My name is Linda McKee and I live in Jamestown, KY, my area code is 270. It seems that not too many years ago that this area had to change its area code from 502 to 270. At that time my husband and I had a small tourist business. This hurt us. The tourist business works this way....Our local tourist department attends boat shows all winter, the local tourist business pays a tax to support this department. They take brochures of all the business in the area to these shows, potential tourists pick up the brochures, (phone numbers on brochures) and may not use them that year, they may refer back to these brochures several years later. The cost of advertising alone and printing hurt all small tourist businesses.

This time we are operating a small crane business, we have advertised in the yellow pages in our REGION for years. In the past few years we have been able to back off some of this advertising, just because we have done it for years, the old books are out there and are doing the job. It seems to me that our officials could certainly avoid this change! It also seems that this particular area has already gone thru this, PICK ON SOMEONE ELSE!

I don't usually write, I don't think it does any good, but this really is not fair. How is it possible to run out of numbers? Isn't this bad planning? As a resident I do not want to dial 10 digits for a local number, life is already complicated.
