Data transport service is a dedicated point-to-point service offered at the DS-1 (1.54 megabit) or DS-3 (45 megabit) level. The services offered by Vitts will be packet-switched and will not rely on the circuit switching of the incumbent local exchange carrier ("ILEC"). Vitts intends to provide service on a statewide basis through its own network facilities, including facilities collocated in the central offices of ILECs, through unbundled network elements purchased from ILECs and through the resale of ILEC services. Applicant does not currently own any telecommunications facilities in the Kentucky. Vitts plans to provide high-speed Internet access over IP/ATM Packet switches, xDSL compatible loops and IOF.
