

RULES AND REGULATIONS

SECTION 1. WATER CONNECTION CHARGES.

Water connection charges are hereby established and shall be exacted for each connection with the waterworks system of the District, based on the respective dates on which application is or was filed and on the respective sizes of meter connections, as follows:

A. For all customers for any size connection who have applied or who shall apply for a water connection and who have tendered or who shall tender to the District the applicable connection charge prior to October 15, 1966, the connection charge was and is Thirty Dollars (\$30.00).

B. For all customers for any size connection who applied or who shall apply for a water connection subsequent to that date, and/or who tender the applicable connection charge subsequent to that date, the connection charge shall be One Hundred and Thirty Dollars (\$130.00).

SECTION 2. MINIMUM USAGE OF WATER: DISCONNECTION PRIOR TO SUCH MINIMUM USAGE.

Each customer by signing an application for water service, agrees to pay to the District a total of at least \$130.00 in water connection charges and/or in monthly water charges. If, after having such water service made available to a customer, such customer fails to connect and actually purchase water and/or if, after making such connection, such customer disconnects such water service prior to the time that such customer will have paid to the District a total of at least \$130.00 in water connection charges and/or in monthly water charges, then reconnection (or original connection) of water service to such customer shall not be made by the District unless such customer pays all charges and penalties owed, plus a disconnection charge in an amount equal to the difference between \$130.00 and the total amount paid by such customer to the District in water connection charges and/or monthly water charges, but in any event not less than \$ 5.00.

SECTION 3. RIGHTS ON PAYMENT OF WATER CONNECTION CHARGES.

Water connections shall be brought to a point inside the property line or easement (as specified in Section 4) of the owners of any premises (residential, commercial or industrial) abutting upon any street, road, alley, public way or easement in which a water line is constructed by the District within 100 feet of the property line or easement of such owner. Such lines shall be considered available to any premises as to which the boundary line or easement is located within 100 feet of such water line.

Any and all property owners to whom such lines are so available shall be entitled to a water connection upon timely payment of the prescribed water connection charge as set out above.

RULES AND REGULATIONS

Any and all owners of properties where the property line or easement is located more than 100 feet from a water line shall be entitled to the same privilege by paying the additional cost of bringing a water line the additional distance, in excess of 100 feet, to his property line or easement.

**SECTION 4. RIGHTS ON PAYMENT OF CONNECTION
CHARGE: PAVEMENT REPLACEMENT.**

For said connection charge of \$30.00 or \$130.00, as the case may be, the property owner will receive the following material and equipment fully installed:

(a) A tap at the water main.

(b) A sufficient amount of 3/4-inch copper tubing to extend from the water main to the point at least six inches inside the utility easement or sidewalk line of the property owner if there is a sidewalk; otherwise to a point at least two feet inside the property line or utility easement of the property owner if there is no sidewalk.

(c) A complete meter installation to be installed at the point of ending of the copper tubing, which meter installation will consist of a meter, yoke, or other setting used by the District, plus a meter, a meter box and a meter box cover.

Such property owner, if he desires water service, must bear the cost (including replacement of any pavement which may be disturbed on his premises during the construction) of running a water line from the building located on his premises to the point in his property line or easement where the District has brought the water line.

The payment of a connection charge is a tap-in or service charge for the privilege of connecting to the waterworks system of the Water District and the payment of such connection charge does not constitute the purchase of a water meter. Title to the water meter serving each water customer shall at all times remain vested in the Water District, and if not used by the customer, may be removed by the District as needed.

SECTION 5. COSTS OF INSTALLATION AND INDEMNIFICATION

All costs, expenses and responsibility incident to installation, connection and use of water lines from the outlet side of the respective water meters to such respective premises where such respective water lines are brought to serve such premises, and extending to the respective buildings on such premises, shall be borne by the respective property owners, who shall further indemnify the District from any loss or damage that may directly or indirectly be occasioned by the installation of such lines. All water connections shall be made under the supervision of the Superintendent of said waterworks system in accordance with the rules and regulations of the Kentucky Department of Health.
