

NORTH MARSHALL WATER DISTRICT

RULES AND REGULATIONS

1B. The installation of water main extensions to serve new customers shall be considered by the District upon request by the customer(s) or developer of a new subdivision. The District may require an application signed by the customers and the developer before the District shall proceed with an analysis and estimate of the proposed new water main extension.

C. DESIGN AND CONSTRUCTION

1C. In order to assure an adequate supply of water, the design and construction of water mains and appurtenances shall be under the control and direct supervision of the District. Such control shall include determination of the size and type of pipe, and selection of points in connection to the existing system. Extensions must be connected at not less than one point with existing lines of equal or greater size and having sufficient capacity to serve the extension, even though this requires bypassing or paralleling other existing mains. The minimum size of pipe used in the extension will be dictated by the demand of the new customers or may be set by the Commissioners, larger sizes may be required if so determined by the District. In all cases the design shall be at least equal to the standards established by good engineering practices for water districts.

D. COST OF EXTENSIONS

1D. The cost of extensions shall be paid by the applicants. The District will make an estimate of cost for each extension, which shall be the basis for initial payment to the District. This cost shall be exclusive of the meter connections. The District shall pay that portion of the cost of the water main extension equal to 50 feet for each applicant for service. That part of the cost not covered by the District's portion shall be contributed equally by those applicants desiring service on the main extension. Each applicant will also be required to pay the District's approved "Tap-on-fee" for a meter connection to the main extension. Upon completion of the work a final determination of the actual cost will be made by the District and any necessary adjustment made of funds so contributed.

PURSUANT TO 2007 KAR 5:011,
SECTION 2(1)
BY: *[Signature]*
PUBLIC SERVICE COMMISSION MANAGER

2D. The cost of extensions shall include all items of material, labor, engineering, and general office expense pertaining to the preparation of drawings and specifications, and the purchase, storage, delivery, and installation of pipe, valves, and all accessories, including any extraordinary costs occasioned by the opening of pavement, unusual soil conditions, frost, obstructions, or other cause. It shall also included the cost of any portion of the extension constructed parallel to existing mains of insufficient capacity to support the extension, considered by the District to be presently adequate for the services of abutting properties, whether or not such properties are actually being served.
