PUBLIC SERVICE COMMISSION

### In the Matters of:

Investigation into the Membership of Louisville Gas and Electric Company and Kentucky Utilities Company in the Midwest Independent Transmission System Operator, Inc.

Application of Louisville Gas and Electric Company and Kentucky Utilities Company to Transfer Functional Control of Their Transmission System Case No. 2003-00266

Case No. 2005-00471

# Notice of Filing by Midwest Independent Transmission System Operator, Inc.

Midwest Independent Transmission System Operator, Inc. ("Midwest ISO"), a full intervenor in Case No. 2003-00266 and an applicant for intervention in Case No. 2005-00471, hereby gives notice of the filing in the above-captioned proceedings of the attached letter and Exhibit A thereto. This letter was filed with the Federal Energy Regulatory Commission on June 5, 2006, in Docket Nos. EC06-4-000 and ER06-20-000 et al., by the Midwest ISO jointly with the applicants in those dockets, Louisville Gas and Electric Company (LG&E) and Kentucky Utilities Company ("KU"). Filing and service in these proceedings is intended to apprise the Commission, its staff, and the parties of the tasks required to complete a safe and reliable withdrawal of the LG&E and KU transmission systems from the Midwest ISO and of certain key dates in the process.

Re: L

LG&E Energy, LLC, et al.

Docket Nos. EC06-4-000 et al. and ER06-20-000 et al.

Dear Secretary Salas:

This letter is filed jointly by the Midwest Independent Transmission System Operator, Inc. ("Midwest ISO") and Applicants in the above-captioned dockets (Louisville Gas & Electric Company ("LG&E") and Kentucky Utilities Company ("KU")). As discussed herein, Applicants and Midwest ISO jointly request that the Commission move expeditiously to issue final orders on rehearing and on compliance in this proceeding, no later than July 7, 2006.

The Midwest ISO and E.ON U.S. (on behalf of LG&E and KU) have been meeting since the Commission's March 17 Order to identify and implement the necessary steps required to complete a safe and reliable withdrawal of the LG&E and KU transmission systems from the Midwest ISO.

The attached Exhibit A is the working checklist of tasks to be completed for a successful transfer of responsibilities from the Midwest ISO to the Tennessee Valley Authority ("TVA") and the Southwest Power Pool, Inc. ("SPP") by September 1, 2006. The purpose of this letter is to inform the Commission of certain key dates in this process that have significant financial impacts on both the Applicants and the remaining Midwest ISO members. For the reasons set out below, Midwest ISO and the Applicants encourage the Commission to issue final orders in this proceeding (*i.e.*, an order on the rehearings filed on April 17, 2006, and an order on the compliance filing submitted by the Applicants on April 11, 2006) by July 7, 2006.

One of the most important steps required to complete a safe and reliable withdrawal of the LG&E and KU systems is the update to the Midwest ISO network and commercial models.

The Honorable Magalie Roman Salas June 5, 2006 Page 2

These models are utilized extensively in reliability and market operations, including as a foundational element of the State Estimator which underlies Real Time reliability and market functions as well as Day Ahead and FTR market operations. As such, it is critical that these models accurately reflect both physical and commercial relationships, including for example, the definition of generation and load participating in the market.

To assure the accuracy of the models and continued reliable operations, the Midwest ISO has standardized the process and currently performs updates on a quarterly basis. The extensive testing required prior to placing a new model into production necessitates strict adherence to the timeline developed for the update process.

Based on the current quarterly model update schedule, by June 15, 2006, LG&E and KU must have delivered to Midwest ISO all of the changes in market assets and transmission facilities that are to be made in the Midwest ISO network and commercial models. This date is the final date for all market participants and Transmission Owners to make changes that will be reflected in the September 1, 2006 network and commercial models.

At the March 31, 2006 meeting on this subject, E.ON instructed Midwest ISO to make the changes to its network model and commercial model in anticipation of favorable final orders on compliance and rehearing from this Commission, and in advance of a final order from the Kentucky Commission in Case No. 2005-00471. The Midwest ISO has proceeded accordingly, on the assumption that on September 1, 2006, the Applicants will no longer be a member of the Midwest ISO.

Subsequent to the March 31 meeting, this Commission issued a tolling order to allow further consideration of the requests for rehearing in Docket Nos. EC06-4-000 and ER06-20-000. Also, the Kentucky Commission on May 31, 2006 issued its final order approving the withdrawal of LG&E and KU from the Midwest ISO.

E.ON has been informed that the latest possible date to change its instructions regarding the withdrawal is close-of-business, July 7, 2006. After that date it is physically impossible to alter the network model and commercial model in time for a September 1 implementation date. In addition, once E.ON is removed from the network model and commercial model, it will also no longer be possible to process transmission service requests using the current systems, which also rely on the network and commercial models. The only way to continue this function past September 1 would be to attempt to do so manually. With regard to reliability coordination, Midwest ISO believes that it could continue to perform this function for LG&E/KU after September 1, but would have available only the TLR solution, and would not be able to use redispatch as it does now to relieve congestion. Thus, if clear final orders are not received by

# TROUTMAN SANDERS LLP

The Honorable Magalie Roman Salas June 5, 2006 Page 3

July 7, 2006 any withdrawal could not take place until the next quarterly update in December 2006.

The Commission should also note that LG&E/KU must receive by July 7, 2006 an order from the Kentucky Commission in Case No. 2005-00471 approving LG&E and KU's transfer of operational control to SPP and TVA. LG&E and KU are taking similar steps to urge the Kentucky Commission to finally resolve that docket by July 7, 2006.

Thus, while the Midwest ISO and Applicants appreciate the complexity and importance of the issues in this docket, both parties jointly request that the Commission move expeditiously to issue final orders on rehearing and on compliance, so that the parties can be assured that neither LG&E/KU nor the remaining Midwest ISO market participants will be harmed by an order subsequent to July 7, 2006 that might alter the current withdrawal schedule from the Midwest ISO.

Sincerely,

/s/

Clifford S. Sikora Counsel for Applicants
