PUBLIC SERVICE  
COMMISSION

Dear Commission,

I have some concerns about the proposed construction of a cell facility & tower in our residential neighborhood. Research has shown the connection between living in areas with cell towers and an increase in cancer and other health issues. As a mother of 4 children this concerns me greatly. Is this construction a health hazard?

What is this 500' radius for?

We need more information on the 200' offset from variable access & utility easement that seems to take in a great percentage of our property. Why the need for this huge access area? I don't understand. We strongly object to their use of our land. Unclear what they want. Need more info.

These are all heartfelt concerns for me & my family.

Sincerely,

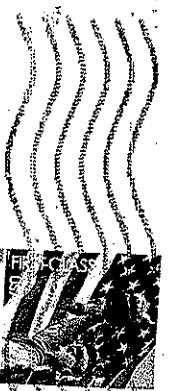

*Dallas & Connie Piercy*
