Greetings -

I am writing to let you know that I oppose having Eastern Ky. Power Cooperative's plan to blast a 100 ft. wide, 4.8 miles long clear cut area through our national forest.

Furthermore, I am opposed to clear cut areas being maintained with herbicides. These chemicals are a health hazard to humans and the creatures of the forest.

Our national forest is too precious to be chopped in to little bits for every industry that wants a free handout.

Thank you for your consideration.

Yours,
Donna W. Goebeler
