RULES AND REGULATIONS

SECTION 1.0: APPLICATION FOR SERVICE

Any person, firm, agency or governmental entity within the boundary of the District may request water service. An application for service or Water User Agreement shall be required to be completed and signed with payment of all applicable fees, before service is supplied by the District. A 5/8" X 3/4" meter shall be the standard residential customer service meter unless the customer requests a larger meter. If a request for a large meter is made, that installation will be evaluated for approval by the District.

SECTION 2.0: BACK FLOW PREVENTION AND PRESSURE REDUCING DEVICES

All service connections shall have a means of back flow prevention. The District's standard meter service connection shall include a back flow prevention device, which is installed by the District. Some services may require a different type or special type of back flow prevention device as deemed necessary by the District. If a service requires a special type of back flow prevention device the District shall give a proposed cost analysis, before service is installed. These devices are installed for the purpose to prevent a Cross-Connection. A Cross-Connection is a connection of the District's water system with a water supply source of questionable quality, and is hereby prohibited. Failure to comply shall result in the discontinuance of water service, until the cross connection as been eliminated. The District's system pressure may require a pressure-reducing valve to be installed on the customers plumbing. This device shall be owned and maintained by the customer. The District also recommends that expansion tanks be installed. See SECTION 33.0 THERMAL EXPANSION TANK RECOMMENDATION.
