This is regarding property located at 2352 New Salem Church Road.

The farm has been in our family since 1973. My fondest memories in my life have been around that farm. I learned my work ethics there, buy working in the garden, tobacco patch and picking pickles.

Every day after we did our chores my sister and I would pack a lunch, grab a horse and go for a ride and a picnic. Never did we have to worry about anyone harassing us or kidnapping us. It was not part of the innocent culture of the farm.

When my nephews were born and we were fortunate enough to have a little sister in our family, I watched them do their chores, pack a lunch, grab a horse and go for a ride and a picnic. Never did we have to worry about anyone harassing them or kidnapping them.

All this will change. When you run a high voltage power line with your easements, and their insecticides and their employees going through farms, the innocence is gone. Lost forever will be chance for generations to come to enjoy the life of the farm all for you to steal land so that EON can fulfill its mission to be the largest power company in the world.

They need to use the easements they have, expand on them and not take what isn't theirs to take.

Sincerely,
Susan Harrison
