- 4.1.3.2.1 Unbundled Local Switching, together with Common Transport and, if necessary, Tandem Switching, provides to Cinergy Communications local subscribers local calling and the ability to presubscribe to a primary carrier for intraLATA toll service and a primary carrier for interLATA toll service.
- 4.1.3.2.2 Provided that Cinergy Communications purchases unbundled local switching from BellSouth and uses the BellSouth CIC for its end users' LPIC or if a BellSouth local end user selects BellSouth as its LPIC, then the Parties will consider as local any calls originated by an Cinergy Communications local end user, or originated by a BellSouth local end user and terminated to an Cinergy Communications local end user, where such calls originate and terminate in the same LATA, except for those calls originated and terminated through switched access arrangements (i.e., calls that are transported by a party other than BellSouth). For such calls, BellSouth will charge Cinergy Communications the UNE elements for the BellSouth facilities utilized. Neither Party shall bill the other originating or terminating switched access charges for such calls. Intercarrier compensation for local calls between BellSouth and Cinergy Communications shall be as described in BellSouth's UNE Local Call Flows set forth on BellSouth's web site.
- 4.1.3.2.3 Where Cinergy Communications purchases unbundled local switching from BellSouth but does not use the BellSouth CIC for its end users' LPIC, BellSouth will consider as local those direct dialed telephone calls that originate from an Cinergy Communications end user and terminate within the basic local calling area or within the extended local calling areas and that are dialed using 7 or 10 digits as defined and specified in Section A3 of BellSouth's General Subscriber Services Tariffs. For such local calls, BellSouth will charge Cinergy Communications the UNE elements for the BellSouth facilities utilized. Intercarrier compensation for local calls between BellSouth and Cinergy Communications shall be as described in BellSouth's UNE Local Call Flows set forth on BellSouth's web site.
- 4.1.3.2.4 For any calls that originate and terminate through switched access arrangements (i.e., calls that are transported by a party other than BellSouth), BellSouth shall bill Cinergy Communications the UNE elements for the BellSouth facilities utilized. Each Party may bill the toll provider originating or terminating switched access charges, as appropriate.
- 4.1.3.2.5 Reverse billed toll calls, such as intraLATA 800 calls, calling card calls and third party billed calls, where BellSouth is the carrier shall also be considered as local calls and Cinergy Communications shall not bill BellSouth originating or terminating switched access for such calls.
- 4.1.3.2.6 BellSouth shall assess retroactive charges for UNE transport and switching associated with using the BellSouth LPIC if a CLEC has been able to

Exhibit E

previously select BellSouth as the end user LPIC prior to the option allowing the selection of a BellSouth provided LATA-wide local calling area being offered.
