III. Water Main Extensions:

All developers must submit a preliminary drawing of the water main extension development plans to the District for review. These plans must be prepared by a professional engineer. After reviewing the plan, the Board will contact the developer with changes or final approval. The District will submit the plans to the Division of Water.

After approval by the Division of Water, the District will hire a contractor to construct the project. The District will be paid for the project by the developer before any work is begun. The final cost of the project will not exceed cost estimate.

A ten (10) year refund period will begin after the project is completed and a contract is signed by both parties. The date will become the anniversary date. The developer will be reimbursed annually on this date for any water meter installed on said water extension.

To determine the refund amount, the total cost of the project will be divided by the total length of the extension. This will determine the cost per foot. At each anniversary date, the cost of 50 feet of the main extension will be paid to the developer for each water meter installed during that *year*. (All persons desiring water will be responsible for the meter tap-on charge.)

Refunds shall continue each year until reimbursement is paid in full (no interest) or ten years have elapsed, whichever occurs first. No refunds after ten years.
