RULES AND REGULATIONS

15. Meters

All meters shall be installed, renewed, and maintained at the expense of the District, and the District reserves the right to determine the size and type of meter used.

It shall be the policy of the District to test each water meter pursuant to Public Service Commission Regulation 807 KAR 5:066. In addition, the District shall make a test of any meter upon written request of any customer provided such request is not made more frequently than once each twelve (12) months. The customer shall be given the opportunity of being present at such request tests. If such tests show that the meter was not more than two percent (2%) fast, the District will make a \$25.00 charge for the test.

Meters will generally be read around the 15th of the month, but the District reserves the right to estimate bills and/or to vary the dates or length of period covered, if necessary or desirable due to inclement weather or other reasons.

16. Failure of Meter

Where a meter has ceased to register, or meter reading could not be obtained, the quantity of water consumed will be based upon an average of the prior six months consumption and the conditions of water service prevailing during the period in which the meter failed to register. Should a prior six month base evaluation period not be available, then quantity shall be estimated by District's engineer.

17. Right of Access

The customer shall permit the District to lay, maintain, repair, or remove such water lines as are owned by the District and located on the customer's property, with the right of ingress and egress over customer's property. The District's duly authorized representative and/or other duly authorized employee of the State Health Department bearing proper credentials and identification shall be permitted to enter upon all properties for the purpose of inspection, observation, measurement, sampling and testing, in accordance with the provisions of these Rules and Regulations.

The customer shall convey, or cause to be conveyed, a perpetual easement and right-of-way to the District across any property owned or controlled by the customer whenever said easement or right-of-way is necessary to enable the District to furnish water service to the customer.

RULES AND REGULATIONS

31. Fire Protection (Cont'd)

Fire Hydrants installed on the distribution lines of this District are for the sole purpose of flushing the lines, or other uses by the District necessary for proper maintenance of the lines. The District is not responsible for, nor does it guarantee, any minimum pressure or flow at these hydrants, other than the minimum required by the Public Service Commission for distribution lines. Fire hydrants used by fire department units in the performance of their duty, any damage to the distribution lines, resulting from excessive pumping pressure will be the liability of that unit.

32. Multiple Users on one meter

Where two or more tenants or occupants ( of different rental units) of property, including duplexes, apartment houses, mobile home parks, or other multi-unit premises, are served by a single water meter, the rates and charges shall be computed by dividing the number of gallons of water registered by such single meter by the numbers of customers being served through such meter and then applying the results thus obtained to the water rate schudle, then times the number of customers served to arrive at the monthly bill that the owner or occupant of the property must pay. In no event shall the monthly bill applicable to each tenant or occupant be less than the minimum water rate in the applicable rate schedule.
