SECTION XIII – SERVICE CONNECTION INSTALLATIONS

- Any prospective water customer desiring water service and the installation of a service connection, should apply at the District office. The prospective customer shall, in signing a water service connection contract, agree to be bound by all the provisions of these Rates, Rules and Regulations as they may be amended from time to time. No service connection shall be installed to serve property which does not abut the street or road on which the distribution main is located, without specific approval of the District. No service connection shall be tapped off a pre-stressed concrete distribution main, any distribution main 20" or larger or any cross-county distribution main without the approval of the District. Every structure wherein water is used shall have a separate service connection and meter provided; however, a variation in this respect may be authorized by the District. The District reserves the right to specify the size of the service connection for each installation. When application for a service connection installation is made; a service connection fee shall be paid according to the following schedule:

5/8" connection	\$750.00
1" connection	\$1,100.00

1 1/2" and 2" service connection fees will be billed per Invoice Billing Policy.

No service connection fees will be required for water service connections that are not installed by the District (e.g., large meter pits, fire lines, etc.). The only fees to the applicant will be the cost of the meter and meter appurtenances utilizing the District's Invoice Billing Policy.

- Upon request from a customer for an enlargement of a service connection, the cost to enlarge the service shall not exceed the cost of a new service connection installation for the applicable enlarged service size. In situations where the District is already planning to replace the customer's existing service connection through a main replacement project or through a maintenance work order, the customer may notify the District of their desire to enlarge the service connection that serves their property and will only have to pay the enlargement cost between the replacement cost the District was planning to incur and the cost necessary to enlarge the service connection.
- After the tapping fee has been paid, the District shall tap the distribution main and install the service connection from the distribution main to a meter setting and point of service, which will be located behind the curb or an area determined by the District to be placed in a manner that is safe to perform maintenance on such meter setting.
- The service line from the point of service to the building shall be installed and maintained by the customer at no cost to the District. All service lines may be subject to inspection or approval by the District and/or Kentucky State Plumbing Inspectors before water service will be turned on for use.
- In cases where the customer desires a water pressure other than that pressure provided by the District's distribution mains in the surrounding area, it shall be the responsibility of the customer to install the necessary devices to provide the desired pressure.
- In cases where the meter has been installed, the customer shall pay rates specified herein.
