RULES AND REGULATIONS

E. ELECTRIC BILLS (Continued)

25. BILLING ADJUSTMENTS TO STANDARD PERIODS

The first and final billing of an account for which less than the minimum amount of KWH are used shall be pro-rated based on KWH and time actually used. This pro-ration does not apply to demand charges and is not applicable if more than the minimum allowable KWH for a minimum bill is used.

26. DEPOSITS

1. A deposit approximately equal to two times the average monthly bill may be required of any member before service is supplied if the Cooperative deems it necessary to insure payment for the service it will render. The Cooperative may, at its own option, return the deposit after six (6) months. Upon termination of service, deposit may be applied against unpaid bills of the member, and, if any balance remains after such application is made, said balance to be refunded to the member.
2. Interest will accrue at the rate of 6% per annum on any deposit. Upon termination of service any accumulated interest will be applied against unpaid bills of the member, and if any balance remains after such application is made, said balance will be paid to the member.
3. The Cooperative will issue to every member from whom a deposit is received a certificate of deposit, showing the name of the customer, location of initial premises occupied, date and amount of the deposit.

27. PURPOSE OF CLASSIFICATION

Classification is a means for treating without discrimination, all members having similar characteristics in their use of service. Special classification will be avoided unless surrounding conditions are so unusual that to apply one of the existing rates or rules would result in serious injustice to either the particular member or to all other members.

RULES AND REGULATIONS

F. LINE EXTENSIONS (Continued)

30. UNDERGROUND EXTENSIONS

The Cooperative will install underground distribution lines to a residential subdivision under the following conditions:

1. The subdivision being developed must consist of a tract of line which is divided into ten (10) or more lots for the construction of new residential buildings or the land on which is constructed two (2) or more new multiple occupancy buildings (refer to PSC Electric Rules, Appendix A for definitions of terms).
2. Developer or owner of subdivision shall be required to advance to the Cooperative a non-refundable payment in an amount equal to an "estimated average cost differential", if any, between the average or representative cost of underground distribution systems in residential subdivisions and of equivalent overhead distribution systems within the utility service areas. If the applicant is required to deposit the entire estimated cost of the extension, the amount in excess of the normal charge for underground extensions shall be refunded to the applicant over a ten (10) year period as provided in Public Service Commission 807 KAR 2:050, Section 10.
3. The Cooperative will construct underground distribution facilities in the subdivision adequate to render single-phase 120/240 volt service.
4. Three phase primary mains or feeders required within a subdivision to supply local distribution or to serve individual three phase loads may be overhead unless underground is required by governmental authorities or chosen by applicant, in either of which case the differential cost of underground shall be born by the applicant.
5. Developer or successor in title shall grant a right-of-way satisfactory to the Cooperative for the installation, operation and maintenance of its underground facilities.
6. If developer provides and installs the secondary service lines to the residence from service pedestal located on easement, the Cooperative shall give the applicant credit in computing the entire estimated cost of the extension for \$50.00 (Fifty Dollars) or the equivalent cost of

RULES AND REGULATIONS

F. LINE EXTENSIONS (Continued)

30. UNDERGROUND EXTENSIONS (Continued)

- 6. an overhead service line to the applicant's meter base, whichever is greater and only the difference after giving such credit will be required as a deposit. Service lines to house (provided by developer) shall be installed and ready for inspection at the same time as the residence. Trench is to be left open until inspection has been made. If the Cooperative provides secondary service lines, applicant shall pay the "estimated average cost differential" between overhead and underground service.
- 7. The requirements as to wiring specifications of the utility and those of any regulatory body having jurisdiction must be followed. The Cooperative's Rates, Rules and Regulations for furnishing electric service apply in the case of underground service and overhead service alike.
- 8. A copy of the current cost differential will be kept on file in the Cooperative's office at all times. (File annually with Commission).

31. UNMETERED SERVICES

Certain installations may be unmetered and be billed a set monthly rate. These are to be installations that the monthly usage is fairly constant. These services, more specifically are: cable TV amplifiers, railroad crossing signals, etc, that cause great difficulty in maintaining metering equipment.
