EAST KENTUCKY POWER COOPERATIVE, INC.

DEFENDANT

ORDER TO SATISFY OR ANSWER

East Kentucky Power Cooperative, Inc. ("East Kentucky") is hereby notified that it has been named as defendant in formal complaints filed by Paul F. Hilpp, Robert P. Brady, William P. Thompson, Brian M. Mattingly, Mr. & Mrs. Samuel E. Lee III, Richard and Angela Mattingly, Joseph R. Hughes, Charles and Terry Campbell, Timothy Gerald Ewing, Robert and Patricia Clements, Joseph Paul and Vickie Brady, and James C. Hanks, a copy of each is attached hereto.

Pursuant to 807 KAR 5:001, Section 12, East Kentucky is HEREBY ORDERED to satisfy the matters complained of or file a written
answer to the complaints within 10 days from the date of service of this Order.

Done at Frankfort, Kentucky, this 14th day of March, 1995.

Don Mills, Executive Director
Public Service Commission
730 Schenkel Lane
Post Office Box 615
Frankfort, KY 40602

Dear Mr. Mills:

This letter is concerning the proposed construction of a 69,000 volt transmission line that will cross 6.45 miles in north central Marion County. According to East Kentucky Power Co-Operative, Inc. this line is being constructed to serve the Lebanon Industrial Park.

I hereby request that the Public Service Commission conduct a hearing regarding this matter. Further, I would like for the PSC to investigate the "misinformation" being supplied by East Kentucky Power to the general public concerning the inadequate supply of electricity available to the Lebanon Industrial Park via Kentucky Utilities which has a major line only one-half mile from this territory.

I would also ask the commission to consider modifying the service territory (Lebanon Industrial Park) so that the boundary line of the two power suppliers is outside of the industrial park. This decision would serve to avoid duplication and conserve resources and materials since Kentucky Utilities Company is already established to service such an area with adequate electricity.

I appeal to the commission to conduct a hearing on this matter as soon as possible.

Sincerely,

William P. Thompson

Richard & Angela Mattingly
6320 Loretto Rd.
Lebanon, Kentucky 40033

Dear Mr. & Mrs. Mattingly:

East Kentucky Power Cooperative, Inc. (EKPC) will soon construct a 6.45 mile electric transmission line in north central Marion County. You have property within a one-half mile wide corridor being studied for the location of this facility. The final route, which has not yet been selected, will be on a 100 foot wide easement within this corridor and your property may or may not be affected.

EKPC would like to consider your comments and concerns as we develop this final route. You are invited to an "Open House" meeting at St. Augustine Church's Parish Hall during the hours of 5:00 p.m. to 8:00 p.m. on Tuesday, February 7, 1995, so that we can hear from you and exchange information. We will be serving refreshments and there will not be any speeches. Instead you will be able to talk one-to-one with people at EKPC who are involved in the project.

Enclosed are some materials about EKPC, our "Open House" format, and this specific project. You may want to read over these items prior to our visit.

Please make arrangements to drop by and talk with us. We look forward to meeting you.

Sincerely,

Spencer Pittman, Senior R/W Agent
Engineering Support Department

SP:jkr

Enclosures

(MARIONCO.doc)
OPEN HOUSE FORMAT

The following information stations will be available at the Open House:

Engineering
Right-of-Way Acquisition
Construction
Electromagnetic Fields
Environmental

People at East Kentucky Power who work in each of these areas and are directly involved with the Marion County Industrial Park Tap project, will be there to discuss the project with you. There will be several maps around the room which show the study corridor and individual property boundaries that were obtained from county records. It is very important for you to identify your particular property and to tell us about information or preferences you have concerning this project and your land. A questionnaire will also be available to record your comments.

SP:jkr

(MARIONCO.DOC)
Members of EKPC's Engineering and Right-of-Way Procurement staff are following the procedure described below in developing the project corridor and obtaining right of way:

Two independent teams were established to select an appropriate tap point and develop route alternatives. When the two end points of the project were determined, a straight line was drawn between the two points on 7.5 minute topographic maps.

Each team then;

Studied the maps and collected any data available on locally sensitive areas e.g. known locations of endangered or threatened species, airstrips, heavily populated areas, commercial centers, or schools.

Established several "paper routes" to use in field reconnaissance and went to the field to view and develop route alternatives.

The two teams then brought their respective alternatives together for discussion and selected a 1/2 mile-wide corridor encompassing the best alternatives.

An open house is being held to collect input from the property owners and residents of the area.

All information available, including the concerns of those attending the open house, will be combined to develop the final proposed route to be surveyed.

Property owners within the corridor will be notified by mail about the route selected for survey and Right-of-Way Agents will make visits to each owner affected to obtain survey permission.

Survey and design activity begin.

Final negotiations with property owners are concluded.

Right-of-way clearing and construction phases are implemented.

After construction is completed, all affected property owners will be visited by EKPC personnel for follow-up.
Fact Sheet
for
Marion County Industrial Park Tap (69 kV)

Owner:

This project is being undertaken by East Kentucky Power Cooperative, Inc., (EKPC). EKPC is a Generation and Transmission Cooperative formed in 1941 which today serves 18 member distribution cooperatives. In turn, the locally based cooperatives distribute power to over 345,000 consumers in 89 counties across Central and Eastern Kentucky.

Need for the Project:

Planning studies indicate that to provide reliable service to consumers, EKPC will need additional transmission support in that area by 1995 for peak conditions. This capacity will be obtained through the construction of a new distribution substation and associated 69,000 volt transmission feed.

Project Description:

A 69 kV Transmission Line will be constructed from the existing EKPC Loretto Substation to a new EKPC substation in the Lebanon Industrial Park. The line will consist of three current carrying wires and two overhead groundwires. The wires will be typically supported by wood poles in a one-pole or two-pole structure configuration with a wooden crossarm. At locations where the line changes direction, there may be three poles and wire guys. The total length of the line is estimated at 6.45 miles.

Project Schedules & Approvals:

All environmental clearances will be submitted to REA as required for the one-half mile wide corridor that is being studied for the transmission line portion of the Project. Right-of-Way clearing activities are expected to begin the Summer of 1995 and construction of the project is to be accomplished by a contractor during the Fall of 1995.
Characteristics of Transmission Line

Length: Approximately 6.45 miles.

Wires: Three - 266.8 KCM 26/7 ACSR (0.6420 inches in diameter). Two - 3/8" High Strength Steel 7 strand (0.360 inches in diameter).

Voltage: 69,000 Volts

Structures: Treated Wood Poles

Right-of-Way: 100 Ft. wide cut to within 4" off the ground

Height: Minimum wire height will be 24 feet above the ground

Insulators: Porcelain and/or Polymer - gray in color - approximately 3 feet in length

Guys: 3/8" High Strength Steel 7 strand

Anchors: Buried wooden logs (8' or 5' in length) or "Screw" anchors twisted into the earth

Property Rights: Transmission Line Easements

You may leave this form at the registration table as you leave tonight or pick up a return envelope in which to mail us the form at a later time. Responses must be received by 5:00 p.m. Tuesday, February 14, 1995 to be considered.
This survey will allow us to get your opinions on specific issues regarding the siting of our transmission facility. Your response will assist our design group in understanding public concerns and allow them to incorporate those concerns in the final route selection. Thank you for your help.

1. The following information is optional but could be useful if follow-up is needed. (Names and addresses are considered confidential and are for EKPC use only)

   Name: [Redacted]  County: Marion
   Address: [Redacted]  Zip  420.33-9105
   Location of property: #1 on Hwy 49 (_corrected in red)

2. Which of the following applies to your situation?

   □ Live within the corridor.
   □ Work within the corridor.
   □ Frequently travel the roads in the corridor.
   □ Live in Marion County, but outside the corridor.
   □ Other, please specify.

Will box run home, or on both sides with an even larger power line within 0.6 mi. of our house (total) + 1 substation. (Redacted)

3. Many criteria are involved in the siting of a transmission line. Please choose the four most important to you in regard to the siting of this transmission line. The most important item will be No. 1, the least important No. 4.

   □ Crossing Agricultural Land.
   □ Crossing Wooded or Forest Land.
   □ Crossing Streams or Wetlands.
   □ Road Crossings.
   □ Proximity to Residences.
   □ Proximity to Barns or Sheds.
   □ Proximity to Commercial or Industrial Areas.
   □ Proximity to Historic or Archaeological Sites.
   □ Visibility.
   □ Construction Cost.
   □ Other, please specify below.

(1) My Families Health
4. Are you aware of any buildings or landmarks in the study area that may be architecturally or historically important? If so, please specify location.

The components of our house range from 100 to 150 years old. Our farm has been in the Mattingly family for approximately 200 years; we are the 7th generation. At least four of those seven generations have lived in this house. During the Bicentennial anniversary, our home was recognized.

5. You may be aware of unique or specific information regarding this corridor. Please describe any special items of interest or concern below such as scenic areas, recreation areas, or new homes. Please give the location of the item or contact one of the representatives to mark it on a map.

It will devalue this land and could reduce the productivity of this farm.

6. Please summarize what you feel are the most important qualities or resources of the area.

If you have any additional comments, please list on back of this page.

(MARIONCO.DOC)

We are opposed to this line being built. From the information we have gathered, the Kentucky Utility company and the East Kentucky Power Company sat down to negotiate and were unable to come to terms. We do not feel that a Power Company should be able to condemn our property to fit their financial purposes. We know that there is a law allowing electric companies to condemn land for the advancement of community progress, but we feel that this company is misusing this law when there is a power source much closer to the location where it is needed. We also feel that they do not have the right to force me and my family to be exposed to the health hazards and the loss of value to our home and land when there is no need for the power lines to be brought out this far.
To Whom This May Concern:

The arrival of the first notice of your plans to construct a power line on our property has brought a lot of stress to our family. We were relieved when the first meeting was canceled. But then when we received the second notice, we made some contacts, and were led to believe that if we just attended the meeting that it would make a difference. Needless to say we went home more upset then when we arrived. Now, we are dealing with sleepless nights, as well as a great deal of stress.

Our farm has been in the Mattingly family for approximately 200 years; we are the 7th generation. We had hoped it would remain in the Mattingly family for years to come. But because of the plans you have shown us, this could make this tradition come to an end. I would not want my children to live in the middle of this magnetic field, because with the addition of this new power line, our home will be boxed in between five power lines, and I wish that upon no one.

The land owner across from my father, sold the land for the power station October 10, 1956. My father was allowed no opinion on this matter. My father always felt it was the beginning of hell, and would haunt the Mattingly family for years to come. As I stated above, at the present time we have power lines on three sides of our house. Two of these were forced upon my father in his lifetime, and he was very upset with the loss of power land owners have when dealing with large companies. A few years later my father had a mental breakdown, in which we feel this situation contributed.

We were married in 1967, and for three years, lived in the little house next to the substation. My wife was always fearful of the effects this had on our health. My wife did have a miscarriage during this time, and we always questioned, why? We are very concerned about our family's health.

We feel that four different power lines are more than our share of the responsibility to the public. We suggest that you either reroute the whole power line, or move the line onto the land that profited from the original sale of the substation to the Eastern Kentucky Power Cooperative. I have shown this in your diagram, as an example of my suggestions. (see attached pg.). All should share the burden of the power lines, instead of just a few.
Your company wants us to believe that these lines are harmless to man and animals. But I have read reports that power lines do have an effect on dairy cattle, and our main source of income, pertaining to the farm are beef cattle.

We feel an obligation to this farm land, and it would be very difficult for us to pick up and leave my family heritage. Others may not have a past tieing them to their land, and can easily leave if they are concerned with their health. Consideration of this letter would be very much appreciated, thank you.

Sincerely,

Richard L. Mattingly

(c) That: My wife & I are very opposed to the construction of the
(proposed power line by East Ky. Power) that may pass through our
necessary, the specific act, fully and clearly, or facts

property which we bought at auction last year to build a home
(that are the reason and basis for the complaint.)

House on beginning this May 1965 I have enclosed a copy of the

map on which I draw the approximate size and location of our lot. It is 209' wide by 686.5' long. A power line runs through it or in its immediate proximity would destroy most of the value of our lot and our plans of building our dream home. If you have any information you can give me on this matter feel free to call me at 502-692-4499. 

Therefore, complainant asks that East Ky. Power follow their alternative plan to run a line approximately 500' north instead of 1/2 mile to our line and by their electricity from them. Why ruin 1/2 mile of property when the same task can be accomplished in 500'.
COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION
