Mr. Michael H. Core
President and CEO
Big Rivers Electric Corporation
201 Third Street, PO Box 24
Henderson KY 42419-0024

RE: NOTICE OF PROPOSED ELECTRIC TRANSMISSION LINE
CONSTRUCTION PROJECT

Dear Mr. Core:

As you know, Big Rivers Electric Corporation ("Big Rivers") proposes to construct a 161,000 volt transmission line in Breckinridge and Meade Counties, Kentucky.

The purpose of the proposed transmission line is to increase the reliability of the wholesale electric supply to seven electric distribution substations from which Meade County Rural Electric Cooperative Corporation provides retail electric service to approximately 9,800 customers in Meade and Breckinridge Counties. This improvement is designed to reduce substantially the risk of electric service outages during storms similar to those experienced in your area in July of this year.

The route for the proposed line begins at an existing line located approximately 3 miles west of Hardinsburg in central Breckinridge County and extends 17.3 miles in a general northeasterly direction to end in an existing Big Rivers substation located northeast of Irvington in southwestern Meade County. The transmission line will typically be mounted on single steel pole structures with some two-pole structures used to accommodate very long spans from hilltop to hilltop along the proposed route. A map showing the route of the proposed line is attached to this letter.

Big Rivers plans to file an application with the Kentucky Public Service Commission ("Commission"), on or about October 21, 2004, seeking a certificate of public convenience and necessity authorizing this project. The purpose of the Commission's review of Big Rivers' application is to determine whether the proposed transmission line is required by the public convenience and necessity. You have a right to move to intervene and participate in that proceeding. You also have the right to request the Commission to conduct a public hearing on that application in either Breckinridge or Meade County.

Mr. Michael H. Core
October 18, 2004
Page 2

If you choose to intervene in the Commission's proceeding on Big Rivers' application for a certificate of public convenience and necessity, or to request a public hearing in that case, you should contact the Executive Director, Public Service Commission, 211 Sower Boulevard, P.O. Box 615, Frankfort, Kentucky 40602, telephone number (502) 564-3940. The docket number under which this application will be processed is 2004-00365. If you have any questions for me, you may reach me at (270) 827-2561.

Sincerely yours,

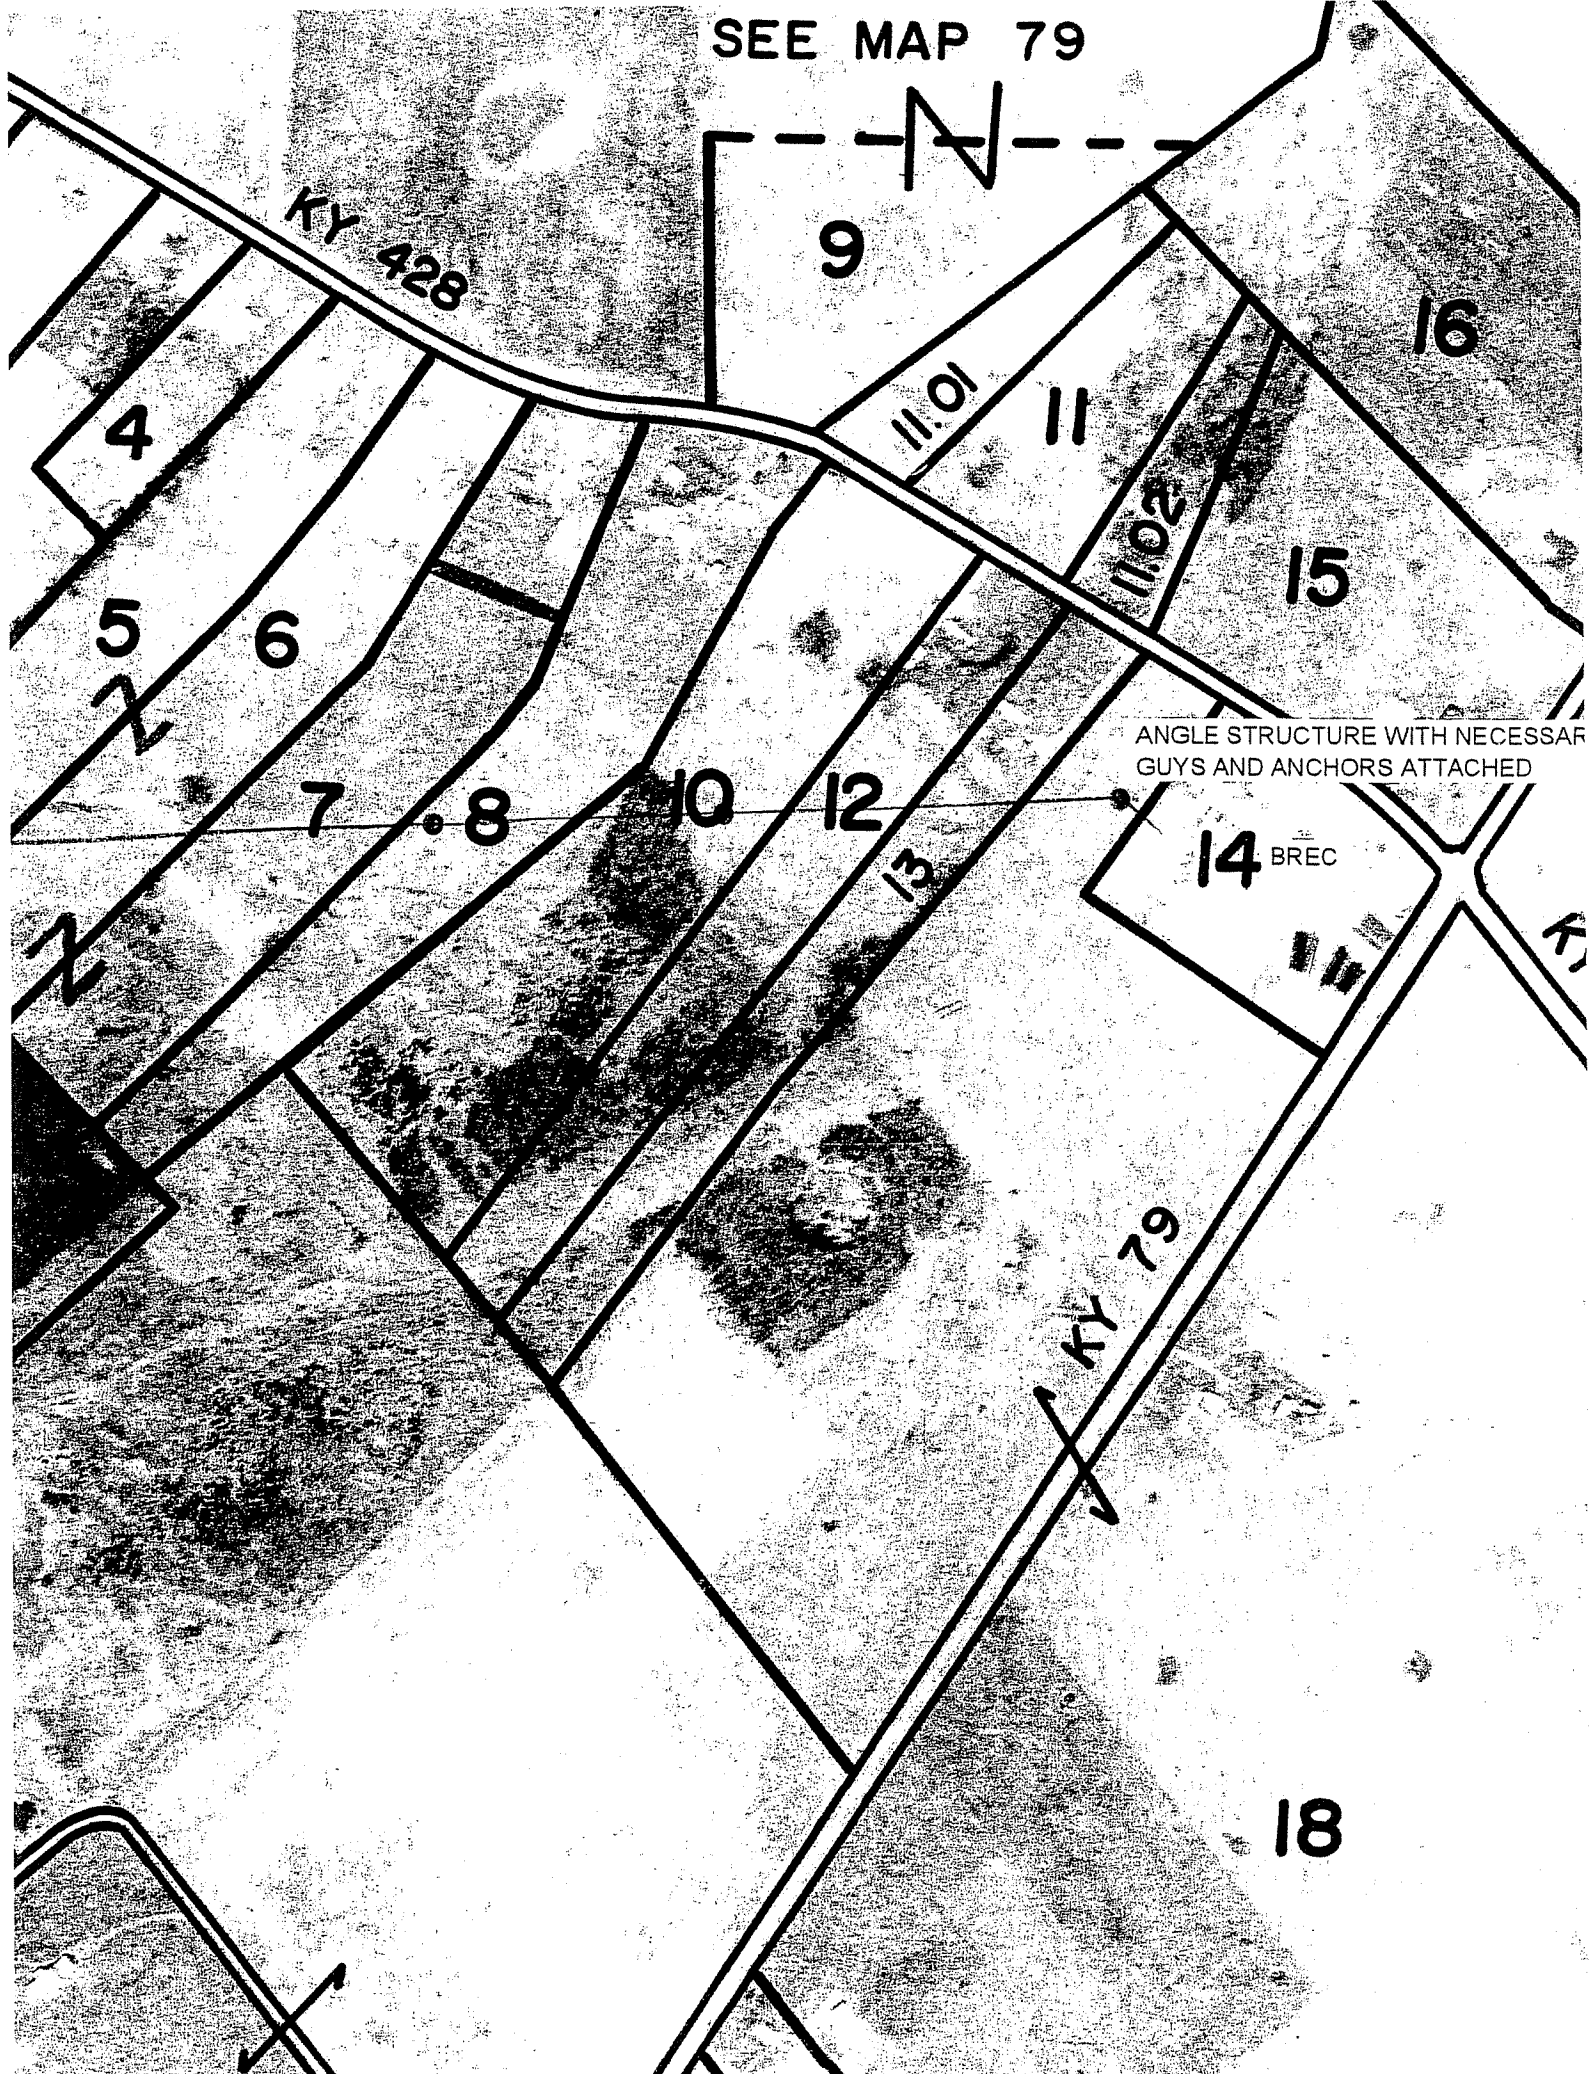

A handwritten signature in cursive script that reads "David G. Crockett".

RE: NOTICE OF PROPOSED ELECTRIC TRANSMISSION LINE
CONSTRUCTION PROJECT

Dear Ms. Huntsman:

As you know, Big Rivers Electric Corporation ("Big Rivers") proposes to construct a 161,000 volt transmission line in Breckinridge and Meade Counties, Kentucky. Because this line is expected to cross your property, Jerry Johnson, Real Estate Manager at Big Rivers, talked with you by telephone on June 4, 2003, and explained our need to perform a field survey to accurately locate and design the proposed electric line. The survey and line design have now been completed. Mr. Johnson or some other representative from Big Rivers will be back in contact with you to discuss purchasing from you an easement across your property for that proposed electric line.

The purpose of the proposed transmission line is to increase the reliability of the wholesale electric supply to seven electric distribution substations from which Meade County Rural Electric Cooperative Corporation provides retail electric service to approximately 9,800 customers in Meade and Breckinridge Counties. This improvement is designed to reduce substantially the risk of electric service outages during storms similar to those experienced in your area in July of this year.

The route for the proposed line begins at an existing line located approximately 3 miles west of Hardinsburg in central Breckinridge County and extends 17.3 miles in a general northeasterly direction to end in an existing Big Rivers substation located northeast of Irvington in southwestern Meade County. The transmission line will typically be mounted on single steel pole structures with some two-pole structures used to accommodate very long spans from hilltop to hilltop along the proposed route. A map showing the route of the proposed line is attached to this letter.

Big Rivers plans to file an application with the Kentucky Public Service Commission ("Commission"), on or about October 21, 2004, seeking a certificate of public convenience and necessity authorizing this project. The purpose of the Commission's review of Big Rivers' application is to determine whether the proposed transmission line is required by the public convenience and necessity. You have a right to move to intervene and participate in that proceeding. You also have the right to request the Commission to conduct a public hearing on that application in either Breckinridge or Meade County.

Gary F. Dowell
Route 2, Box 259B
Hardinsburg, KY 40143

RE: NOTICE OF PROPOSED ELECTRIC TRANSMISSION LINE
CONSTRUCTION PROJECT

Dear Mr. Dowell:

As you know, Big Rivers Electric Corporation ("Big Rivers") proposes to construct a 161,000 volt transmission line in Breckinridge and Meade Counties, Kentucky. Because this line is expected to cross your property, Jerry Johnson, Real Estate Manager at Big Rivers, talked with you on June 4, 2003, and explained our need to perform a field survey to accurately locate and design the proposed electric line. The survey and line design have now been completed. Mr. Johnson or some other representative from Big Rivers will be back in contact with you to discuss purchasing from you an easement across your property for that proposed electric line.

The purpose of the proposed transmission line is to increase the reliability of the wholesale electric supply to seven electric distribution substations from which Meade County Rural Electric Cooperative Corporation provides retail electric service to approximately 9,800 customers in Meade and Breckinridge Counties. This improvement is designed to reduce substantially the risk of electric service outages during storms similar to those experienced in your area in July of this year.

The route for the proposed line begins at an existing line located approximately 3 miles west of Hardinsburg in central Breckinridge County and extends 17.3 miles in a general northeasterly direction to end in an existing Big Rivers substation located northeast of Irvington in southwestern Meade County. The transmission line will typically be mounted on single steel pole structures with some two-pole structures used to accommodate very long spans from hilltop to hilltop along the proposed route. A map showing the route of the proposed line is attached to this letter.

Big Rivers plans to file an application with the Kentucky Public Service Commission ("Commission"), on or about October 21, 2004, seeking a certificate of public convenience and necessity authorizing this project. The purpose of the Commission's review of Big Rivers' application is to determine whether the proposed transmission line is required by the public convenience and necessity. You have a right to move to intervene and participate in that proceeding. You also have the right to request the Commission to conduct a public hearing on that application in either Breckinridge or Meade County.

Gary F. Dowell

Randall W. Bobb
14041 W. Sawmill Rd.
Columbus, IN 47201

RE: NOTICE OF PROPOSED ELECTRIC TRANSMISSION LINE
CONSTRUCTION PROJECT

Dear Mr. Bobb:

As you know, Big Rivers Electric Corporation ("Big Rivers") proposes to construct a 161,000 volt transmission line in Breckinridge and Meade Counties, Kentucky. Because this line is expected to cross the property of the late May Dell Bobb, Jerry Johnson, Real Estate Manager at Big Rivers, talked with you by telephone on July 15, 2003, and explained our need to perform a field survey to accurately locate and design the proposed electric line. If you are not the personal representative of Ms. Bobb, please pass this letter to that person. Mr. Johnson or some other representative from Big Rivers will be back in contact with you to discuss purchasing from you an easement across your property for that proposed electric line.

The purpose of the proposed transmission line is to increase the reliability of the wholesale electric supply to seven electric distribution substations from which Meade County Rural Electric Cooperative Corporation provides retail electric service to approximately 9,800 customers in Meade and Breckinridge Counties. This improvement is designed to reduce substantially the risk of electric service outages during storms similar to those experienced in your area in July of this year.

The route for the proposed line begins at an existing line located approximately 3 miles west of Hardinsburg in central Breckinridge County and extends 17.3 miles in a general northeasterly direction to end in an existing Big Rivers substation located northeast of Irvington in southwestern Meade County. The transmission line will typically be mounted on single steel pole structures with some two-pole structures used to accommodate very long spans from hilltop to hilltop along the proposed route. A map showing the route of the proposed line is attached to this letter.

Big Rivers plans to file an application with the Kentucky Public Service Commission ("Commission"), on or about October 21, 2004, seeking a certificate of public convenience and necessity authorizing this project. The purpose of the Commission's review of Big Rivers' application is to determine whether the proposed transmission line is required by the public convenience and necessity. You have a right to move to intervene and participate in that proceeding. You also have the right to request the Commission to conduct a public hearing on that application in either Breckinridge or Meade County.

Randall W. Bobb
October 18, 2004

RE: NOTICE OF PROPOSED ELECTRIC TRANSMISSION LINE
CONSTRUCTION PROJECT

Dear Ms. Phelps:

As you know, Big Rivers Electric Corporation ("Big Rivers") proposes to construct a 161,000 volt transmission line in Breckinridge and Meade Counties, Kentucky. Because this line is expected to cross the property of the late May Dell Bobb, Jerry Johnson, Real Estate Manager at Big Rivers, talked with you by telephone on July 15, 2003, and explained our need to perform a field survey to accurately locate and design the proposed electric line. If you are not the personal representative of Ms. Bobb, please pass this letter to that person Mr. Johnson or some other representative from Big Rivers will be back in contact with you to discuss purchasing from you an easement across your property for that proposed electric line..

The purpose of the proposed transmission line is to increase the reliability of the wholesale electric supply to seven electric distribution substations from which Meade County Rural Electric Cooperative Corporation provides retail electric service to approximately 9,800 customers in Meade and Breckinridge Counties. This improvement is designed to reduce substantially the risk of electric service outages during storms similar to those experienced in your area in July of this year.

The route for the proposed line begins at an existing line located approximately 3 miles west of Hardinsburg in central Breckinridge County and extends 17.3 miles in a general northeasterly direction to end in an existing Big Rivers substation located northeast of Irvington in southwestern Meade County. The transmission line will typically be mounted on single steel pole structures with some two-pole structures used to accommodate very long spans from hilltop to hilltop along the proposed route. A map showing the route of the proposed line is attached to this letter.

Big Rivers plans to file an application with the Kentucky Public Service Commission ("Commission"), on or about October 21, 2004, seeking a certificate of public convenience and necessity authorizing this project. The purpose of the Commission's review of Big Rivers' application is to determine whether the proposed transmission line is required by the public convenience and necessity. You have a right to move to intervene and participate in that proceeding. You also have the right to request the Commission to conduct a public

Saundra Bobb Phelps

Page 2

hearing on that application in either Breckinridge or Meade County.

If you choose to intervene in the Commission's proceeding on Big Rivers' application for a certificate of public convenience and necessity, or to request a public hearing in that case, you should contact the Executive Director, Public Service Commission, 211 Sower Boulevard, P.O. Box 615, Frankfort, Kentucky 40602, telephone number (502) 564-3940. The docket number under which this application will be processed is 2004-00365. If you have any questions for me, you may reach me at (270) 827-2561.

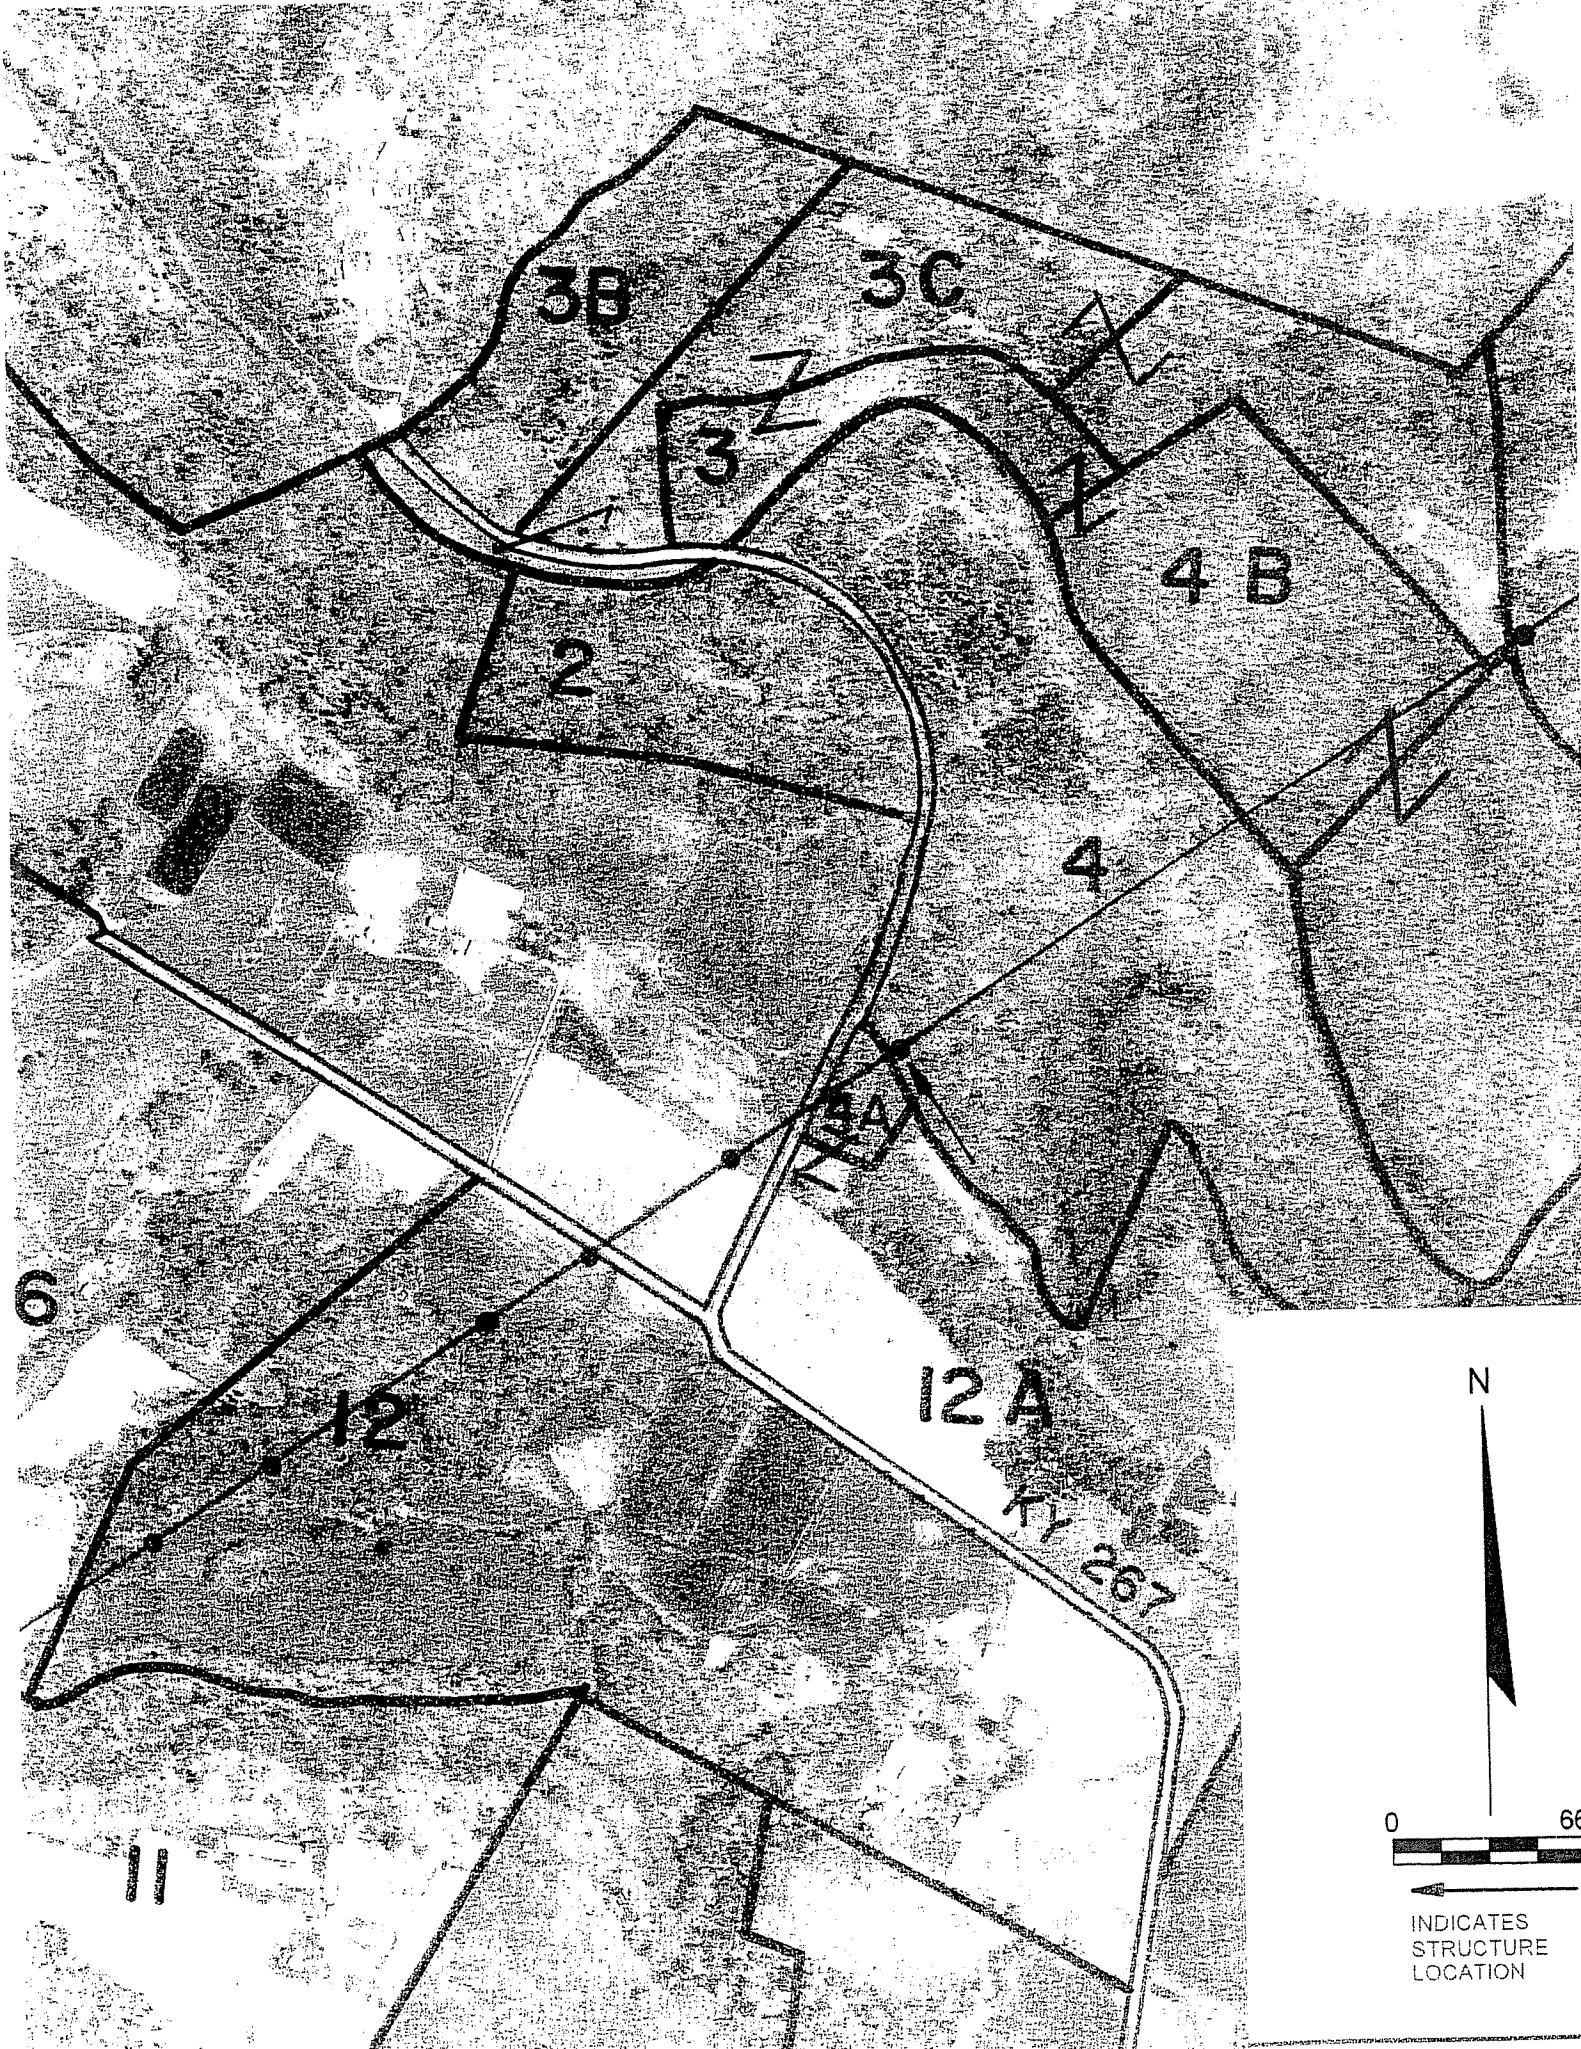

Sincerely yours,

David G. Crockett

RE: NOTICE OF PROPOSED ELECTRIC TRANSMISSION LINE
CONSTRUCTION PROJECT

Dear Mr. Brooks:

As you know, Big Rivers Electric Corporation ("Big Rivers") proposes to construct a 161,000 volt transmission line in Breckinridge and Meade Counties, Kentucky. Because this line is expected to cross your property, Jerry Johnson, Real Estate Manager at Big Rivers, talked with you on June 12, 2003, and explained our need to perform a field survey to accurately locate and design the proposed electric line. The survey and line design have now been completed. Mr. Johnson or some other representative from Big Rivers will be back in contact with you to discuss purchasing from you an easement across your property for that proposed electric line.

The purpose of the proposed transmission line is to increase the reliability of the wholesale electric supply to seven electric distribution substations from which Meade County Rural Electric Cooperative Corporation provides retail electric service to approximately 9,800 customers in Meade and Breckinridge Counties. This improvement is designed to reduce substantially the risk of electric service outages during storms similar to those experienced in your area in July of this year.

The route for the proposed line begins at an existing line located approximately 3 miles west of Hardinsburg in central Breckinridge County and extends 17.3 miles in a general northeasterly direction to end in an existing Big Rivers substation located northeast of Irvington in southwestern Meade County. The transmission line will typically be mounted on single steel pole structures with some two-pole structures used to accommodate very long spans from hilltop to hilltop along the proposed route. A map showing the route of the proposed line is attached to this letter.

Big Rivers plans to file an application with the Kentucky Public Service Commission ("Commission"), on or about October 21, 2004, seeking a certificate of public convenience and necessity authorizing this project. The purpose of the Commission's review of Big Rivers' application is to determine whether the proposed transmission line is required by the public convenience and necessity. You have a right to move to intervene and participate in that proceeding. You also have the right to request the Commission to conduct a public hearing on that application in either Breckinridge or Meade County.

Bill H. Brooks

RE: NOTICE OF PROPOSED ELECTRIC TRANSMISSION LINE
CONSTRUCTION PROJECT

Dear Mr. Roach:

As you know, Big Rivers Electric Corporation ("Big Rivers") proposes to construct a 161,000 volt transmission line in Breckinridge and Meade Counties, Kentucky. Because this line is expected to cross your property, Jerry Johnson, Real Estate Manager at Big Rivers, talked with Mrs. Roach on June 23, 2003, and explained our need to perform a field survey to accurately locate and design the proposed electric line. The survey and line design have now been completed. Mr. Johnson or some other representative from Big Rivers will be back in contact with you to discuss purchasing from you an easement across your property for that proposed electric line.

The purpose of the proposed transmission line is to increase the reliability of the wholesale electric supply to seven electric distribution substations from which Meade County Rural Electric Cooperative Corporation provides retail electric service to approximately 9,800 customers in Meade and Breckinridge Counties. This improvement is designed to reduce substantially the risk of electric service outages during storms similar to those experienced in your area in July of this year.

The route for the proposed line begins at an existing line located approximately 3 miles west of Hardinsburg in central Breckinridge County and extends 17.3 miles in a general northeasterly direction to end in an existing Big Rivers substation located northeast of Irvington in southwestern Meade County. The transmission line will typically be mounted on single steel pole structures with some two-pole structures used to accommodate very long spans from hilltop to hilltop along the proposed route. A map showing the route of the proposed line is attached to this letter.

Big Rivers plans to file an application with the Kentucky Public Service Commission ("Commission"), on or about October 21, 2004, seeking a certificate of public convenience and necessity authorizing this project. The purpose of the Commission's review of Big Rivers' application is to determine whether the proposed transmission line is required by the public convenience and necessity. You have a right to move to intervene and participate in that proceeding. You also have the right to request the Commission to conduct a public hearing on that application in either Breckinridge or Meade County.

RE: NOTICE OF PROPOSED ELECTRIC TRANSMISSION LINE
CONSTRUCTION PROJECT

Dear Mr. Harmon:

As you know, Big Rivers Electric Corporation ("Big Rivers") proposes to construct a 161,000 volt transmission line in Breckinridge and Meade Counties, Kentucky. Because this line is expected to cross your property, Jerry Johnson, Real Estate Manager at Big Rivers, has talked with you, and explained our need to perform a field survey to accurately locate and design the proposed electric line. Mr. Johnson or some other representative from Big Rivers will be back in contact with you to discuss purchasing from you an easement across your property for that proposed electric line.

The purpose of the proposed transmission line is to increase the reliability of the wholesale electric supply to seven electric distribution substations from which Meade County Rural Electric Cooperative Corporation provides retail electric service to approximately 9,800 customers in Meade and Breckinridge Counties. This improvement is designed to reduce substantially the risk of elin your area in July of this year.

The route for the proposed line begins at an existing line located approximately 3 miles west of Hardinsburg in central Breckinridge County and extends 17.3 miles in a general northeasterly direction to end in an existing Big Rivers substation located northeast of Irvington in southwestern Meade County. The transmission line will typically be mounted on single steel pole structures with some two-pole structures used to accommodate very long spans from hilltop to hilltop along the proposed route. A map showing the route of the proposed line is attached to this letter.

Big Rivers plans to file an application with the Kentucky Public Service Commission ("Commission"), on or about October 21, 2004, seeking a certificate of public convenience and necessity authorizing this project. The purpose of the Commission's review of Big Rivers' application is to determine whether the proposed transmission line is required by the public convenience and necessity. You have a right to move to intervene and participate in that proceeding. You also have the right to request the Commission to conduct a public hearing on that application in either Breckinridge or Meade County.

Joseph B. Harmon
October 18, 2004
Page 2

If you choose to intervene in the Commission's proceeding on Big Rivers' application for a certificate of public convenience and necessity, or to request a public hearing in that case, you should contact the Executive Director, Public Service Commission, 211 Sower Boulevard, P.O. Box 615, Frankfort, Kentucky 40602, telephone number (502) 564-3940. The docket number under which this application will be processed is 2004-00365. If you have any questions for me, you may reach me at (270) 827-2561.

Mr. Johnson or some other representative from Big Rivers will be back in contact with you to discuss purchasing from you an easement across your property for that proposed electric line.

The purpose of the proposed transmission line is to increase the reliability of the wholesale electric supply to seven electric distribution substations from which Meade County Rural Electric Cooperative Corporation provides retail electric service to approximately 9,800 customers in Meade and Breckinridge Counties. This improvement is designed to reduce substantially the risk of electric service outages during storms similar to those experienced in your area in July of this year.

The route for the proposed line begins at an existing line located approximately 3 miles west of Hardinsburg in central Breckinridge County and extends 17.3 miles in a general northeasterly direction to end in an existing Big Rivers substation located northeast of Irvington in southwestern Meade County. The transmission line will typically be mounted on single steel pole structures with some two-pole structures used to accommodate very long spans from hilltop to hilltop along the proposed route. A map showing the route of the proposed line is attached to this letter.

Big Rivers plans to file an application with the Kentucky Public Service Commission ("Commission"), on or about October 21, 2004, seeking a certificate of public convenience and necessity authorizing this project. The purpose of the Commission's review of Big Rivers' application is to determine whether the proposed transmission line is required by the public convenience and necessity. You have a right to move to intervene and participate in that proceeding. You also have the right to request the Commission to conduct a public hearing on that application in either Breckinridge or Meade County.

Gordon Board
October 18, 2004
Page 2

If you choose to intervene in the Commission's proceeding on Big Rivers' application for a certificate of public convenience and necessity, or to request a public hearing in that case, you should contact the Executive Director, Public Service Commission, 211 Sower Boulevard, P.O. Box 615, Frankfort, Kentucky 40602, telephone number (502) 564-3940. The docket number under which this application will be processed is 2004-00365. If you have any questions for me, you may reach me at (270) 827-2561.

Sincerely yours,

David G. Crockett
