To Whom It May

This is a letter to protest the rate increase with Western Mason Water District. I feel like a 35% increase for 100,000 gallons of water is ridiculous.

It wouldn't be so bad if they would have put a 6" line in where you could had some fire protection with fire hydrants. Dover fire dept. was going to give them hydrants but they would not install a 6" line. The worse is that the water company employee is telling us that another rate increase is coming next year.

Thanks,

Rick Prumpally
