Subject Kentucky Utilities Proposed Rate Increase

I feel the Residential Proposed increase would hurt the people that can least afford to pay, I have served on the Pennyrite Aging Council. Some of the people in this age group are on a very small fixed income.

Would you please consider this sample illustration, KU is proposing a \$900 Base, and 4.145 for all KWH used per month. This illustration would propose 4.43 Base and 4.797 for the first 700 KWH used per mo.

KU Proposal would be 700 KWH^x at 4.145 would be \$2902 + \$900 base total \$3802

The Proposed illustration would be 700 KWH at 4.797 - \$3359 + Base \$4.43 Total \$38.02

Example of Changes on monthly Billings

Ku Proposal		Sample Illustration	
Base \$900		Base 443	
0 KWH \$900	\$900	\$443	443
100 KWH + 415	\$13.15	923	430 - \$923
200 KWH	1730	14.03	
300	2145	18.03	
400	2560	23.63	
500	2975	28.43	
600	3390	33.23	
700 W	3802	38.02	

General Service Rate may need a little fine tuning, I am proud to say I had forty good years with Kentucky Utilities. I have been retired for fifteen years.

Sincerely,
Bayless Waddington
