**Re: LRN NPA-NXX for New Louisville Switch**

Case 2006-00050

Dear Ms. O'Donnell:

US LEC Corp. seeks intervention of the Commission in securing an NPA-NXX assignment for LRN purposes. US LEC Corp., on behalf of US LEC of Tennessee Inc., recently requested a new NPA-NXX for the Louisville rate center from Neustar. The request was for an NPA-NXX to support a new US LEC switch, LSVLKYPIDSA that will be delivered to and co-located with our existing switch at 9780 Ormsby Station Road, Louisville. In the request, US LEC notified Neustar that US LEC would retain block 1 from the NXX to support the LRN needs and a provide a small group of numbers for customers and return the remaining blocks to the pool for other local carriers to use.

In its request, US LEC notified Neustar that the request was for an NXX to support an LRN (see explanation on page 2 of the *Months to Exhaust and Utilization Certification Worksheet* and in *Request Resources*). In its response, Neustar stated "Based on the information provided, you will not exhaust all the blocks you wish to retain from the full NXX in 6 months."

US LEC requests the Commission intervene on its behalf to secure an NXX in the 502 NPA from Neustar. In accordance with ATIS Guidelines IN 980713-021, LRN Assignment Practice, a company can request the Commission to override the utilization requirement in instances of a need for an NXX for LRN purposes in a new switch. Enclosed are copies of the pages containing US LEC's request and Neustar's response with certain portions highlighted.

If you have additional questions, please contact me at (704) 319-1476 or [egriffin@uslec.com](mailto:egriffin@uslec.com).

Sincerely,

Edward H. Griffin  
Regulatory Manager
