**RULES AND REGULATIONS**

b. Fire hydrants installed prior to June 7, 1992, that do not meet the requirements set out in 807 KAR 5066, Section 10(2)(b), shall not be used for firefighting purposes. However, fire departments may access and withdraw water from flush hydrants to fill the tanks on a fire engine for firefighting or fire protection training purposes.

c. Unless otherwise permitted by the District, fire hydrants meeting the requirements of 807 KAR 5066, Section 10(2)(b) shall only be used for firefighting and fire training purposes, shall be used only by fire departments, and shall not be used by others to secure water for any purpose other than firefighting and fire protection training. The use of a fire hydrant by anyone other than properly authorized fire department personnel for firefighting or fire protection training shall be considered a "theft of service" and may be prosecuted in accordance with the laws of the Commonwealth of Kentucky. Unauthorized users shall be assessed an investigation charge, the cost of any damages to the District's property, and the full cost of any water withdrawn.

d. The District will furnish water a fire department to fight a fire from a fire hydrant connected directly to its water main at each fire location for a period not to exceed a total of four (4) hours of usage. If more than four (4) hours of usage occurs in fighting a fire, the owner of the property where the fire occurs shall be liable for all water usage in excess of the four hours.

e. Except as noted paragraph d above, a fire department may withdraw water from the District' water distribution system to fight a fire or train firefighters at no charge provided it maintains an estimate of the amount of water used for such purposes during each calendar month and reports the amount of this usage to the District on the "Fire Department – Water Usage Report Form" no later than the fifth day of the following calendar month. Negative reports of water usage are required.
