RULES AND REGULATIONS

*C*  
*11/7/2010*  
AA. ~~Fire Departments~~. For the purpose of off-setting fifty percent or more of its operation expenses, any fire department not receiving public funds from the Commonwealth of Kentucky, or any political subdivision thereof, may withdraw water from the utility's facilities at no charge, for the extinguishing of fires or the training of firemen. A fire department making such withdrawals shall provide an estimate of its withdrawals to the utility at the end of each month.

AB. Provisions for Standard Service, Non-Standard Service and Fire Protection:

Standard Service (Standard Water Tap)

1. Based on information provided by the customer, the standard size for a water tap shall be established by the district. Each customer's meter shall be properly sized to measure all water usage of the customer as determined by the utility. The meter installation cost to meet the standard service size for each customer shall be paid for by each customer at the district's established connection fee for the meter size required and as approved by the Public Service Commission.
2. Should a customer's rate of water flow and usage change such that the water meter will not accurately measure the water used, the customer shall be responsible for paying the utility's established connection fee based on the meter size required to accurately measure water used. The utility will refund to the customer the salvage value of the original metering equipment that can be recovered and reused.
3. Any existing or proposed connection which has minimum and/or maximum flow rates that do not fall within the range defined below for a Standard Service shall be considered a Non-Standard Service. The range of flow rates for a Standard Service with a particular meter size shall be as follows:
