

CITY OF MAYSVILLE
COMMONWEALTH OF KENTUCKY
RESOLUTION NO. 96-1

A RESOLUTION APPROVING CONTRACT FOR THE SALE OF WATER TO
WESTERN MASON WATER DISTRICT.

BE IT RESOLVED BY THE CITY OF MAYSVILLE, KENTUCKY, that a Contract with
Western Mason Water District to purchase water from Maysville Utility Commission
is hereby approved and the Mayor is authorized and directed to execute such
Contract on behalf of the City of Maysville.

James R. Litton, Mayor

Introduced and Adopted: 11 January 1996
Signed by Mayor: 12 January 1996
Recorded by Clerk: 12 January 1996

ATTEST:

Sharon A. Swisher, City Clerk

WATER PURCHASE CONTRACT

THIS CONTRACT for the sale and purchase of water is entered into as of 19th
February, 1996, between the City of Maysville, 216 Bridge Street,
Maysville, Kentucky 41056, hereinafter referred to as the "SELLER", and Western
Mason Water District, Route 1, Dover, Kentucky 41034, hereinafter referred to as the
"PURCHASER",

WHEREAS, WITNESSETH: the Purchaser desires to increase the supply of water
available to its users by construction of a water supply transmission system from the
Seller's system to the Purchaser's system and to accomplish this purpose, the
Purchaser will require a supply of treated water, and

WHEREAS, the Seller owns and operates a water supply distribution system with a
capacity currently capable of serving the present customers of the Seller's system
and the estimated supplemental water needs to be required by the said Purchaser,
and

WHEREAS, by Resolution No. 96-1 enacted by the Board of Commissioners of
Seller on 10 January 1996, the sale of water to the Purchaser in accordance with the
provisions of this Contract was approved, and the execution of this Contract by the
Mayor on behalf of Seller to carry out said Resolution was duly authorized, and

WHEREAS, by Resolution of the Board of Commissioners of the Purchaser, enacted on 15 January 1996, the purchase of water from the Seller in accordance with the terms set forth in this Contract was approved, and the execution of this Contract by the Chairman on behalf of Purchaser was duly authorized,

NOW THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth:

A. The Seller Agrees:

(1) (Quality and Quantity) To furnish the Purchaser at the Point of Delivery specified in paragraph (2) below, during the term of this Contract or any renewal or extension hereof, potable treated water meeting applicable purity standards of the Commonwealth of Kentucky as defined by KRS 224.032 and in accordance with the Kentucky Public and Semi Public Water Supplies Regulations (KAR, Title 401, Chapter 6) in such quantity as may be required by the Purchaser at a minimum of 25,000 gallons per day and not to exceed 100,000 gallons per day.

(2) (Point of Delivery and Pressure) The water will be furnished from an existing twelve inch main supply at a point located on Highway 9 approximately 120 feet left of AA Highway station 192+85 (Highway 9) (hereinafter the "Point of Delivery"). Emergency failures of pressure or supply due to main supply line breaks, power failure, flood, fire, use of water to fight fire, earthquake or other catastrophe shall

excuse the Seller from the provisions concerning pressure and supply for such reasonable period of time as may be necessary to restore service.

(3) (Metering and Equipment) To operate and maintain at its own expense at the Point of Delivery on Highway 9, the necessary metering equipment, including a meter house or pit and required devices of standard type for properly measuring the quantity of water delivered to the Purchaser. Seller will calibrate such metering equipment whenever requested by the Purchaser but not more frequently than once every twelve months. A meter registering not more than two percent above or below the test result shall be deemed to be accurate. The previous readings of any meter disclosed by test to be inaccurate shall be corrected for the six months previous to such test in accordance with the percentage of inaccuracy found by such tests. If any meter fails to register for any period, the amount of water furnished during such period shall be deemed to be the amount of water delivered in the corresponding period immediately prior to the failure, unless Seller and Purchaser shall agree upon a different amount. The metering equipment shall be read on the first day of each month. An appropriate official of the Purchaser at all reasonable times shall have access to the meter for the purpose of verifying its readings.

B. The Purchaser Agrees to install the necessary metering equipment required under Paragraph (A)(3) and to initially calibrate same, and to pay the Seller, not later than the 15th day of each month, for all water delivered, but not less than 25,000 gallons per day, at the rate of one dollar thirty-five and twenty four hundredths cents (\$1.3524) per 1,000 gallons.

C. It is further mutually agreed between the Seller and the Purchaser as follows:

(1) (Term of Contract) That the initial term of this Contract shall commence upon complete execution hereof and shall extend for the useful life of said water supply transmission system, hereby agreed to be forty years from the date of initial delivery of any water as shown by the first bill submitted by the Seller to the Purchaser. Provided, that Purchaser's right to purchase water under this Contract after the initial term hereof shall be renewed or extended at the option of the Purchaser. Purchaser's option may be exercised by written notice delivered to the other party during the final full calendar year of the initial term of this Contract, or at any time thereafter within one year after written interrogation by Seller as to such renewal or extension. If Purchaser fails to exercise its option, then its right hereunder shall be deemed automatically renewed and extended year by year pending its timely answer to such interrogation from Seller.

(2) (Notice of Progress and Initial Delivery of Water) That the Purchaser will regularly, and upon reasonable request, advise the Seller of the Purchaser's progress in financing and constructing the transmission system, and thirty days prior to the estimated date of completion of construction of the Purchaser's water supply distribution system, the Purchaser will notify the Seller in writing the date for the initial delivery of water.

(3) (Water for Testing) That when requested by the Purchaser, the Seller will make available to the Contractor at the Point of Delivery, or other point reasonably close thereto, water sufficient for testing, flushing, and trench-filling the system of the Purchaser during construction, irrespective of whether the metering equipment has been installed at that time, at a flat charge of one dollar thirty-five and twenty four hundreds cents (\$1.3524) per 1,000 gallons which will be paid by the contractor or, upon his failure to pay, by the Purchaser.

(4) (Failure to Deliver) That the Seller will, at all times, operate and maintain its system in an efficient manner and will take such action as may be reasonably necessary to furnish the Purchaser with quantities of water required by the Purchaser within the limitations of paragraph A (1). Temporary or partial failures to deliver water shall be remedied with all possible dispatch. In the event of an extended shortage of water, or the supply of water available to the Seller is otherwise diminished over an extended period of time, the supply of water to the Purchaser shall be reduced or diminished in the same ratio or proportion as the supply to Seller's other consumers is reduced or diminished.

(5) (Modification of Contract) That the provisions of this Contract pertaining to the rate to be paid by Purchaser for water purchased, and for water used pursuant to paragraph C(3), shall be subject to modification as deemed reasonably necessary by Seller. Provided, that any increase or decrease in rates shall be only in conjunction with a rate adjustment for large volume customers (defined as usage over 50,000

gallons per month). Other provisions of this Contract may be modified or altered by mutual agreement in writing.

(6) (Regulatory Agencies) That this Contract is subject to applicable laws and regulations. The parties will cooperate in obtaining such permits, certificates, and similar authority required to comply with applicable laws and regulations.

(7) (Successors) That in the event of any occurrence rendering either party incapable of performing under this Contract, any successor of such party, whether the result of legal process, assignment, or otherwise, shall succeed to the rights and duties of such party hereunder.

(8) (Miscellaneous) That the construction of the water supply distribution system by the Purchaser is being financed by a loan made or insured by, and/or a grant from the United States Department of Agriculture, and the provisions of this Contract pertaining to the undertakings of the Purchaser are conditioned upon the approval, in writing, of the United States Department of Agriculture. Purchaser's rights under this Contract are hereby pledged and assigned to the United States Department of Agriculture as security for its said loan to Purchaser.

(9) (Prior Agreements) That this Contract represents the agreement between Seller and Purchaser in its entirety.

IN WITNESS WHEREOF, the parties hereto, acting under authority of their respective governing bodies, have caused this Contract to be duly executed by duly authorized officers in four counterparts, each of which shall constitute an original.
