FOR Cumberland County, Kentucky

PSC KY NO. 2

1st Revised SHEET NO. 36

CANCELLING PSC KY NO. 2

Original SHEET NO. 36

Cumberland County Water District
(NAME OF UTILITY)

14. Piping on the premises of the applicant/customer must be installed so that connections are conveniently located with respect to the utility's lines and mains. A place must be provided for metering that is unobstructed and accessible at all times.
15. The utility may require the applicant/customer, at his/her own expense, to install a back-flow preventer and/or pressure regulator.
16. All meters will be installed renewed, and maintained at the expense of the utility, and the utility reserves the right to approve the size and type of meter used.
17. All taps and connections to the mains of the utility must be made by and/or under the direction and supervision of utility personnel and will incur a meter connection/tap-on charge, an amount that has been approved by the Public Service Commission for such service. Payment of this fee is for the privilege of connection to the water system and the payment of the fee does not constitute the purchase of a water meter.
18. Should an applicant requesting a 5/8" x 3/4" meter require service on the opposite side of the road from the water main, the utility will provide the service at no additional cost to the customer other than the standard meter connection/tap-on charge. All larger size meters will be charged the actual cost of installing the meter, including, when applicable, the additional costs for crossing the road.
19. Any customer having boilers and/or pressure vessels that received water from the utility must have a check valve on the water supply line and a vacuum valve on the steam line in order to prevent a collapse were the water supply from the utility to be interrupted or discontinued.

V. Leak Adjustments. A customer may make a request for a bill adjustment in the event of a hidden underground leak with the following conditions:

(T)

1. A hidden underground leak is defined as a leak in the customer's service line between the meter and the premises.
2. The customer must request a leak adjustment in writing to the utility.
3. The customer must provide a plumber's statement or other proof showing the leak has been repaired.
4. After verification of repairs by the utility, the bill will be adjusted by comparing the usage during the leak billing period to the average usage for the past three billing periods. A reasonable estimate will be used in cases when three prior periods of information do not exist.

(NAME OF UTILITY)

- (T)
5. The customer's bill will be based on two components. The first step will be to calculate the customer's average monthly usage over a three month period. The second step will be to deduct the customer's average monthly usage (as calculated in the above) from the total amount of water that passed through the meter. The usage calculated in step one will be billed at the utility's regular rates, while the remaining usage will be charged at the per thousand gallon leak adjustment rate, as set forth in the rates and charges portion of the utility's approved tariff. All water passing through the meter must be accounted for by the customer. So the customer will owe the amount of his/her average bill plus the per thousand gallon leak adjustment rate for the remainder of the water that passed through the meter.
 6. If meter readings are not available for an entire three-month period, the water bill will be estimated by the utility, subject to an upward or downward adjustment once a three-month average of actual meter readings can be calculated.
 7. Only one (1) leak adjustment will be made per 12 month period.
 8. Plastic pipe for repair of underground water service lines must be certified to withstand a working pressure of 200 lbs. per square inch or greater.

W. Ownership of Mains, Services, and Appurtenances

1. All mains, flush hydrants, valves, crossings, and other appurtenances are and shall remain the property of the utility, whether installed by the utility or the customer.
2. All service lines from the main to the meter with appurtenances are and shall remain the property of the utility, whether installed by the utility or the customer.
3. The customer shall install, own, and maintain his/her service line from the meter (or point of delivery) to the point of usage.

X. Notification of System Problems: The customer shall notify the utility immediately should the service be unsatisfactory for any reason, or should there be any defects, problems, trouble, or accidents affecting the water system.
