

**SECTION XXI – WATER SERVICE FOR FIRE DEPARTMENTS**

**FIRE DEPARTMENTS:**

Any city, county, urban-county, charter county, or fire protection district (“User”) may withdraw water from the utility’s water distribution system for the purpose of fighting fires and or training firefighters at no charge on the condition that it maintains estimates of the amount of water used for fighting fires and/or training during the calendar month and reports the amount of this water usage to the utility no later than the 15<sup>th</sup> day of the following calendar month. ~~The District is not responsible for any damages to fire equipment or construction equipment as a result of the use of the hydrant. Any user of fire hydrant water is responsible for protecting their equipment from any sediment or debris flowing through the Fire Hydrant.~~ (N)

Any city, county, urban-county, charter county, or fire protection district that withdraws water from the utility’s water distribution system for fighting fires and or training purposes and fails to submit the required report on water usage within 60 days of the report calendar month shall be assessed the cost of the water.

A non-reporting user’s report shall be presumed to be 0.3 percent of the utility’s total water sales for the calendar month. The utility should consider this evidence and may adjust the presumed usage amount accordingly.

The non-reporting user shall be billed for this usage at the lowest usage block rate regardless of customer classification and the utility charges.

A non-reporting user shall also be assessed a penalty of \$25.00 for each failure to submit a report within 60 days of the report calendar month.

**SECTION XXII – PRIVATE FIRE PROTECTION SERVICE**

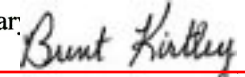

Connections from the public water distribution system for new private fire protection service will be constructed per District’s Standard Drawings on water mains which can support these types of installations. All private fire protection services shall comply with the requirements of 807 KAR5:095.

The property owner will be responsible for all installation and maintenance costs of the private fire protection service. No private fire service lines, hydrants or systems shall be installed without written approval from the District. It shall be the responsibility of the property owner to request approval from the District for any proposed alterations to the piping or equipment of any fire service line. There shall be no alteration without prior written approval of the District.

It shall be the responsibility of the property owner to limit the use of the private fire protection service to fire fighting or necessary testing only. Where a fire service line has outlets, such as fire hydrants or hose outlets, the District may seal each outlet. Such seal shall not be broken, except when necessary for fire fighting purposes. This tariff supercedes any existing special contract for the provision of private fire protection services. A private fire service line from the District’s main shall not be used for other than fire protection purposes, except when a dual service has been approved by the District in writing. The District may order a fire service line metered and converted to a commercial account to be billed at the current rate schedule for any of the following reasons:

- 1. Continued use of water from the service line for other than fire fighting purposes after notification by the District. (Flushing debris, clean up or flushing of spillage, watering of dumps and other dry areas, shall not be considered as fire fighting purposes.)
