RE: Case No. 2006-00146

TO WHOM THIS MAY CONCERN;

First of all I am half owner of the property right across the fence from where you want to put a BLUEGRASS CELLULAR 240 ft tower with a radius of 500 ft. which covers all of my road frontage and quite a bit more of my property. I definitely want to intervene in this construction of this 240 ft. tower that close to my property.

I was thinking of building a new house back there in that corner you are talking about putting that tower. I really don't appreciate this one bit. I oppose it 100%. Another thing I don't particularly like Bluegrass Cellular, I have used their public cellular telephone service, and I never did like it and when I did use it, it was out of my jurisdiction and cost me a fortune to make one emergency phone call. And now I personally think you have the nerve to put a tower right on the border line of my property, without asking me or telling me anything about it. What in the hell are you trying to do save 39 cents on postage.

I am also thinking of how much damage this is going to cost me personally, and how many dollars do you think this will depreciate the value of my property, with that damn tower there. If you want to construct a 240 ft. tower, take the damn thing and construct it in your front yard, and then we will see how well you and Andrew Antle like it, don't be constructing towers on the borderline of my property. I don't care of how much you are paying Andrew Antle for a lease. Lets talk about the damage you are doing to my property. Let alone having the nerve, to pull some shit as this behind my back and not even sending me a letter, and worse, not even discussing this with me before you made all of these big decisions. If your towers don't reach no farther than they do, their not worth having no way. Sounds like you are looking for more customers, well you can certainly count me out, I'm not signing no more of your yearly contracts, and if anybody else had any sense, they wouldn't either. I've not only had unpleasant experience with BLUEGRASS CELLULAR, but here you come again and want me to put up with this bull shit at my expense. I think it would be a better idea if you would take your 240 ft. tower and build it somewhere else or stick it up your ass.

Beside building a new house back there, to get away from the noise of this 24 hr. truck stop and drugs by the glory, I'm going to put some cows, maybe a couple of horses back there on the property across the fence where you want to put that damn tower. With all the radiation coming from that cellular tower, this cannot be good, and don't give me the microwave story, I don't buy it, or none of the other bull shit you can come up with.

Lets get back to talking about all the damage you are conflicting on my property, and all the stress you are putting me through, this is not good either. Give me another 10 minutes and I'll come up with a dozen more reasons that tower should not be constructed there, take your damn tower and go somewhere else with it.

This is a family oriented farm, it has been here for generations, my family has been here over 100 years. I don't like this, you are messing with my inheritance, my heritage, my family, my pocketbook, my health and well being, I'm not going no where and I don't like people moving in on me like this and causing all these problems at my expense, so I think its time you to talk to me

of how much you are going to pay me for the damage you are causing me and my family, and I don't want to hear you bull shit about the leasing and contracts.

In closing, I hope this takes care of this matter, and we don't have to take this any further and cause hard feeling with long time neighbors, over a few dollars in your pocket. at my expense, therefore I say no to your tower and so does my brother and my whole family. There's quite a few Griders in Russell County.

Sincerely yours,

Janice Grider
