Ms. O'Donnell,

PSC Case #
2005-00207

If on a land more and strongly opposed to the application submitted by EKP. A Geological survey should be done in that the area is an extreme Golf region and may not support utility poles that carry 161 KV of electricity. Furthermore if do not think it possible for EKP to have done an adequate study on the effects on endangered species in such a short time. This would take two-three years.
Thank you!
Betsy McDonald

Ms. O'Donnell,
As a citizen of Glasgow and Barren County, I am strongly opposed to the application above by EKP. This proposed route for a powerline goes right through a ^(Scotty's construction) business that is vital to our entire community and the surrounding counties. Please protect our natural resources.

A concerned citizen,
Stephen J. Matson

PSC Case #
