SHEET NO. 15

CANCELLING P.S.C. KY. NO. 1

SHEET NO. 13

West Shelby Water District  
(Name of Utility)

**RULES AND REGULATIONS**

Fire Protection (Cont'd)

The District makes no warranty as to the sufficiency of the water supply or the adequacy of the water pressure at any time. (Sec Tariff #2 for further restrictions.)

Fire Hydrants installed on the distribution lines of this District are for the sole purpose of flushing the lines, or other uses by the District necessary for proper maintenance of the lines. The District is not responsible for, nor does it guarantee, any minimum pressure or flow at these hydrants, other than the minimum required by the Public Service Commission for distribution lines. Fire hydrants may be used fire department units in the performance of their duty, but any damage to the distribution lines resulting from excessive pumping pressure will be the liability of that unit.

New fire hydrants will be installed only if a professional engineer with a Kentucky registration has certified that the proposed fire hydrant will be able to provide a minimum fire flow of 250 gallons per minute and that the system supporting this flow has the capacity of providing this flow for a period of not less than two hours plus consumption at the maximum daily rate.

**32. Multiple Users on One Meter**

A separate meter shall be installed for service to each residential or business unit. The customer will not permit anyone else to connect to the District's water line or meter or the customer's service line without the prior written consent of the District. Water furnished for a given residential or business unit shall be used at that unit only. Pending the elimination of all existing multiple use meters from the District's system, where two or more tenants or occupants (of different rental units) of property, including duplexes, apartment houses, mobile home parks, farms or other multi-unit premises, are served by a single water meter, the rates and charges shall be computed by dividing the number of gallons of water registered by such single meter by the numbers of customers being served through such meter and then applying the results thus obtained to the water rate schedule, then times the number of customers served to arrive at the monthly bill that the owner or occupant of the property must pay. In no event shall the monthly bill applicable to each tenant or occupant be less than the minimum water rate in the applicable rate schedule.
