NESC

**Has this training been specifically designed for Kentucky's elected county officials?**       Yes       No

**Describe the learning objectives and how the content pertains to improving job knowledge or skills.**

The workshop is targeted to participants who are involved in the operation and management of drinking water or wastewater systems that serve 4,000 or fewer customers. Small system managers, operators, and board members are invited to attend along with local decision makers such as mayors, county judge executives, and commissioners. The workshop demonstrates a simple way to assess system strengths and weaknesses and develop a management plan for improving operations. The workshop focuses on 10 key management areas including: 1) water resource adequacy, 2) product quality, 3) customer satisfaction, 4) community sustainability and economic development, 5) employee and leadership development, 6) financial viability, 7) operational optimization, 8) infrastructure stability, 9) operational resiliency, and 10) stakeholder understanding and support. In addition to the general workshop agenda as developed by EPA and USDA, speakers from the Kentucky Division for Compliance Assistance, the Kentucky Rural Community Assistance Partnership, and the Kentucky Infrastructure Authority will make presentations regarding resources and programs available through their agencies.

**List Trainers and their Titles/Qualifications (attach short Bio's if necessary):**

Lindell Ormsbee, Professor, Department of Civil Engineering, University of Kentucky  
Katherine Garvey, Director, West Virginia University Land Use and Sustainable Development Law Clinic  
  
short bios in attachment

**Describe any training materials that will be provided to the trainees:**

Each participant will receive a notebook including all slides used in the presentations, worksheets for the various exercises, and contact information for sources of information and assistance.

**Is this training a requirement for County Officials? ( If Yes check applicable officials)**       Yes       No

- Fiscal Court       County Clerk       Sheriff       Jailer       All

**List corresponding KRS, KAR or other requiring entity:**

Approval has been granted by the Kentucky Division of Compliance Assistance for 6.0 hours of CEUs for drinking water and wastewater operators. We have also requested approval from the Public Service Commission for continuing education credit as management training for commissioners of water districts, combined water/gas/sewer districts, or water commissions as referenced in 807 KAR 5:070

*Attach detailed agenda to email prior to sending*

# SUSTAINABLE MANAGEMENT OF RURAL AND SMALL SYSTEMS WORKSHOP AGENDA

---

September 14, 2017

KRADD Conference Center, Hazard, Kentucky

8:30 am – 4:30 pm

**FACILITATOR(S):** Lindell Ormsbee, Professor, University of Kentucky, Department of Civil Engineering

**SPEAKER:** Katherine Garvey, Director, WVU Land Use and Sustainable Development Law Clinic

Time	Session
8:30	<b>Sign-in/Registration (30 minutes)</b>
9:00	<b>Introductions and Workshop Objectives (15 minutes)</b> Lindell Ormsbee, Director KWRRRI
9:15	<b>Session 1: Overview of Key Management Areas – Presentation (30 minutes)</b> [Katherine] <ul style="list-style-type: none"><li>• Presentation of Key Management Areas</li><li>• Group Discussion: Other Important Management Areas for Sustainability</li></ul>
9:45	<b>Session 2: Utility ‘Self Assessment’ Exercise (55 minutes)</b> [Lindell] <ul style="list-style-type: none"><li>• Explain “Sustainable Management Self Assessment” (5 minutes)</li><li>• Participants Conduct Self Assessment (20 minutes)<ul style="list-style-type: none"><li>○ Rate utility achievements and rank management priorities</li><li>○ Where is your utility strong? Why?</li><li>○ Where is there the most room for improvement? Why?</li></ul></li><li>• Explain Plotting of Results: achievements vs. priorities (5 minutes)<ul style="list-style-type: none"><li>○ Plot Results (20 minutes)</li><li>○ What are your areas of focus (high priority and low performance)?<ul style="list-style-type: none"><li>▪ Why are they a priority?</li><li>▪ Why is performance low?<ul style="list-style-type: none"><li>• Technical capacity?</li><li>• Financial capacity?</li><li>• Managerial capacity?</li></ul></li></ul></li></ul></li><li>• What are the commonalities and differences among table participants’ achievements, priorities, and challenges? (5 minutes)</li></ul>

- 10:40 Break (15 minutes)**
- 10:55 Session 3: Plenary Discussion – Self Assessment Results (1 hour)**
- Tables Report Out (30 minutes) [Katherine]
  - Chris Wells – Overview of RCAP (20 minutes)
  - Synthesize Results by Plotting Entire Group (10 minutes) [Lindell]
- 11:55 Working Lunch (1 hour) Discussion of Group Plotting  
(plus Paulette Akers, KYDOCA; Greg Copley, CAER)**
- 12:55 Session 4: Improving Outcomes (50 minutes)**
- Tips from previous Improving Outcomes Exercises [Katherine]
  - Each participant completes an improvement worksheet for one low achievement/high priority management area (30 minutes) [Lindell]
  - Discussion Questions:
    - What will constitute “high achievement” in this management area?
    - What changes will the utility need to make to improve performance?
    - How could you track your performance progress?
    - What will be the biggest challenges to performance improvement?
  - Participants share improvement worksheet results at their tables (10 minutes)
- 1:45 Session 5: Plenary Discussion – Practices, Tools, and Measures: Results (30 minutes)**
- Tables Report Out [Katherine]
  - General Discussion of Findings [Katherine]
- 2:15 Break (15 minutes)**
- 2:30 Session 6: Tools, Guides and Other Resources (40 minutes) [Katherine]**
- Presentation of Additional Tools, Guides and Other Resources
  - Jocelyn Gross – Overview of KIA
- 3:10 Session 7: Creating an Action Plan (40 minutes) [Lindell]**
- Discuss Utility Management Improvement Plan
  - Complete a Sustainable Management Action Plan Worksheet
- 3:50 Session 8: Sharing Success Stories (20 minutes) [Katherine]**
- 4:10 Session 9: Next Steps (10 minutes) [Lindell]**
- 4:20 Session 10: Feedback Session (10 minutes) [Jeanne]**
- Participants Complete Workshop Evaluation Form
- 4:30 Adjourn**

#### **Education**

Ph.D. Purdue University, 1983

M.S. Virginia Polytechnic Institute and State University, 1979

B.S.C.E. University of Kentucky, 1978

#### **Professional Registration**

Professional Engineer, State of Kentucky

Professional Hydrologist, American Institute of Hydrology

Diplomate, American Academy of Water Resource Engineers

#### **Professional Employment**

2010 - Present: Director, Kentucky Center of Excellence for Watershed Management

2009 - Present: Associate Director, University of Kentucky Superfund Research Center

2005 - Present: Director, Research Translation Core, UK Superfund Research Center

2004 - Present: Director, Kentucky Water 2004 - Present Resources Research Institute

2003 - Present: Raymond Blythe Professor of Civil Engineering

2003 - 2009: Director. Kentucky Research Consortium for Energy and the Environment

2000 - 2006: Director, Eastern Kentucky PRIDE Water Quality Assessment Program

2000 - 2003: Associate Director, Kentucky Water Resources Research Institute

2000 - 2002: Interim Director, Tracy Farmer Center for the Environment

1999 - Present: Kentucky River Basin Coordinator

1998 - 1999: Acting Director, Kentucky Water Resources Research Institute

1997: Visiting Researcher - Kentucky Environmental Protection Agency

1995 - 1998: Associate Director, Kentucky Water Resources Research Institute

1996 - 2003: Professor of Civil Engineering, University of Kentucky

1989 - 1996: Associate Professor of Civil Engineering, University of Kentucky

1983 - 1989: Assistant Professor of Civil Engineering, University of Kentucky

1979 - 1981: Project Engineer, Howard K. Bell Consulting Engineers, Lexington, KY

## **Research Interest and Expertise**

Dr. Ormsbee is the Raymond-Blythe Professor of civil engineering at the University of Kentucky. Since joining the faculty of the University of Kentucky in 1983, Dr. Ormsbee has been actively engaged in research, teaching, and consulting in water resources and environmental engineering and has published more than 250 technical papers and reports on various topics in this field. In addition to serving on numerous international, national, and state committees, Dr. Ormsbee has spoken to hundreds of audiences at various technical conferences and other meetings across the United States as well as overseas.

Dr. Ormsbee currently serves as the director of the Kentucky Water Research Institute, the Kentucky Center of Excellence for Watershed Management as well as the associate director of the UK Superfund Research Center. In the past he has served in several other research administrative capacities including, Director of the Kentucky Research Consortium for Energy and Environment (03-09), Director of the Tracy Farmer Center for the Environment (02-03), Director of the UK-PRIDE Water Quality Assessment Program (00-06), the Chair of the Kentucky Environmental Quality Commission (04-06), and the Chair of the Scientific Advisory Board of the Kentucky Watershed Watch Program (04-09). From 1985 to 1998 he served in various capacities in the Kentucky Section of the American Society of Civil Engineering, culminating as president in 1998. In 2003 he served as Chair of the EWRI-ASCE Council on Emerging and Innovative Technologies and in 2004 he was elected Vice-President of the American Institute of Hydrology. In 2008, Dr. Ormsbee served on a BOSC technical review committee for the EPA Homeland Security Program.

Dr. Ormsbee's current research efforts are directed toward the application of systems analysis methods to complex problems in water resources and environmental systems. Over the last 30 years, Dr. Ormsbee has directly managed (as either a PI or Co-PI) over 21 million dollars in external contracts from such agencies as the National Science Foundation, the U.S. Geological Survey, the U.S. Army Corp of Engineers, the U.S. Department of Energy, the National Institutes of Environmental Health Sciences, the U.S. Environmental Protection Agency, and the US Department of Homeland Security. He has also served on several multidisciplinary research teams that have brought in an additional 29 million dollars in external research funding.

## **Professional Service Activities**

1998 - Present: Director, Watershed Management Program, Kentucky River Authority

1998 - Present: Scientific Advisor, Kentucky River Watershed Watch

2003 - 2007: Chair, Kentucky Environmental Quality Commission

2004 - 2006: Chair, Scientific Advisory Board, Inter-basin Coordinating Committee, Kentucky Watershed Watch

2004 - 2005: Member, Governor's Task Force on Blackwater Issues

2004: Vice President for Academic Affairs, American Institute of Hydrology

2003 - 2004: Chair, EWRI Emerging and Innovative Technologies Council

2002: Chair, Nuclear Subcommittee, Governor's Energy Policy Board

1997-1998: President, Kentucky Section of ASCE

1995: Chair, AWWA International Computer Conference.

1991 - 1992: President, Bluegrass Chapter of Kentucky Section of ASCE

## **Katherine Garvey, J.D., LL.M.**

Contact Information: WVU College of Law, P.O. Box 6130, Morgantown WV 26506-6130; (304) 293-8288;  
katherine.garvey@mail.wvu.edu

### **Education / Academic Credentials**

Vermont Law School, LL.M. 2010, *cum laude*, Environmental Law  
University of Missouri-Kansas City School of Law, J.D. 2004  
Webster University, B.S. 2000, Business Management  
La Universidad de los Andes, Bogotá, Colombia, 01/98-12/98, Spanish and Economics

### **Professional / Academic Experience**

- Courses Taught: Land Use and Sustainable Development Law Clinic, Environmental Law, Environmental Advocacy & Writing, Introduction to Environmental Law
- Research Interests: Environmental regulation at the local level, source water protection
- Grants: Legal Education to Address Neglected Properties (2014), Hardy County Source Water Protection (2014)

### **International Experience**

- 17th session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, Representative for Vermont Law School.
- World Summit on Sustainable Development 2002, Johannesburg, South Africa, Representative for the National Association of Environmental Law Schools.
- EnviroLaw Solutions Conference 2002, Durban, South Africa.
- Internship at FUNDEA, Caracas Venezuela, worked on conservation contracts, Summer 2003.
- Proficient in Spanish, lived 2.5 years in Latin America. Passed el Examen de Admisión de Estudios Posgraduados (Spanish version of the GRE) with above average score.

### **Professional Affiliations – Associations – Service & Outreach**

- Board Member, Northern Brownfields Assistance Center
- Member, American Bar Association
- Member of the Bar, West Virginia, Vermont and Missouri
- Liaison, New River Clean Water Alliance

### **Awards and Honors**

- Solid Waste Management Award, American Public Works Association (2006) for development of a solid waste management plan and funding for a hazardous waste management and recycling facility

### **Selected Publications**

- *Investing in Green Infrastructure for Source Water Protection*, Chapter 1, World Resources Institute (2014).
- *Legal Consequences of Adopting New Floodplain Maps in New Hampshire*, 43 *Envtl. L. Rptr.* 10564 (2013).

- *Local Protection of Natural Resources after Jam Golf: Standards and Standard of Review*, 11 Vt. J. Env'tl. L. 145 (2009).

### **Selected Presentations**

- *Game Changers: Land Banks and On-Site Citations*, Continuing Legal Education, Charleston WV (May 2015).
- *Client-centered Lawyering in a Rural Communities*, 14<sup>th</sup> Annual Transactional Clinical Conference, Kansas City, MO. (April 2015).
- *Utilizing Resilient Land Use Planning Concepts to Protect Local Source Water*, 2015 Water Resources Conference of the Virginias, Roanoke, WV, October 6, 2015
- *Policy, Law & Biofuels*, Bioproducts Master Teacher Training Workshop, July 11, 2013
- *Fayette County Dilapidated Buildings Strategy Session*, April 29th, 2015
- *An Introduction to Legal Issues Affecting Neglected Properties*, Community Leadership Academy, Morgantown, WV, October 27, 2015
- *Morgantown Utility Board's Source Water Protection Plan*, Initial Meeting, January 21, 2015
- *Navigating the Ordinance and Enforcement Maze*, Property Rescue Initiative Information Workshop, Montgomery, WV, October 9, 2015
- *The View from 10,000 Feet Up- Voluntary Initiatives and Government Regulations*, Spring 2013 Mountain State Land Use Academy, Pipestem WV May 5, 2013
- *Mapping and Legal Implications of Future Flooding in the Lamprey River Watershed of New Hampshire Due to Changes in Land Use and Climate*, The Coastal Society Conference, Miami FL, Jun 2012).

### **Courses Taught**

Environmental Law, Introduction to Environmental Law, Environmental Communication, Introduction to Business Law, Land Use Clinic, Land Use and Sustainable Development Law Clinic, Torts, Legal Writing I

### **Grants**

- Property Rescue Initiative, Technical Assistance to Address Legal Issues related to Dilapidated Properties December 2015
- Benedum Foundation, West Virginia Legal Education to Address Abandoned and Neglected Properties, July 2014
- Hardy County and the Potomac Valley Conservation District, Hardy County Source Water Protection and Ordinance Review, April 2015.

Certification and Licensing Branch  
Operator Certification Program  
300 Fair Oaks Ln.  
Frankfort, KY 40601**

**Continuing Education Activity Report**

Division of Compliance Assistance's Assigned Course Number: 16937

Course Title: Sustainable Management of Rural and Small Systems

Course Location: KRADD Conference Center Date(s): September 14, 2017

Course Sponsor's Name and Phone Number: Kentucky Water Resources Research Institute - UK

Agency Interest Number for Course Sponsor: 133858

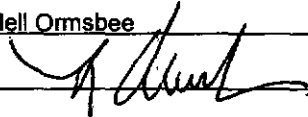

Participants' Information (Operator certificates contain identification information requested below.):

Agency Interest Number	Operator's Name (as shown on certification)	* Operator's Certification Number(s) (where credit is to be applied)		Continuing Education Credit Earned (to be completed by sponsor)
		DW (Distribution, Treatment, and Bottled Water)	WW (Collection and Treatment)	** Continuing Education Hours Earned
12688	Jamie Bowling	17062		6
26133	Gary Paul Daniel	15207		6
28658	James Hopkins	12801 17167		6
29549	Christopher C. Caudill	12618 12696	19060 16880	6
30136	Randy Daniel	15217		6
30159	Arnold Barker	15199		6
49338	Vernon Anderton	29677		6
50689	Keith Pelphrey	15208		6
51270	Thomas Eddie Baker	17276 13762		6

\* Provide certification numbers for Drinking Water Treatment, Drinking Water Distribution, Bottled Water, Wastewater Treatment or Collection System.  
\*\* Calculate Continuing Education Hours as approved by the Division of Compliance Assistance.

As sponsor of the training completed by the operators listed above, I certify it was conducted and participants performed according to conditions approved by the Kentucky Certification Boards. I understand that submission of false information could result in expiration of an operator's certification due to noncredit and might be cause for non-approval of subsequent training requests. Further, falsification of a cabinet document could result in legal penalties per KRS 223.991 and/or 224.99-010.
