To Whom It May Concern:

I just read the notice in the Barbourville Advocate that Delta was proposing to raise their rates. I think that this is absolutely ludicrous! Gas rates are already outrageous. I own my own company and make what most would consider a good living, and I still usually end up paying my bill in two installments. I can't even begin to imagine how the elderly depending on a social security check every month pays for such rates. I do understand inflation and what that does to business, but like I stated before gas rates are already ridiculous! I seriously hope and pray that the individuals involved in making this decision think of the people that it would seriously affect.

Thank you,

Audrey Sizemore
