This is to bring to the attention of the PSC that according to the Elizabethtown News interprise 2-3-06 article titled: Utilities' mistake delays power line case. In this article it states Laura Douglas (spokeswoman for E.ON U.S.) that all property owner who had question or concerns about the project were individually talked with. This is not true. My mother Loetta G. Morris did not get an individual meeting with anyone. Only mail, saying could not call her because they did not have her number. This is a joke. I have watched my mother worry herself nearly to death over this deal. This would greatly hinder future development of the property in question.

She just recently recieved the updated letter about this delay now. She recieved mail with the name Lillian Morris. This is not even my mothers name. It is another property owner in the area. I wonder if she has gotten any information about this case at all. I really hope you stick with the short direct route anyway.

Sencerely,

Herbert W. Morris
