Subject: [WW Spam: medium] Transmission Lines
Auto forwarded by a Rule

This message is to urge you to refrain from granting E-on and KU permission to stretch transmission lines across the purposed pathways in Hardin County. We own one farm on New Salem Church Road between Big Springs and Hwy 920. This land is used for raising cattle as well as peaceful, healthy living. Another cattle farm is located on Hwy 920 (Salt River Road) between St. John Road and Hwy 86, used for the same things. The only difference between the two plans offered by E-on is that they satisfied the owner of the "Wildlife Preserve". Considering the number of property owners who oppose this situation, nothing has been changed. Again we urge you to refuse permission for these transmission lines as proposed. You are a public service commission and should be considering the desires and concerns of the public more than the requests of companies who are owned by foreign people and interested only in the monetary aspect of these plans. Kentucky will not benefit from these transmission lines. They will be used to sell electricity to many other states for the benefit of E-on. I sincerely hope you will give this request very serious consideration.

Sincerely,

Thomas & Vivian Morgan
