Subject: RE: "Smart" Metering

Ms. King:

Thank you for your comments on smart metering. Your comments will be placed into the record of the case for the PSC's consideration. For your reference, should you wish to locate case documents on the PSC Web site, the case number in this matter is 2006-00045. Please include the case number in any future communications on this matter.

I should also note that the case before the PSC concerns only whether or not Kentucky should adopt federal standards that would require utilities to offer smart metering as an option to their customers. There is no thought, at this point, to making smart metering mandatory.

Thank you for your interest.

Yes, let's go to "smart metering"--HA!

Goodness knows, the people who work 1st or 2nd shift would LOVE to get awake and do laundry at 2 or 3 or 4 a.m. to avoid the higher rates...which we might have to do, considering the other heating and gasoline rate increases. (By the way--if YOU have a washer that automatically moves the clothes to the dryer, please let me know. I DON'T.)

I guess the 3rd-shifters will like this one, they're awake during "non-peak" hours...oh, wait, they're WORKING then....

BAD IDEA.
