Mr. Mike Sanchez, Plant Manager E.I. DuPont De Nemours & Company, Inc. 4200 Camp Ground Road Louisville, Kentucky 40216 PUBLIC SERVICE COMMISSION Louisville Gas and Electric Company State Regulation and Rates 220 West Main Street PO Box 32010 Louisville, Kentucky 40232 www.eon-us.com

Robert M. Conroy Director - Rates T 502-627-3324 F 502-627-3213 robert.conroy@eon-us.com

April 17, 2008

Dear Mr. Sanchez:

As a result of an order issued in LG&E's Environmental Surcharge Mechanism Review in Case No. 2007-00380 dated March 28, 2008, the Kentucky Public Service Commission authorized a roll-in of a portion of the current ECR factor into existing base rates, including the rates contained in the power contract dated August 9, 1962, between LG&E and DuPont. The roll-in results in a decrease in the demand charge beginning with bills rendered on and after the first billing cycle of May 2008. The roll-in also results in a corresponding decrease in the monthly Environmental Cost Recovery factor.

The rates contained in the power contract dated August 9, 1962, as heretofore amended and modified, are set forth below:

Demand Charge - \$11.67 per Kw of billing demand per month

Energy Charge - 2.379¢ Per Kwh

Fuel Clause is set forth on the enclosed Exhibit 1.

All other provisions of your contract, not specifically mentioned herein, remain the same as those in effect prior to the date of the Commission's Order, and all other Tariffs and Riders applicable to this contract will continue to apply.

If you have any further questions regarding this matter, please contact me.

Sincerely,

Robert M. Conroy

SECTION 9 (1)

Executive Director

### EXHIBIT I

#### Fuel Clause

Applicable: In all territory service. This schedule is a mandatory rider to all electric rate schedules.

(1) The monthly amount computed under each of the rate schedules to which this fuel clause is applicable shall be increased or decreased at a rate per kilowatt-hour of monthly consumption in accordance with the following formula:

Adjustment Factor =  $F/S - 1.703 e^*$ 

Where F is the expense of fuel in the second preceding month and S is the sales in the second preceding month, as defined below:

- (2) Fuel costs (F) shall be the cost of:
  - (a) Fossil fuel consumed in the Company's plants plus the cost of fuel which would have been used in plants suffering forced generation or transmission outages, but less the cost of fuel related to substitute generation, plus
  - (b) The actual identifiable fossil and nuclear fuel costs associated with energy purchased for reasons other than identified in paragraph (c) below, but excluding the cost of fuel related to purchases to substitute for the forced outages, plus
  - (c) The net energy cost of energy purchases, exclusive of capacity or demand charges (irrespective of the designation assigned to such transaction) when such energy is purchased on an economic dispatch basis. Included therein are such costs as the charges for economy energy purchases and the charges as a result of scheduled outage, all such kinds of energy being purchased by Company to substitute for its own higher cost energy, and less
  - (d) The cost of fossil fuel recovered through inter-system sales including the fuel costs related to economy energy sales and other energy sold on an economic dispatch basis.
  - (e) All fuel costs shall be based on weighted average inventory costing. The cost of fossil fuel shall include no items other than the invoice price of fuel less any cash or other discounts. The invoice price of fuel includes the cost of the fuel itself and necessary charges for transportation of fuel from the point of acquisition to the unloading point, as listed in Account 151 of the FERC Uniform System of Accounts for Public Utilities and Licensees.
  - (f) As used herein, the term "forced outages" means all nonscheduled losses of generation or transmission which require substitute power for a continuous period in excess of six hours. Where forced outages are not as a result of faulty equipment, faulty manufacture, faulty design, faulty installations, faulty operation, or faulty maintenance, but are Acts of God, riot, insurrection or acts of the public enemy, then the Company may, upon proper showing, with the approval of the Commission, include the fuel cost of substitute energy in the adjustment.
  - Sales (S) shall be determined in kilowatt-hours as follows:

Add:

- (a) net generation
- (b) purchases
- (c) interchange-in

#### Subtract:

- (d) inter-system sales including economy energy and other energy sold of the total of the system sales including economy energy and other energy sold of the total of the system sales including economy energy and other energy sold of the total of the system sales including economy energy and other energy sold of the total of the system sales including economy energy and other energy sold of the total of the system sales including economy energy and other energy sold of the total of the system sales including economy energy and other energy sold of the system sales including economy energy and other energy sold of the system sales including economy energy and other energy sold of the system sales including economy energy and other energy sold of the system sales including economy energy and other energy sold of the system sales including economy energy and other energy economic econo dispatch basis
- (e) total system losses

Pursuant to the Public Service Commission's Order in Case No. 2006-00510 dated October 31. 2007, the Fuel Adjustment Clause will become effective with bills billing cycle of December 2007.
