OPERATIONAL POLICIES

- 1) The Commissioners will make all policies concerning the North Marshall Water District.
- 2) The North Marshall Water District Commissioners will hold regular monthly meetings on the second Thursday of each month. Such meetings will be open to the public. Prior approval by the Commissioners is required to be on the agenda.
- 3) The manager and office personnel shall be governed by the policies adopted by the Commissioners and will enforce them impartially.
- 4) North Marshall Water District office hours shall be Monday through Friday 8:00 am to 4:30 pm. Emergency phone numbers are listed in the phone directory.

METERING POLICIES

- 5) There will be a separate meter for each residence.
- 6) All commercial businesses and multiple-family housing units must be served by a meter appropriate for the volume needed. Separate meters are required for individual buildings not under the same roof.
- 7) All home water supplies, such as wells, reservoirs, springs or cisterns shall be permanently disconnected from the public water supply. Valves are not sufficient.
- 8) If an immediate family member is living in a non-permanent structure on a present customer's property, they may both use the same meter.
- 9) Once installed, a meter cannot be moved to another location unless the owner pays the relocation costs. This includes raising or lowering the meter or meter box due to landscaping changes.
- 10) The customer is responsible for maintaining the area around the meter box to the extent that the meter can be found and read without undue hardship (cutting branches, vines, etc.). It is also the customers' responsibility to provide access to meters that are beyond fences. Gates or turnstiles are **EFFECTIVE**

acceptable.

- 11) The customer is free to read, check or examine his or her meter at any time. However, the District requests the customer replace the meter lid to prevent freezing and close the box to prevent foreign objects from collecting inside.

SERVICE POLICIES

- 12) Anyone desiring water service must fill out a service application at the District office. For new service to a home or building which has not previously had water, there will be a tap-on fee charged. For restoring service which has been disconnected for whatever reason, there will be a reconnect fee.
- 13) Only District personnel or the District's plumbing contractor will be allowed to make connections to a water main line.
- 14) Only licensed plumbers or contractors will be allowed to install service to a customer. The District will not be liable for damage done to a customer's property by such contractors.
- 15) The District reserves the right to determine what size meter will service a customer. The minimum size for a tap will be $\frac{3}{4}$ inch.
- 16) All main extensions will be done according to the specifications determined by the District. All contractors will be furnished a copy of these specs before bidding work for the District.
- 17) The District will attempt to accomodate the wishes of the customer when setting a meter. However, the District must reserve the right to set a meter where it will be the most financially feasible for the District. If a customer is willing to bear the added expense of installation, the District will allow this rule to be waived.
- 18) All new main extensions will be paid for by the applicants. The total cost will depend on the bids received for the job. The District will pay for 50 feet of the extension per applicant, which will be determined by dividing the total feet of extension by the total cost to arrive at a cost per foot. All applicants will also be required to pay a tap-on fee.

- 19) Additional customers will be allowed to tap on to a new main extension provided they pay part of the cost of the installation equal to every original customer on that line. ~~The new customer's payment will be divided equally and refunded to all existing customers on that line.~~ These refunds will continue for five years from the date of the extension completion. New customers will also be required to pay a tap-on fee.
- 20) At no time will any customers be allowed to get more money refunded than they originally paid for the extension. The tap-on fee is not considered part of the cost of the extension.
- 21) A developer may install a water main to a new subdivision with a proper contract with the District. For each new customer that taps on to this line, the developer will be refunded a sum equal to fifty feet of the extension from the customer's tap-on fee. This refunding will continue for ten years. Under no circumstances will the developer be allowed more money to be refunded than he or she originally paid for the line.
- 22) The yoke valve inside the meter box is for District personnel only. If the customer breaks the yoke valve for any reason, he or she will be charged to replace it.
- 23) The North Marshall Water District will serve any individual outside the District's service area in accordance with 807-KAR 5:066, Section 11 of the Rules and Regulations of the Public Service Commission.

FINANCIAL POLICIES

- 24) Water bills will be issued bimonthly, with bills being mailed on or about the twentieth of each even-numbered month.
- 25) Water bills will become delinquent after the 10th of the following month in which they are mailed. A 10% late penalty will then be added to the account. The District cannot forgive a late penalty due to postal error (i.e. checks getting lost in the mail). A bill will be considered paid by the utility on the date payment is accepted by a bill collection service (i.e. banks who accept bill payments).
- 26) Service will be discontinued after the 27th of the following month in which the bill was mailed. A \$20 reconnect charge plus the delinquent bill amount must be paid before service can be restored. If reconnection is requested after normal office hours, a \$35 reconnect charge plus the delinquent bill will be due. Discontinuance of service for failure to pay will be done in compliance with 807-KAR 5:006, Section 14.

- 27) When a customer has service disconnected at one location and connected at another, any balance due at the original location may be transferred to the account for the new location. The service to the new location may then be disconnected if the customer becomes delinquent in paying the balance due at the original location.
- 28) The District may deny service to an applicant who is a member of a delinquent household when the prior customer continues to reside in the household and uses the service.
- 29) Service will be turned off only for delinquent bills or at the customer's request.
- 30) Service can be permanently disconnected at any time by the customer's written request. However, the tap-on fee will be forfeited.
- 31) The customer will pay a minimum bill as long as there is a meter in the meter box. Service will be discontinued and the meter removed from the meter box to vacated or winterized property upon customer's request. If the customer ever wishes service restored, they will have to pay a meter reinstallation fee.
- 32) When payment is made by bad check, the bill is considered to be delinquent and service can be turned off following proper notice of intent. The District can also require cash payments for a period of time following receiving a bad check on an account.
- 33) When a customer discontinues service between meter readings, he or she will be charged the minimum for each month after the last reading if he or she does not exceed the maximum 2000 gallons per month usage. For example, if a customer discontinues service two weeks after the last reading, he or she will be billed for the minimum for one month, provided he or she did not exceed 2000 gallons usage. Any excess usage will be billed accordingly. If a customer discontinues service six weeks after the last reading, he or she will be billed for the two month minimum, provided 4000 gallons or less usage. Any excess usage will be billed accordingly.
- 34) The District will charge a deposit for all residential customers. This deposit will not exceed three-twelfths of the estimated annual bill for that customer. The District will charge a calculated deposit for business and commercial customers based on previous usage or usage of similar customers.

- 35) The District can waive these deposit requirements if the customer presents a one year credit history from a utility previously used by that customer.
- 36) All deposits will earn interest while retained by the District. This interest will be credited to the account on the anniversary date or a check will be issued if the customer desires. After 12 months of on-time payment, the District will return all deposits to the customer. If any bill has been delinquent during that year, the District will retain the deposit for another year. The District may also require a new deposit if a customer's bill becomes delinquent after the deposit has been refunded or if his or her service classification changes.

MISCELLANEOUS POLICIES

- 37) The Water District is responsible for leaks up to the meter. The user is responsible for all water that flows through the meter, regardless if a leak is present in their piping. The District is not obliged to adjust any bill due to a leak
- 38) The District will not guarantee any pressure or flow rates at any fire hydrant. Fire hydrants are installed for use by District personnel for flushing purposes only. All future hydrants will be installed only if a professional engineer with a Kentucky registration has certified that the system can provide a minimum fire flow of 250 gallons per minute; and the system has the capacity of providing this flow for a period of not less than two hours plus consumption at the maximum daily rate. If this standard cannot be met, a blow-off valve should be installed instead of a hydrant.
- 39) All customer complaints will be logged on special forms by the District, addressed as soon as possible and kept on file for a minimum of 2 years. If the complaint is not resolved, the District will notify the complainant of their right to file a complaint with the Public Service Commission. The District will respond to all complaints in writing.
- 40) The District has in place a computerized billing system which monitors usage bimonthly and flags usage that is at least 25% higher than normal. The District will attempt to determine the cause of the higher consumption by reviewing the customer's usage for the preceding year or contacting the customer for more information.
- 41) If a customer has unusually high usage and the reason cannot be quickly determined the District must test the meter. If further investigation is necessary, the customer must be notified using the following format:

On (date), the meter bearing identification no. _____ installed in your building located at (street and number) in (city) was tested at (on premises, or elsewhere) and found to register (percent fast or slow). The meter was tested on (periodic, request, complaint) test.

Based upon this we herewith (charge or credit) you with the sum of \$ _____, which amount has been noted on your regular bill. If you desire a cash refund rather than a credit to your account of any amount overbilled, you must notify this office in writing within seven (7) days of the date of this notice.

- 42) A copy of the Customer Bill of Rights will be prominently displayed in the District office. The customer will be given a copy when they sign up for service.
- 43) The District is obliged to accept partial payments from customers who display appropriate need. Service will not be disconnected if partial payments are made before a bill becomes delinquent.
- 44) After installing, testing and/or adjustment, meters must be sealed with the appropriate tamper-resistant seals.
- 45) A customer may request, in writing, a meter test once each 12 months. If the meter reads less than 2% in error, a charge will be applied. If it reads more than 2% in error, restitution must be made for the actual usage, retroactive to the last meter test or event which caused the inaccuracy of the meter, whichever applies. After the District tests the meter, the customer may request the Public Service Commission to test the same meter once every 12 months.
- 46) All District personnel entering a customer's property must have proper identification on their person. This includes meter readers and operators and they shall make identification available to the customer upon request.
- 47) A customer who attempts to or is obtaining water through fraudulent means (tampering with the meter, installing a bypass around the meter, connecting service without a meter or by any other method) will have his or her service immediately disconnected and will possibly face criminal theft charges.
- 48) Any damage done to a meter or meter box while serving a customer's property shall be the responsibility of the customer. The customer will be liable for replacing any damaged equipment. The only exception is when District personnel working on the meter are the cause of the damage.

SERVICE APPLICATION FOR WATER

This agreement between the North Marshall Water District a non-profit water district organized under the Rules & Regulation of the Commonwealth of Kentucky, hereinafter called the Supplier and:

NAME & ADDRESS OF APPLICANT

NAME: _____

ADDRESS: _____

CITY, STATE, ZIP: _____

hereinafter called the user:

WITNESSETH

WHEREAS, the User desires to purchase domestic, commercial, industrial or farmstead portable water from the Supplier, and to enter into a water user's agreement as required by the Public Service Commission of Kentucky and the Supplier.

NOW, THEREFORE, in consideration of the mutual covenants, promises and agreements herein contained, it is hereby understood and agreed;

The Supplier shall furnish, subject to the limitations hereinafter provided for, such quantity of water for domestic purposes as the User may desire in connection with his occupancy of the following described property.

The User shall install and maintain at his own expense a service line which shall begin at the meter and extend to the dwelling or place of use. The service line shall connect with the distribution system of the Supplier at the nearest place of desired use by the User, provided the Supplier has determined in advance that the system is of sufficient capacity to permit delivery of water at that point.

The User agrees to pay for water at such rates, time and place as shall be determined by the Supplier, and agrees to the penalties for noncompliance with the above as set out in the current Rules and Regulations.

The Supplier shall tap the main for each service, install a cutoff valve and a water meter. The water meter shall be placed on the User's property immediately adjacent to his property line at a point agreed upon between the User and the Supplier. The User shall execute an easement to Supplier for the placement of said meter. The Supplier shall retain ownership of and have exclusive right to use, maintain, repair, replace and remove such cutoff valve and water meter and to turn it on and off.

The Supplier shall have final jurisdiction in any allocation of water to Users in the event of a water shortage, and may shut off water to a User who allows a connection or extension to be made to his service line for the purpose of supplying water to another user. In the event the total water supply shall be insufficient to meet all the needs of all Users, or in the event there is a shortage of water, the Supplier may prorate the water available among the various Users on such basis as is deemed reasonable and fair by the governing Board of the Supplier, with adjustments in charges therefor. The Board of Commissioners may also prescribe a schedule of hours covering use of water for lawns and gardens and for other high usages not of essential nature, and may require adherence thereto or prohibit the use of water for such purposes; provided that, if at any time the total water supply shall be insufficient to meet all the needs of all the Users, the Supplier must first satisfy all the needs of all Users domestic and commercial purposes before supplying any water for gardens, lawns and nonessential high usages.

The User agrees to comply with the requirements of the Public Service Commission of Kentucky that no other present or future source of water will be connected to any water lines served by the Supplier's water lines.

The User shall connect his service lines to the Supplier's distribution system at the Supplier's meter, and shall commence to use water from the system on the date that the water is made available to the User by the Supplier, or, if no water is used for a period following such date, shall pay the equivalent of a minimum charge for each month following the date on which the Supplier installs the User's meter, or on which this Agreement is signed, whichever is later. Water charges to the User shall commence on the date that the service is made available.

User agrees to be bound by the Rules and Regulations of the Supplier. The failure of a User to pay water charges duly imposed shall result in the automatic imposition of the approved penalties and termination procedures.

In the event it becomes necessary for the Supplier to shut off the water from a User's property, a fee will be charged for a reconnection of the service.

IN WITNESS WHEREOF, we have hereunto executed this Agreement this _____

day of _____ 19____
