CLASSIFICATION OF SERVICE

RATES SCHEDULE NM-NET METERING

AVAILABILITY OF NET METERING SERVICE

Net Metering is available to eligible member-generators in Salt River Electric Cooperative Corporation's service territory, upon request, and on a first-come, first-served basis up to a cumulative capacity of one percent (1%) of the Salt River Electric's single hour peak load during the previous year. If the cumulative generating capacity of net metering systems reaches 1% of a supplier's single hour peak load during the previous year, upon Commission approval, Salt River Electric's obligation to offer net metering to a new member-generator may be limited. An eligible member-generator shall mean a member retail electric member of Salt River Electric with a generating facility that:

- 1) Generates electricity using solar energy, wind energy, biomass or biogas energy, or hydro energy;
- 2) Has a rated capacity of not greater than thirty (30) kilowatts;
- 3) Is located on the member's premises;
- 4) Is owned and operated by the member;
- 5) Is connected in parallel with Salt River Electric's electric distribution system; and
- 6) Has the primary purpose of supplying all or part of the member's own electricity requirements.

At its sole discretion, Salt River Electric may provide Net Metering to other member-generators not meeting all the conditions listed above on a case-by-case basis.
