CANCELS 1ST REVISED PAGE 21

2. GENERAL REGULATIONS

2.3. OBLIGATIONS OF THE CUSTOMER (continued)

2.3.10 Determination of Charges for Mixed Intrastate, Interstate
and/or Local Usage (continued)

Identification and Rating of VoIP-PSTN Traffic (continued)

(B) Rating of VoIP-PSTN Traffic *

The Relevant VoIP-PSTN Traffic terminating from, or
originating to the customer, or from the Company or other
provider and facility rate elements identified in
accordance with this tariff section will be billed at
rates equal to the Company's applicable tariffed
interstate switched access rates as specified at
<http://serviceguide.att.com/ABS/ext/TariffDetails.cfm>, if
those interstate rates are lower than their respective
Kentucky state access rates (Access Services Tariff).
Conversely, if the Kentucky state access rates are lower,
then this traffic will be billed utilizing the rates from
the Access Services Tariff. Hereafter, these billed rates
will be referred to in this Tariff as the relevant "VoIP
Rates".

* Section 2.3.10(B) describing the method of identifying and rating
originating VoIP minutes of use will become effective on July 1,
2014. The advanced filing of this tariff change prior to the July 1,
2014 effective date, is strictly for the benefit of our customers in
providing advanced notice of these FCC mandated changes and ample
time to submit their new VoIP factors.

and/or Local Usage (continued)

Identification and Rating of VoIP-PSTN Traffic (continued)

(C) Calculation and Application of Percent-VoIP-Usage Factors

The Company will determine the number of Relevant VoIP-PSTN Traffic originating MOU and originating facility rate elements, if applicable, to which VoIP Rates will be applied under subsection (B), above, by applying the Percent VoIP Usage ("PVU") factor to the intrastate access originating MOU exchanged and facilities between the Company and the customer. The PVU factors will be derived and applied as follows: (T)

(1) The customer will calculate and furnish to the Company a factor (the "PVUC") on an ACNA basis which would aggregate traffic from all Carrier Identification Codes ("CICs") or Operating Company Numbers ("OCNs") associated with the ACNA. This PVUC represents the percentage (whole number) of the originating intrastate access MOU that the customer receives from the Company end users in the state, which is sent from the Company that is terminated in IP format at the customer's end user. This PVUC shall be based on information such as the number of the customer's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information satisfactory to the Company. (T)

(2) The Company will calculate and periodically update a factor (the "PVUT") representing the percentage (whole number) of the total intrastate access MOU that the Company exchanges with the customer end users in the state which is received from the customer and terminated in IP format at the end user. This PVUT shall be based on information such as the number of the customer's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information. (T)

CANCELS ORIGINAL PAGE 23

2. GENERAL REGULATIONS

2.3. OBLIGATIONS OF THE CUSTOMER (continued)

2.3.10 Determination of Charges for Mixed Intrastate, Interstate
and/or Local Usage (continued)

Identification and Rating of VoIP-PSTN Traffic (continued)

(3) The Company will develop a Customer Percent VoIP Usage ("PVU") factor combining the Customer's PVUC factor with the Company's PVUT factor. (T)

a) The PVU calculation below is applied when the Company does not bill based on actual call detail records for the intrastate Company's IP traffic at VoIP Rates. (T)

$PVU = PVUC + [PVUT \times (1 - PVUC)]$ is applied to the Company's end user's originating intrastate MOU and facility rate elements. (T)

Example: The customer reported that their PVUC as 40%. The Company's PVUT is 10%. This results in the following:
 $PVU = 40\% \text{ plus } (10\% \text{ times } (1 - 40\%)) = 46\%$

This means that 46% of the originating Intrastate MOU exchanged between the customer and the Company's end users (T)

will be rated at VoIP Rates. (T)

SECTION 2
ORIGINAL PAGE 23.1

2. GENERAL REGULATIONS

2.3. OBLIGATIONS OF THE CUSTOMER (continued)

2.3.10 Determination of Charges for Mixed Intrastate, Interstate
and/or Local Usage (continued)

Identification and Rating of VoIP-PSTN Traffic (continued)

(3) The Company will develop a Customer Percent VoIP
Usage ("PVU") factor combining the Customer's PVUC
factor with the Company's PVUT factor. (continued)

b) The PVU calculation below is applied
when the Company bills are based on the
actual originating call detail records for
the intrastate Company's IP traffic at VoIP
Rates.

The formula for usage will be as follows:

$PVU = PVUC \times (1 - PVUT)$ applied to the Company's
TDM end user's total terminating intrastate MOU.

$PVU = PVUC + [PVUT \times (1 - PVUC)]$ is applied to the
facility rate elements.

Example: The Company has identified that there was 10,500
originating Intrastate MOU that were identified exchanged
between the Customer and the Company's IP end users. The
Customer reported that their PVUC as 40%. The Company's
PVUT is 10%. This results in the following:

$PVU = 40\% \text{ times } (1 - 10\%) = 36\%$

This means that 36% of the originating Intrastate MOU
exchanged between the Customer and the Company's TDM end
users will be rated at VoIP Rates and the terminating
intrastate 10,500 MOU will also be rated at VoIP Rates.

For the facility rate elements the formula that is applied
to the intrastate dedicated facilities is as follows:

$PVU = 40\% \text{ plus } (10\% \text{ times } (1 - 40\%)) = 46\%$

Therefore 46% of the Intrastate facilities will be rated
at VoIP Rates.
