RE: PSC Docket 2005-00207

My property will be crossed by East Kentucky Power's proposed transmission line to Warren Rural Electric. I am opposed to this line and request that the PSC schedule a local hearing concerning this line.

Since I understand that EKPC must obtain a certificate of public convenience and necessity from the PSC, I assume that they must prove this line is a necessity in order to receive PSC approval. Am I correct in that assumption ?

Also can you provide me with information that will give me an idea about what information the PSC would consider *valid reasons not to build this line*? Or is this just a formality in the approval process?

I appreciate your help.
