**Supplemental Request for Information
Posed by the Attorney General to
Louisville Gas & Electric Company
Case No. 2004-00421**

1. Refer to the response to question 6 that indicates that R(m) has always exceeded E(m). The question is restated as follows: Please provide an example and elaborate on the circumstances or conditions where the monthly “Environmental Cost Recovery Surcharge” jurisdictional revenues derived from applying the monthly Environmental Surcharge Factor to all electric rate schedules **would exceed** the jurisdictional total of each approved environmental compliance plan revenue requirement of environmental compliance costs that are over and above the revenues associated with “Base Environmental Surcharge Factor.” In other words, are there circumstances when more revenues could be collected than are intended, and if so, what are they?

2. Refer to the response to question 7 that indicates that the Environmental Surcharge Billing Factor would have to exceed 100% . The question is restated as follows: Please provide an example and elaborate on the circumstances or conditions where the monthly “Environmental Cost Recovery Surcharge” jurisdictional revenues derived from applying the monthly Environmental Surcharge Factor to all electric rate schedules **would be less than** the jurisdictional total of each approved environmental compliance plan revenue requirement of environmental compliance costs that are over and above the revenues associated with “Base Environmental Surcharge Factor.” In other words, are there circumstances when less revenues are collected than are intended and if so, what are they?
