Mary Jane Warner Open House contact with Joey Roberts and Hugh Hendrick
May 3&4, 2005

Spoke with Mr. Roberts and Mr. & Mrs. Hendrick on a variety of issues, especially EMF. I accompanied Mr. Robert and Mr. Hendrick to Mr. Robert's home to make EMF measurements under and around the existing transmission line. Mr. Roberts made note of those values.

Mr. Roberts asked a variety of questions related to the need for the project and regulatory procedures related to the project.

We also discussed the idea of rebuilding the existing line instead of co-locating which created a "cross over" point on his property. His concerns about these matters were passed on to the designers for the project.
